

Dr Chronics Special Selector

Choice strains for the canisoiur. the best buds . grown out from North America. and beyond.

Strain **Cherry pot** 100% feminized

Breeder: D.C/ capt.B

origin : california/ holland

flowering : 56-63 days

12 seeds: £49.00 \$78.00 out of stock soon come , sorry.

after 4 long years of devolpment , we have finally released our" Cherry pot" a sweet tasting kind bud .

ONLY BY BREEDING VAST NUMBERS OF STRAINS AND HYBRIDS DO WE FIND THE HIGHEST POTENTIAL THAT CANNABIS HAS TO OFFER HELLOW AND WELCOME TO PRAIRIE BOYS WORLD I STRIVE TO OFFER THE BEST NEW WORLD STABILITY TO OLD WORLD GENETICS THAT I CAN FIND DOING THIS I HAVE PRODUCED MANY STABLE STRAINS AND A TON OF HYBRIDS THAT I LOVE TO SHARE WITH OTHERS .

Strain: **Wakeford** .

indoor/ outdoor.

10 seeds: £35.00 \$56.00 in stock.

Wakeford is a recent hybrid bred for its name sake the plants were recently grown out in the valley and have a killer couchlock high this strain was produced to make a very strong medicine for very sick man with mean tolerance at that we succeeded we used 0g13b sk#1 x g13 x ubc chemo for this one she yeilds great in sea of green with huge ressin covered buds that are hard and heavy as rocks it takes a good 9 wks but is well worth the wait if you want couch lock with comercial potential this is the plant smooth hash flavour it did great out side this year finishing oct5

Strain: **Northern dream** (indoor K.G>thunderfuck hybrid)

indoor :

10 seeds: £35.00 \$56.00 in stock.

we used a NL#5 male to pollinate our best KG thunderfuck mother this is the first generation back cross to a exceptional NL#5 cutting that has been around E. vancouver for some time now huge rock solid main cola dominant plants with a skunky lemon scent very commercial 7-8wk flwr .

Blue Grass seeds.

Blue Hen Grown from two Cannabis Cup winners, Blueberry and Super Silver Haze. Blue Grasseeds has embarked on an ambitious project to breed the first true medicinal strain. Powered by SSH and Blueberry with the famous Blueberry flavour.

Type: 50/50 Indica/Sativa;

Height: 4 feet indoors;

Flower: 6-8 weeks;

Yield: 120-160 grams

15 seeds £ 40.00 \$ 65.00 in stock

Blue Goo.Blue goo:Blue bubble juice x double g . Maybe one of the best scrog strains on the market today! Wonderful blue berry flavour crossed with the awesome power of g13. High is very powerful and sometimes trippy that leads to a solid peaceful couch lock.

Type: 50/50 Indica/Sativa;

Height: 4 feet;

Flower: 7-8 weeks;

Yield: 100-120 grams

15 seeds £38.00 \$ 60.00 in stock.

Blue Kiev An old favorite brought back by popular demand. Our homebred Blue Russian was crossed with a very potent AK 47 male This is one of our top yielding strains and will deliver a knock-out blueberry flavored narcotic stone. Excellent relief for pain,arthritis, depression or anxiety.

Type:50/50Indica/Sativa;

Height: 4 feet indoors;

Flower: 6-8 weeks;

Yield: 120-160 grams

15 seeds £32.00 \$50.00 in stock.

Blue Russian: (Blue Hen x Juicy Russian)

Possibly our most beautiful plant, we expected this one to be good but WHAT a surprise! She looks like blue rubber, peels out leaving the starting gate going straight to the front, grows into a big fat berry-smelling giant showing of resin-coating few can match. Leaves no doubt about who the father is, his blue

highness stamped all over this one. Juicy Russian #4 was the fairest of all of those Russians, a splendid individual, sheer delight to smoke.

Type:indica /sativa

height:4 foot indoors

flower:50-55 days

yield:80-125 g

Chimera

Doc chronic is happy to announce that we now carry Chimera seeds.

Chimera produces some of the finest strains available today, cast your eyes on this fine selection.

Strain : **frostbite**

flowering :50-60 days

12 seeds £38.00 \$60.00 in stock.

This frosty hybrid packs on the weight!!! She's a large yielding girl with incredible resin production and a strong aroma. 2 lbs + per 1 KW light easy using the Sea of Green technique... much more for experienced gardeners. These plants tend to stay columnar from seed, but the clones will branch given adequate space. Yield: They go huge!

Strain: **Schnazzeberry**

flowering :45-55 days

16 seeds £ 36.00 \$55.00 in stock

Spice of Life's fantastic shiskaberry fathers beef up the yield of the odourific Dom. These plants branch well and fill in with potent gland laden flowers. Serious odour control is required for most individuals, especially late in flowering! Yields are above average

strain: **C4** (no pic yet)

flowering :45-55 days.

12 seeds : £38.00 \$60.00 in stock

Explosive! Same mothers as the Frost Bite, but fathered by shiskas! Both lines are huge yielders; the shisk brings down the flowering time and the tasty moms improve upon the flavour and aroma. The trim from these busty ladies makes excellent bubblehash- truly worthwhile. Big big fun! Yield: way up there!

strain : **Malibu**

Flowering 55-65 days.

12 seeds £36.00 \$55.00 in stock

A great scrog selection; the high is clear but intense, and a very nice citrus aroma to boot! These bushy plants that are great for training, but do very well left on their own. The flowers have a great medicinal value, and did we mention that taste?

Yield: Good!

strain :**aurora**

flowering:50-55 days:

12 seeds £ 32.00 \$45.00 in stock .

An outstanding cross of the Dom and a super sweet Northern Lights selection. These chunky ladies make great bushes, but also perform very nicely in a sog/scrog situation.

Yield: large

Dutch Passion

Dutch passion where one of the first seed company's to feminize seeds, they have been producing seeds for over 10 years.

The basis of there success has been the genetic control they have over there variteis and the constant influx of new genetics they obtain world wide.

strain: **skywalker**: NEW NEW NEW

flowering: 56-63 days

10 seeds regular: £50.00 \$80.00 in stock

10 feminized seeds £75.00 \$120 in stock.

Skywalker is a hybrid of a Mazar female and a Blueberry male. The intention was to create one of the best indica's existing. The Blueberry taste and aroma are combined in this hybrid with the vigor and yield of Mazar. Blueberry characteristics as "curling leaves", slow initial growth and bluish hues disappeared in the hybrid, while taste, aroma (fruity and fresh)andthe quality of the "High" were kept. Grown from clones in "sea of Green",yields will be about 400 gr./m2 under optimum conditions

strain: **Isis**.....NEW NEW NEW.....

flowering: 9 weeks.

indoor:

10 seeds feminized:£85.00 \$135.00 in stock.

New from dutch passion. mostly sativa with a clear haze influence, first class high branches bow down towards the end of the life cycle of the plant due to the weight of the buds.

strain: **ultra skunk**.

flowering: 42-63 days.

indoor:

10 seeds regular: £30.00 \$48.00 in stock.

10 seeds: feminized: NEW NEW NEW £55.00 \$88.00 in stock.

In our Swiss experiment we flowered several Dutch and Swiss Skunk clones and also several skunk seed varieties. Our goal was to select the best possible Skunk. By hybridizing the best two Skunk plants we created 'Ultra Skunk', a very homogenous variety. Thick buds with wooley pistils. Sweet, soft and fruity taste with a distinctly long lasting 'Up' high...

strain: **blueberry**.

flowering: 8-10 weeks

indoor/ green house:

10 seeds regular: £40.00 \$65.00 in stock.

feminised: £69.00 \$110.00 in stock.

Blueberry is a mostly Indica (80% Indica, 20% Sativa) strain, that dates to the late 1970's.

A large producer under optimum conditions. A dense and stout plant with red, purple and finally blue hues, that usually cure to a lavender blue. The finished product has a very fruity aroma and taste of blueberry. It produces a notable and pleasantly euphoric high of the highest quality and is very long lasting. Medium to large calyxes.

"Blueberry" has a long shelf life, stores well over a long period.

strain: **mazer**.

flowering: 8-9 weeks

indoor/ greenhouse

10 seeds regular: £30.00 \$48.00 in stock.

feminised: £60.00 \$96.00 in stock.

This is an upgraded selection of the valued former Afghan/Skunk. The taste is softer than before with an impressive yield. The Afghani (Mazar-i-Shariff) part is a very short Christmas tree-like plant, 100% Indica and very resinous. The F1-cross with Skunk #1 gives the variety a bigger yield and better taste. Very good "up" high. As both parents are very consistent, the offspring is very consistent too.

strain: **flo**.

flowering: 9-11 weeks

indoor/greenhouse.

10 seeds: regular: £40.00 \$64.00 in stock.

feminised: £80.00 \$128.00 in stock

original flo is a sativa/indica cross the large tight spear shaped buds are made up of small densely packed purple calyxes. the plants are taller and like to branch out. a super producer, the flavor like nepalese temple hash. a most pleasant and enjoyable smoke.

strain: **skunk#11**

flowering: 9-11 weeks

10 feminised: £27.50 \$44.00 in stock.

a very nice skunk selection. good results in yield and "high" our cheapest but nevertheless quality strain.

strain: **white widow**

flowering: 8 weeks

10 seed: regular: £30.00 \$48.00 in stock.

feminised: £65.00 \$100.00 in stock.

red variety of recent years in Holland, the plants are white of T.H.C.-glands even on big parts of fan leaves. a very soft smoke and great high.

strain: **Durban poison**.

flowering: 8-9 weeks

10 seeds: regular: £26.00 \$42.00 out of stock.

feminized £ 52.00 \$80.00 in stock.

from south Africa produced in Holland. exclusively inbred never hybridized, 100% sativa. large long bud leaves, buds are also large and long with lots of resin. a sweet licorice or anise flavour. does very well under artificial light.

strain: **oasis**

flowering: 8-9 weeks

10 seeds: regular: £22.75 \$36.00 in stock.

feminised: £62.00 \$99. in stock.

One of our most popular varieties, Oasis is our Northern Lights#2 selection. A very strong plant, almost spidermite resistant. Good yield, excellent taste and excellent high.

strain: **masterkush**.

flowering: 8-9 weeks.

10 seeds: regular: £26.00 \$39.00 in stock.

feminised: £50.00 \$80.00 in stock.

A F1 cross between two different Hindu-kush strains. yield is high. Excellent high and strong taste. one of Dr Chronic's favorites

strain: **hempstar**.

flowering: 7-9 weeks.

10 seeds regular: £25.00 \$40.00 in stock.

10 seeds feminized: £50.00 \$80.00 in stock.

This variety was strongly improved in 1998, a breakthrough in the development of this variety. A sturdy plant with the power and yield of the famous Northern Lights #5. Hybridized with the best of our potent 100% Haze genetics. This variety has a solid, strong long lasting "high", combined with a well balanced, soft smoking experience. Good for bumper harvests. A perfect variety to select clones from.

strain: **skunk passion**.

flowering: 8-9 weeks

10 regular seeds: £28.00 \$45.00 in stock.

10 feminized seeds: £50.00 \$80.00 in stock.

passion is back. The Cannabis promise for the next century, developed from the 007 Skunk-line. A surprising improvement. In smoke tests by a top class test team, again and again praised for its special qualities.

The plant is mainly Sativa and will amaze you by its yield. The buds are not especially hard, but then again rich and equipped with many beautiful long hairs. Buds of 25 cm are no exception. It takes 8 to 9 weeks to bloom, but your patience will be richly rewarded. Guarantees a beautiful quality harvest. The high is a slow rising one, may take several hours and diminishes slowly after that. Absolute top class, that we recommend with pride.

strain: **power plant**.

flowering: 8 weeks.

10 regular seeds: £ 22.00 \$34.00 in stock.

10 feminized seeds: £55.00 \$ 88.00 in stock

This strain has been inbred only, never hybridized. Very rich in THC. It is a strain with an enormous grow potential. Indoor as well as in a greenhouse the plants have an enormous yield. Indoors flowering starts already one week after turning back the light cycle to 12 hours. Outdoor, flowering starts late, but the plants ripen very fast. This variety is very uniform. Strong "up high", very soft smoke.

Strain: **Green Spirit** (feminized)

Breeder: Dutch Passion

Origin: Holland

Indoor

Flowering: 56 days

10 seeds: feminized £ 60.00 - \$96.00 in stock

Big Bud and Skunk #1, Green Spirit gives huge yields indoors. Select the longer flowering plants for best results.

strain: **Passion #1** @ Outdoor

breeder: dutch passion

outdoor.

flowering 42 days 1st week october

10 seeds regular £ 20.00 \$32.00 in stock.

10 seeds feminized £40.00 \$ 64.00 in stock.

Passion #1 (Amstel Gold) is an Indica variety developed in California in the seventies, and has been grown outdoors in Holland since 1980. Smokes soft with a citrus-like aroma and has a good high. Easy to grow, grows with long compact resinous buds. One of the best green outdoor varieties worldwide. THC = 18.6%, CBD < 0.1% < BR >

Strain: **Voodoo**

Breeder: Dutch Passion Feminized

Origin: Thailand / Holland

Outdoor / Greenhouse

Flowering: 49 days

10 seeds: feminized : £ 50.00 - \$80.00 in stock.

regular : £ 25.00 - \$40.00 in stock.

Voodoo was developed as a green strain, from Thai parents in 1997. The Thai parents have been grown in Holland for years already. A very strong plant with long thick buds. Has a Thai aroma and a clear, fresh smell.

Sativa high, very productive. One lab's report on this variety was THC=8.2%, CBD < 0.1%, S/T=11.0%

Strain: **Khola** (feminized)

Breeder: Dutch Passion Feminized

Origin: Thailand / Brazil / Holland

Indoor / Outdoor

Flowering: 49-70 days

10 seeds: feminized: £ 50.00 / \$ 80.00 in stock

10 seeds : regular : £25.00 / \$40.00 in stock.

A stabilized Dutch hybrid specially developed for outdoor growing by crossing selected Thai & Brazilian strains, but also with superb indoor results. Dark leafed, early flowering mold resistant with compact resinous buds.

Not recommended for the novice but a must for connoisseurs.

Strain: **Shaman** (feminized)

Breeder: Dutch Passion Feminized

Origin: Holland

Outdoor

Flowering: 56-63 days

10 seeds: feminized: £ 30.00 / \$ 50.00 in stock.

10 seeds: regular: £15.00 / \$20 in stock.

Shaman : Outdoor

This is our former variety Purple/Skunk. This variety is a hybrid (F1) of Purple #1 and an early Skunk. About 50% of the plants turn purple during flowering.

87.5% Sativa and 12.5% Indica. One lab's report on this variety was

THC=13.7%, CBD=0.4%

Strain: **Trance** (feminized)

Breeder: Dutch Passion Feminized

Origin: Holland

Outdoor

Flowering: 49 days

10 seeds: feminized £ 40.00 / \$ 60 in stock.

10 seeds: regular: £20.00 / \$30 in stock.

Trance Outdoor: An upgrade of our former variety Skunk/Indica.

With 100% Skunk seeds, it's not possible to grow fully mature outdoor plants, because the seeds were selected for growing under artificial lights and greenhouse. Skunk was crossed with an early Indica, to let it mature sooner and to make the plant stronger for outdoor conditions.

This is the F1 generation. It has come out as a very nice strain.

Strain: **Twilight** (feminized)

Breeder: Dutch Passion Feminized

Origin: Holland

Outdoor

Flowering: 49-56 days

10 seeds: feminized £ 35.00 / \$ 60.00 in stock.

10 seeds: regular 20.00 / \$ 40.00 in stock.

A beautiful purple variety with high yields and Afghan taste. Heavy buds and high. 100% Indica.

Strain: **Purple #1** (feminized)

Breeder: Dutch Passion Feminized

Origin: Holland

Outdoor

Flowering: 56 days

10 seeds: feminized: £ 40.00 / \$ 60 in stock.

10 seeds: regular: £20.00 / \$30.00 in stock.

Purple #1 : Outdoor

A strong plant (50% Indica, 50% Sativa), easy to grow. Purple Afghan seeds have been crossed in Holland with Indica and Sativa varieties since 1983. The plants are fully adapted to the Dutch climate and have a respectable yield.

This variety has calyxes that turn purple, starting at the beginning of flowering.

Up to 90% of the plants turn purple. Has a rough, but subtle aroma and a very good high.

strain: **skunk#1**

flowering: 45-75 days

10 regular seeds: £15.00 in stock \$25.00 in stock

skunk#1 (75% Sativa, 25% Indica) was originally a cross between 25% Afghani, 25% Mexican Acapulco Gold and 50% Columbian Gold. This variety is a stabilized homogeneous strain.

Blooms with long, thick buds, varying in color from light green to golden. Very high flower to leaf ratio. Mold susceptible the last 6 weeks of flowering. Soft and sweet aroma and a very strong "up" high. Excellent variety for indoor growing or greenhouse with darkening system.

Very high yields. Easy to manicure.

Blue Moonshine® Indoor

A super potent Blueberry Indica, coated with a strong concentration of tall standing trichomes. This produces a long lasting very narcotic experience -body high blueberry. Short (80 cm) stout kush plants that produce dense, tight, rock hard nuggets of trichome-coated bud. A true "hash-plant".

Flowering period: 9 weeks

Harvest time outdoor: mid Nov.

10 seeds £40.00 \$64.00 in stock.

2nd price "High Times Cup" 2000

1st price "Highlife Cup" 2002

strain: **Euforia**

Developed by our breeders in 1996. A very fine Skunk selection, very commercial, very heavy bloom, bumper harvest, the famous Skunk high, taste is not so sweet as our other Skunk selections. One of our favorites, also for greenhouse.

Flowering period: 7 weeks

Harvest time outdoor: end of Oct, beginning of Nov.

10 seeds £25.00 \$40.00 in stock.

strain: **cali-orange**.

flowering:56-days.

10 seeds regular.£25.00 \$40.00 in stock.

zed hybrid, inbred since 1980. Can be extremely resinous, even the leaves. 50% Sativa, 50% Indica. Some plants have a pronounced citrus aroma and flavor. Very strong, fairly clear high. Yields are slightly above average. THC 7.8%, CBD 0.1%

strain: **hollands hope**.

flowering:56-63 days

10 seeds regular: £20.00 \$32.00 in stock.,

one of the first Dutch Outdoor strains, grown in Holland since the early eighties. A heavy Indica variety with a knock-out stone. Very mold resistant. Recommended.

strain: **purple passion**.

flowering: 9 weeks.

10 seeds regular: £40.00 \$60 in stock.

A beautiful Indica/Sativa hybrid. With its blue/purple shades, a very decorative plant. At harvest time the buds turn lavender-blue to aubergine. The buds are silver with THC-glands. The buds are hard and the plant is very productive. It has a fresh, sweet and herbal aroma and taste. The energetic "High" last for a very long time. Don't miss this variety.

strain: **orange bud**.

flowering: 8 weeks.

10 regular seeds: £20.00 \$30 out of stock.

A 100% Skunk selection, grows with thick hard buds and orange pistils. A very appreciated variety.

strain: **super haze**.

flowering: 10-12 weeks.

10 seeds regular:£ 28.00 \$45.00 in stock,

Formerly this strain was called "Haze/Skunk". Still one of the best for the Dutch Passion team. Originally Haze is a pure Sativa strain. It is crossed with Skunk#1 to get a bigger yield, a softer taste and a shorter flowering period. Truly superior sweet taste. The high is incredibly clear and up energy. A very favorite strain from our collection. Very high yield for an almost 100% Sativa variety.

strain: **Buddah**.

flowering: 8 weeks.

10 seeds regular: £30.00 \$48.00 in stock.

Another favorite from our collection, developed by Dutch Passion breeders in 1996. A female Oasis/Shiva/Haze crossed with a male Oasis/Shiva/Skunk.

strain: **ultra skunk**.

flowering:42-63 days.

10 seeds regular: £30.00 \$48.00 in stock.

10 seeds: feminized: £55.00 \$88.00 in stock.

Swiss experiment we flowered several Dutch and Swiss Skunk clones and also several skunk seed varieties. Our goal was to select the best possible Skunk. By hybridizing the best two Skunk plants we created 'Ultra Skunk', a very homogenous variety. Thick buds with wooley pistils. Sweet, soft and fruity taste with a distinctly long lasting 'Up' high...

strain: **Delta 9**. NEW NEW NEW

flowering: 56-70 days.

10 seeds regular: £55.00 \$88.00 in stock.

Delta 9 is one of the best Sativa's possible. We hybridized an 'Isis' female with a 'Flo' male. The result has a Haze like aroma but the taste of the 'Isis' combining to produce a subtle but full high. Good yield of exceptional quality can remind you of the Kashmiri hash of the 70's. A rich plant with big buds.

strain: **dream weaver**.NEW NEW NEW

flowering: 56- 70 days

10 SEEDS REGULAR: £45.00 \$72.00 in stock.

From the Cannabis Buyers Cooperative in California comes the Dream Weaver. We hybridized this Medicinal Indica with a particularly good Indica from Humboldt County (California). The High is seriously 'Powerful' in the words of our test team. Yields above average, excellent taste

Serious Seeds

Serious seeds is a small firm concentrating on the production of high quality, stable and consistent cannabis seeds, serious strains are bred and stabilized for many generations with quality as the highest priority. These stable strains are selected for their unique properties, and then crossed to produce seeds for vigorous F1 hybrids. When you grow serious seeds you can be assured that the results will be consistent because every batch of seeds has been tested for germination rate and uniformity. you will notice that we carry only five sorts of seeds and maybe you wonder why? after all there over 100 listed in some seed banks. instead of padding there seed bank with varieties that are available else where serious sells only a few, custom developed and always prize winning varieties.

Serious seeds are packed in packs of 15 seeds and every pack has a batch number.

strain: **ak 47.**

flowering: 47 days.

yield: 350-500 grams

15 seeds: £50.00 \$75.00 out of stock. , sorry.

This easy to grow plant is our most popular. It is of medium height and produces good yields quite quickly. Extremely STRONG odor and smoke.

Take extra care for odor control when growing near neighbors. The name was given not out of any idea of violence, but more in association with the 'one hit wonder' that the smoke is. Quality without compromise makes AK suitable for commercial grows or home use. These plants have a short flowering period for a sativa, producing compact, not too leafy buds that gleam with a coat of resin crystals. Winning SEVEN prizes!! in Cannabis competitions, including second prize for the Best Sativa in the 1999 High Times Cannabis Cup, prove it is a favorite to smoke as well as to grow.

Type: mostly sativa

Indoor clone grow time: 5 – 10 days

Indoor flowering time: 53 – 63 days

Indoor yield: 350- 500 grams/m2

Outside/ Greenhouse harvest time:

15-31 october

strain: **bubble gum.**

flowering:56-63 days.

yield:350-450 grams

15 seeds:£48.00 \$76.00 out of stock.

Bubble Gum is a medium tall, usually not too branchy (sometimes stretchy) plant, producing compact, crystal covered buds. Originally the Bubble Gum was developed by growers in Indiana, USA. From there the genetics moved to New England and eventually Holland. It took many generations to finally produce this stable Bubble Gum, with the characteristic, sweet smell (truly resembling a typical bubble gum taste) and euphoric high; the original trademarks of this famous strain. The only inbred strain (no F1 hybrid) in the Serious menu. of 1994, a in 1995 and again a in 1999, giving Bubble Gum a total of from the judges. Type: sativa/indica hybrid Indoor clone grow time: 7 – 14 days Indoor flowering time: 56- 63 days

strain: **chronic**

sativa/indica.

flowering: 56-63 days

15 seeds: £48.00 \$76 out of stock.

Our most commercial variety, this medium height, not too dense plant is the perfect combination of good yield and excellent quality. Smokers that know and grow choose this plant for its combination of appearance and sweet smell. With its indica background Chronic can produce up to 600 g/m2 without losing that connoisseur feeling. Grows a single huge central bud with few side branches. Do not top plants to encourage multiple big buds, as this strain does not respond well. Mild, sweet smell develops while flowering, take care to dry thoroughly after harvest (before packaging) to maintain this subtle fragrance. 3rd prize High Times Cannabis Cup 1994, improved in 2000. Of our strains, this is the best choice for growers tired of losing quality when increasing yield.

Type: sativa/indica hybrid

Indoor clone grow time: 5 – 10 days

Indoor flowering time: 56-63 days

Indoor yield: 350 – 600 grams/m2

Outside/Greenhouse harvest time:

15-31 october

strain: **kali mist**

sativa

flowering: 70-90 days

15 seeds: £50.00 \$78 in stock.

Arguably the top sativa strain available today. With 90% sativa genetics, Kali Mist grows into tall, running, classically sativa plants with very few leaves. This strain produces dense clusters of full fluffy buds, producing much higher yields than you would expect. The plant structure and few leaves allow the light to pass all the way to lower branches, allowing bottom buds to develop fully. When planted outside early in the year this plant can grow very tall. Expect spiraling flowers with a high resin content and a delightfully spicy scent. Kali Mist is often the choice of experts for their own stash grows. Also, particularly woman seem to like this strain, next to the sheer pleasure of smoking it, we received several reports that it works great against menstrual cramps. We are proud to announce that Kali Mist was improved in 2000 to produce bigger yields. In Spain it proved to be very mold resistant, even outside during bad weather. This strain has flavor and subtle cerebral effect that gave it a Cannabis Cup first prize in 1995 (Hydro Cup) and again (with this new and improved version) in 2000 (Seed Company Sativa Cup)! Without a doubt the choice for connoisseur stash.

strain: **white Russian**

indica

flowering:56-63 days

15 seeds: £48.00 \$76 out of stock sorry,

These seeds produce plants that are fantastic in both appearance, and effect. Our most typically indica strain, White Russian is a stable cross of AK-47 and White Widow (a prize winning indica clone). Medium height, consistent plants and dense, very resinous flower tops (crystals appear after about 5 weeks of flowering). With such a strong indica background, the plants smell quite strong during both their growth and flowering period. In an independent seed comparison in which over 150 different seedstrains were grown out in a greenhouse, the White Russian came out as the strongest plant (22% THC, likely to be the strongest plant known at present!!). Winner of the overall Cannabis Cup in 1996 and of the Cup for Best Bio Grass in 1997. The plants yield very powerful buds, coated with resin.

Very strong, long lasting High, more cerebral than a knockout. Medicinal plant.

Type: mostly indica

Indoor clone grow time: 5 – 10 days

Indoor flowering time: 56- 63 days

Indoor yield: 350-500 grams/m2

Outside/ Greenhouse harvest time;

15-31 october

THSeeds: The Beginning T.H.Seeds was established in 1993, making it one of the oldest seed companies in Holland. It began in the C.I.A. (Cannabis In Amsterdam), which was: a Cannabis information center, a world renowned seed shop, the first hemp store in Europe and, according to Robert C. Clarke (author: Marijuana Botany, HASHISH!), "The epicenter of the Cannabis universe." THSeeds quickly gained an excellent reputation among the experienced growers who purchased THSeeds. Year after year, these growers return to buy more THSeeds. Most comment on how pleased they are with the consistency and quality of the THSeeds genetics. This positive feedback from the growers themselves is the solid foundation on which THSeeds has been built. THSeeds is a grower-oriented seed company, we seek as much feedback from growers as possible.

THSeeds brings the best American genetics to Holland Since its beginning THSeeds has been on the cutting edge of the New School Cannabis Genetics. Born at a time when almost everything in Amsterdam was a mix of Northern Lights, Skunk and Shiva in various proportions, THSeeds has worked long and hard to bring new stable varieties onto the market. Two of our biggest successes are

The Bubble Gum THSeeds was the seed company responsible for bringing the Original Bubble Gum from the States, and was the first to sell the Bubble Gum seeds (see New York Times, Feb. 1994). These Bubble Gum genetics helped numerous Coffeeshops win many High Times Cannabis Cups over the years. The S.A.G.E. (Sativa Afghani Genetic Equilibrium) Following the Bubble Gum, THSeeds brought the S.A.G.E. from the high mountains of central California to Holland. Named "S.A.G.E." because of its distinctive spicy smell and taste, this plant's Haze-y flavor and high will fool you into thinking it is a pure Haze variety. But when you grow it you will not experience the low yields of all other Haze varieties. The large yields you get come from the Afghani side, but without overpowering this plant's superior Haze flavor. For two years the THC percentage of the 50 varieties entered by all the coffeeshops and seed companies entered in the High Times Cannabis Cup was established. The S.A.G.E. scored 3rd(1998), and 2nd(1999) highest THC with over 20%. (see lists on page...). Both years this THC ranking was higher than any of the

Coffeeshop or Seed Company Cannabis Cup winners! And the one year (1999) the S.A.G.E. water hash was entered in the Cannabis Cup it won again. T.H.Seeds past Victories:
1995 Cannabis Cup: Kal-X hash laminate takes 3rd place in the hash category
1996 Cannabis Cup: Bubblegum hash micro-chip takes 3rd place in the hash category
1996 HasH Bash: Bubblegum laminated hash takes 2nd place in the hash category.
1998 Cannabis Cup: S.A.G.E. takes 3rd highest THC level with 21% THC. This THC test included all 50 varieties entered including seed companies and coffeeshops giving The S.A.G.E. a higher THC level than any of the Cannabis Cup winners
1999 Cannabis Cup: S.A.G.E. takes 3rd highest THC from all the varieties entered.
1999 Cannabis Cup: S.A.G.E. water hash takes 2nd place in the Hash category.
1999 Cannabis Cup: S.A.G.E. water hash takes 2nd highest THC level with over 46%
2000 Cannabis Cup: S.A.G.E. water hash takes 1st place in the hash category
2001 Cannabis Cup: S.A.G.E. takes 2nd place for best overall weed in the Press Cup, voted by the international press.
2001 Cannabis Cup: S.A.G.E. rated highest Sativa by High Times writer Kyle Kushman.
2002 Cannabis Cup : The HOG, takes first place in the seed company Indica Cup

strain : **HOG**

breeder : Thseeds

origin : holland

indoor

flowering: 55-60days

10 seeds: £69.00 -\$100 in stock.

Here it is, the 2002 High Times Cannabis Cup winner in the Indica category.

A fast flowering fatt greasy Indica, from Southern California. If you are looking for a great producer, and a heavy stoney smoke, the Hog will be your favorite.

Type: Indica

Height: 120-140 cm

Yield: 400-600 p.s.m.

Flowering Time: 55-60 days.

Strain: **S.A.G.E**

Breeder: THSeeds

Origin: USA / Holland

Indoor

Flowering: 60 days

10 seeds: £ 50.00 -\$ 75 in stock.

The name says it all Sativa Afghani Genetic Equilibrium, a well balanced Haze crossed with a robust Indica That produces a power packed plant with over 20 % T.H.C. Fast becoming a legend, sage took 2nd place in the blind test of the 2001 High Times Cannabis Cup and the hash made out of this plant won 1st place in 2000, both categories based on overall strength and quality. High T.H.C. and low C.B.D make this plant a perfect head stash variety, spicy sandalwood flavor and long lasting uplifting high make this the plant for those who must have the best. Longer flowering time is rewarded with large buds that will seem to double in size in the last few weeks.

Strain: **Chocolate Chunk**

Breeder: THSeeds

Origin: Holland

Indoor

Flowering: 56 days

10 seeds: £ 40.00 - \$ 60 in stock.

This is real candy. With a definitive kush bottom this pure Indica will melt in your mouth and stick to your hands. Thick, deep green leaves and fat dense buds will make every trip to the grow room feel like being, "a kid in a candy store." Chocolate Chunk is quite easy to grow due to it's quick flowering-time and "single cola" growth pattern. Works great with sea of green method

Type : pure Indica

Height : 100-125 cm

Yield : 350-400 p.s.m.

Strain: **KAL-X**

Breeder: THSeeds

Origin: Holland

Indoor / Outdoor / GH

Flowering: 60 days

10 seeds: £ 30.00- \$ 45 in stock.

Resin, resin, resin, that is the goal here. We crossed our best hash producers together, and guess what it made a resin encrusted plant, that makes great

hash, with very dense buds, thick and slow burning. This plant does surprisingly well outdoors, even finishing in the rough outdoors of Holland (mid oct.) With it's short wide structure be sure to clip lowest branches off, to help the plant focus it's energy on the main buds. Kal-x hash took 3 place in the 1995 Cannabis Cup .

Type : Mostly Indica

Height : 120-140 cm

Yield : 300-350 p.s.m.

Flowering Time : 60 days

Strain: **Stinky Pinky**

Breeder: THSeeds

Origin: Holland

Indoor

Flowering: 60 days

10 seeds: £ 40.00 / \$ 60 in stock.

This is a beautiful, mostly Indica variety that has pink pistils highlighting some of the plants very distinctive budding pattern, rounded main cola with a "crown" of buds and not much more below, great sea of green plant.

Type : Indica

Height : 120 - 140 cm

Yield : 350-400 p.s.m.

Flowering Time : 60 days

Strain: **Mr. Bubble**

Breeder: THSeeds

Origin: Holland

Indoor

Flowering: 65-70 days

10 seeds: £ 50.00 -\$ 70 in stock.

KALI MIST x BUBBLEGUM

These two Cannabis Cup winning varieties brought together in 1995 by "accident" prove to be the perfect match . The spiciness and clear strength of the Kali Mist is grounded by the classic indica flavor and narcotic effect of the bubblegum. This plant works great in all growing meduims (hydro, bio) and its much easier to grow than any of it's original parents. We are sure that when you grow her you'll never let her go down the drain!

Type : Sativa / Indica

Height : 140 -160 cm

Yield : 350-400 p.s.m.

Flowering Time : 65-70 days

Strain: **Mendocino Madness**

Breeder: THSeeds

Origin: USA / Holland

Outdoor

Flowering: 49 days

10 seeds: £ 30.00 / \$ 45 in stock,

This one of our fastest hybrids. We crossed a Northern Cali plant called "Madness" that would finish the first week in September with our fastest male breeder plant, that was responsible for the original Kwiksilver. The results will amaze even experienced outdoor growers, great structure and yield along with bug resistance make this plant a top choice for anyone who braves the outdoor experience.

Type : Indica / Sativa

Height : up to 2 meters

Yield : 300-500 p.s.m.

Flowering Time : 7 weeks

Strain: **Akorn aka Snowbud**

Breeder: THSeeds

Origin: USA / Holland

Indoor

Flowering: 55-60 days

10 seeds: £ 30.00 / \$ 45 in stock.

This is another variety from the great northwest, originally brought over in 1995. The name Akorn was given to the plant by the people who grew it because of it's hard finished structure with tight cola's the size of "baby arms" make this plant a great producer the people who smoke this type called it snowbud because of it's incredible resin production, whatever you want to call this plant growers and smokers will just call it their favourite.

Type : Mostly Indica

Height : 125 -150 cm

Yield : 400 - 500 p.s.m.

Flowering Time : 55-60

Strain: **Heavy Duty Fruity**

Breeder: THSeeds

Origin: Holland

Indoor

Flowering: 60-65 days

10 seeds: £ 50.00 / \$ 70 in stock.

One Word "Monstrous" will describe this plant. A huge producer with giant cola's will make any "bud waver" happy. Absolutely the best indoor producer we have seen yet. Ideal for planted method 20-30 p.s.m. But beware we don't call it heavy duty fruity for nothing, this plant smells Strong! So air cleaners or ozone generators are suggested.

Type: Sativa/Indica

Height: 120-160 cm

Yield: 400-600 p.s.m.

Flowering Time: 60-65 days.

Strain: The Original Bubblegum

Breeder: THSeeds

Origin: Holland

Indoor

Flowering: 60 days

10 seeds: £ 65.00 / \$ 95 in stock.

Bubblegum was our first contribution to the seed world in 1993. Over the last decade it has proven, through numerous awards and world wide fame, that this plant is here to stay. We successfully inbred and stabilised this plant for it's most desirable characteristics, it's fruity smell, thick lingering flavor and short soldier like stature. Bubblegum breeds true, and has been used by many seed companies to produce award winning hybrids, and will make a great cornerstone for your breeding program. This is a true superplant !

Type : Mostly Indica

Height : 120-160 cm

Yield: 350-500 p.s.m.

Flowering Time: 55-60 days.

Strain: Honeymoon

Breeder: Th seeds

Origin: Netherlands

Environment: Outdoor

Flowering: 60-70

10 seeds: £28.00.00 out of stock.

A Beautifull double purple cross grown at 800 m. 60 % Sativa, 40 % Indica.

Very sweet flavour and suprizingly great hash maker. Finishing time mid Oct.

Yield 300-400 grams per plant.

Type: Sativa/Indica

Height: 130-160 cm

Yield: 300 - 400 p.s.m.

Flowering Time: mid Oct.

Strain: Puna Budder

Breeder: TH seeds

Origin: Netherlands

indoor/ outdoor/ green house.

Type : Indica / Sativa

Height : 120-150 cm

Yield : 300-350 p.s.m.

Flowering Time : 55 - 60 days

10 seeds :£35.00 in stock.

Looking for something exotic? Superior Hawaiian genetics dominate the plants appearance, smell, and taste. Stable Afghan lines smooth out the flowering times to a respectable 55-60 days, making this an ideal plant

Strain: Skunk xxx

Breeder: Th seeds

Origin: Netherlands

Flowering: 49-56

10 seeds: £ 15.00 in stock.

Stable 3-way hybrid. old favorite from our skunk collection !

Type: Sativa/Indica

Height: 120-140 cm

Yield: 300 p.s.m.

Flowering Time: 55 days.

Sensi Seed Bank

veiw our new outdoor selection on the bottom of this page.

Ben Dronkers is at the helm of one of Holland's best and most experienced seed houses. He has steered Sensi Seed Bank to the "higher" echelons of

seed technology, producing unique world famous varieties. Their professionalism has led them to be many time first prize winners at the annual " High Times Cannabis Cup" - not only for their superior seeds but also for the best cannabis.

Please note that Sensi Seeds come in packs of 15, 20, 30 or 40, do not buy Sensi Seeds from anyone selling in different quantities as you may not be buying the genuine product.

Strain: First Lady

Breeder: Sensi Seeds

Origin: Holland

Indoor / Outdoor / GH

Flowering: 45-50 days

15 seeds: £ 50.00 / \$ 70 in stock

True to its name, this is one of the fastest flowering varieties available. These dominant Indica ladies will flower rapidly and grab your attention in the way that only a lady can. Originated in the high valleys near Mazar-I-Sharif, Chitral, and Kandahar, in Afghanistan and Pakistan; this indica cross will remind our older growers of the good old days when the first ladies were introduced in the western world. This strain is characterized by broad plants with short, woody stems and internodes, and large dark green leaves.

Flowering in greenhouse: mid-October

Yield in greenhouse: up to 500 gr.

cup winner 2002 first prize high times cannabis cup

Strain: Mothers Finest

Breeder: Sensi Seeds

Origin: Holland

Indoor / Outdoor / GH

Flowering: 50-70 days

15 seeds: £ 55.00 / \$ 80.00 in stock.

Every mother will tell you she doesn't have a favourite, but add this strain to your collection, and you'll have trouble deciding on your favourite mother. An Indica-Sativa cross, as funky as they come. Don't be fooled by the shorter flowering times and heavier yields of Mothers Finest, her Sativa breeding is evident from the first toke.

Flowering: 50 - 70 days

Height: 140 - 160 cm.

Yield: up to 120 gr.

Strain: American Dream

Breeder: Sensi Seeds

Origin: Holland

Indoor / Outdoor / GH

Flowering: 45-50 days

15 seeds: £ 50.00 / \$ 70 in stock

Now here's your chance to grab a piece of the good ol' American Dream. An ideal cash cropper with white crystals frosting not only the buds, but also the stem and beginning of the leaves. This super Indica flowers in seven weeks and will keep you dreaming for hours.

Flowering: 45 - 50 days

Height: 100 - 125 cm

Yield: up to 100 gr.

Flowering in greenhouse: mid-October

Yield in greenhouse: up to 500 gr.

Strain: 4 way

Breeder: sensi seeds

Origin: Netherlands

Indoor

Flowering: 45-60

15 seeds:£ 35.00 in stock.

This is a 4-way hybrid of our best indoor strains. Although somewhat variable in growth pattern, all tested plants were fast flowering and of very high quality. This hybrid has some of the sweetest, most balanced tastes and highs that we have yet produced.

strain: Hindu Kush:

Flowering: 45-50 days.

Height: 115-130 cm.

Yield: up to 90 gr.

15 seeds 24.00 32.00 in stock.

This pure Kush originally from the Hindu Kush mountain region is the result of many years of selective inbreeding. The seedlings are very even and consistent, an excellent indoor variety for crops from seed. Wonderfully potent, but not devastating, very mild for an Indica.

strain: jack flash.

flowering: 60-70 days.

15 seeds:£ 64.00 in stock.

Yes, here it is, the Jack Herer® hybrid that is easy to grow and already a classic amongst those who know! Everybody who has been growing Super Skunk® before will now choose for this fruity Jack taste with a flash of Haze. It is remarkable easy to grow and fresh and vigorous. It is recommended that you select the medium long flowering plants for finest quality and best results.

strain: **MAPLE LEAF INDICA®**

flowering: 40-55 days

15 seeds: £ 37.00 \$55.00 in stock.

A most interesting Indica strain with a long history brought out of the Afghan mountains just before the Russian invasion. For some, this precious strain will have a whiff of familiarity because it was used as an important building block for some of the most famous varieties of today. It's a compact powerful plant with wide fingered leaves and a very sweet Indica Maple aroma.

A delight for connoisseurs, a taste of the past...

Flowering: 45-50 days. Height: 110-135 cm. Yield: up to 110 gr.

strain: **Northern lights.**

flowering: 45-50 days.

15 seeds: £ 69.00 in stock

An absolute must for the indoor grower! For the last couple of years the Northern Lights® has dominated the various Harvest Festivals. Through selective breeding we have succeeded in producing one of the most powerful plants in the world. On top of that, we have developed a strain highly adapted for indoor growing: compact, powerful with a good yield and exceptional resin production. The most lucrative plant for the indoor grower.

strain: **hash plant.**

flowering: 45-80 days.

15 seeds: £ 75.00 in stock.

One of the most famous cuttings from the Northwest USA, Hash Plant is named for its hashy-tasting, highly resinous buds. For many years already known as an important building block for other Sensi Seeds hybrids, now the original Hash Plant X NL#1 hybrid is available again. This cross of 25% NL#1 and 75% Hash Plant produces some of the strongest specimens, even experienced Dutch smokers have trouble finishing a joint. This plant is easy to clone, has a very fast finish, abundant resin and a pleasant 'narcotic' high.

strain: **black domina.**

flowering: 50 days

15 seeds: £ 59.00 in stock.

This full blooded Indica with large bracts will soon have you on your knees and begging for more. This harsh overpowering lady simply gushes sticky resin to which most men seem to have a fatal attraction. A word of warning: this powerful compact Indica has had a devastating effect on many a man, leaving them apparently beaten and whipped with a strange smile on their faces.

strain: **Mr Nice g13 x hash plant.**

flowering: 60-days.

15 seeds: £ 89.00 in stock.

The G13 is an outstanding pure Indica cutting reputedly discovered by the U.S. government research program in Mississippi. Crossed with the Hash Plant it produces one of the best indoor hybrids that unfortunately was only available in the late '80s. Now the Sensi Seed Bank is very proud to have this hybrid in production again and to bring it on the market labeled as "Mr. Nice". This is in honor of Howard Marks, an Oxford graduate, who became one of the biggest Marihuana smugglers of our time. After spending 7 years in an American Penitentiary, Howard released his autobiography "Mr. Nice" and now spends his time promoting the normalisation of Cannabis. If you like a solid and resinous bud with a 'double Indica' hashish taste and aroma, it is time to go for the Mr. Nice G13 x Hashplant. Flowering: 55-65 days. Height: 100-130 cm. Yield: up to 100 gr.

strain: **jack herer:**

flowering: 50-70 days

15 seeds: £88.00. in stock.

This multiple hybrid is the result of many years of selective breeding, combining 3 of the strongest varieties known to man. Even though we are regularly put under pressure by obsessed growers to give pedigree details, I'm afraid that just as with the Coca Cola recipe this Sensi variety will have to remain a secret. This variety produces so much resin that even the branches bristle with stalked glands.

> High Times (May 1995): "the bud was heavy with crystals and resin; the high was immediate and cerebral. An excellent strain." Flowering: 50-70 days. Height: 150-180 cm. Yield: up to 125 gr.

strain: **Northern lights#5 x haze.**

flowering: 65-75 days.

15 seeds. £ 89.00 \$135.00 in stock

This hybrid is the pinnacle of achievement in Cannabis breeding today. The result: an extremely potent plant with a great Sativa high. In the 1994 harvest festival this variety was miles ahead of its competitors. The high yields compensate for the slightly longer flowering period. Hybrid vigour provides for lush growth, heavy bud formation and abundant resin. A true champion!

strain: **Big Bud.**

flowering: 50-650 days

15 seeds: £ 60.00 \$ 90 in stock,

One of our most popular varieties. A plant for professional cash croppers. Even experienced growers continue to be amazed and come back to fill their garden with these heavy ladies. It is advisable to tie up the bottom branches as they have a tendency to break due to their excessive weight.

strain: **Afghan# 1.**

flowering: 45 days.

15 seeds: £39.00 \$59.00 in stock.

Our top Afghani has been used for this variety. Characteristic are the big, dark Indica leaves, their strong aroma, sturdy stems and high yield. A must for the Indica connoisseur. At the 1994 Harvest Festival this new variety immediately seized the second place in the Indica category.

strain: **Shiva shanti.**

flowering: 50-55 days.

15 seeds: £20.00 \$32.00 in stock.

This Afghani with its penetrating Indica aroma is one of the better yielders in the collection. It's pleasant taste and above average potency make this an attractive variety for beginners.

strain: **silver haze.**

flowering: 65-75 days

15 seeds: £60.00 \$95.00 in stock.

Although the cerebral high of the Sativa is preferred by many, indoor growers aren't too fond of this type: Sativas get very tall, take a long time to finish off and produce skimpy yields. We have spent years searching for a superb Indica/Sativa hybrid suited for indoor growing. By crossing the Haze, the most powerful Sativa in the World, to a non-dominant Indica we managed to get the height and flowering time of the plant down to an acceptable level and still retain the unique Sativa qualities of the high. The results: the Silver Haze, winner of the '89 High Times Harvest Festival. Don't expect top yields but top quality that will excite the true connoisseur. Flowering: 65-75 days. Height: 150-180 cm. Yield: up to 100 gr.

strain: **hawian indica,**

Aloha! Enjoy the tropical sensation indoors. We have crossed a selected Hawaiian lady with our Northern Lights®. The result is a potent variety with a fresh aroma and a high yield amply compensating for a longer flowering period. For many, this was THE surprise at the 1994 Cannabis Cup.

Flowering: 60-65 days.

Height: 120-150 cm.

Yield: up to 125 gr

15 seeds. € 69.00 / £45.00 in stock.

strain: **marleys collie.**

At the Cannabis Cup in November '97 we were honored to meet Rita Marley. She and the atmosphere of the Cup made us decide to start to work on a strain that we would make in respect for Bob Marley, her late husband. Bob Marley not only spread the fine sound of reggae, but also the Rastafarian religious Cannabis spirit, around the globe and we can still feel his vibes today. The whole Sensi Seed research-kitchen was put to work exclusively with some selected Jamaican plants that were present in our mother rooms already for many years. Amazing results were found in an extraordinary hybrid we made with a fresh Indica, which relates to our Maple leaf Indica strain. A fresh, sweet, cerebral Jamaican high with a short internode length and heavy duty wide fingered Indica leaves. This plant will 'astonish' everyone.

Flowering: 60-65 days.

Height: 130-160 cm.

Yield: up to 120 gr.

15 seeds £75.00 - € 120.00 in stock

strain: **fruity juice.**

An Indica/Sativa cross of the highest order. Both sides of the Indica and Sativa spectrum are fully expressed in this variety. The sweet aroma comes from our most delicious Thai. This rarefied type was originally very difficult to work with, but we eventually found the ideal cross. Expect big yields from this one, with an exceptionally rich sweet aroma.

Flowering: 50-60 days.

Height: 140-180 cm.

Yield: up to 150 gr.
Flowering in greenhouse: end of October.
Yield in greenhouse: up to 750 gr.
15 seeds: £65.00 € 99.00 in stock.

strain: **california indica.**

A fine blend of sweet orange flavoured Californian strains, combined with a skunky hash flavoured Indica. A versatile plant which performs well under all conditions. The more heavily branched specimens tend to be the big yielders.
Flowering: 45-50 days.
Height: 100-130 cm.
Yield: up to 125 gr.
Flowering in greenhouse: mid-October.
Yield in greenhouse: up to 500 gr.
15 seeds : £ 27.50 - € 44.00 in stock .

strain: **silver pearl.**

This 3 way hybrid contains Early Pearl®, Skunk #1® and Northern Lights®. This hybrid is quicker and sweeter than the Shiva Skunk®. Excellent indoor and greenhouse results. Plants exhibit frosted resinous characteristics of the Northern Lights #5® and the sweetness and calyx-to-leaf ratio of Early Pearl / Skunk. One of our favourites and in 1994 the winner of the mixed Indica/Sativa category.
Flowering: 45-50 days.
Height: 100-125 cm.
Yield: up to 100 gr.
Finishing date in greenhouse: mid-October.
Yield in greenhouse: up to 500 gr.
15 seeds.£44.00 - € 69.00 in stock,

strain: **skunk # 1**

Originally an Indica-Sativa hybrid, Skunk #1® is now one of the most consistently performing true breeding strains in the world. Skunk #1® produces large buds with a very high calyx-to-leaf ratio. An excellent choice for the greenhouse.
Flowering: 45-50 days.
Height: 120-150 cm.
Yield: up to 100 gr.
Flowering in greenhouse: mid-October.
Yield in greenhouse: up to 500 gr.
15 seeds. £ 15.00 - € 20.00 in stock.

strain : **super skunk.**

This plant is especially developed for Skunk lovers. We have crossed our best Skunks to their Afghani ancestors. Brush against this plant and the room becomes immediately filled with a powerful Skunk aroma. Despite the smell a very pleasant high with a little more body to it than the skunk#1 One of the winners of the 1990 High Times Harvest Festival where it clearly defeated skunk#1
Flowering: 45-50 days.
Height: 120-150 cm.
Yield: up to 125 gr.
Finishing date in greenhouse: mid-October.
Yield in greenhouse: up to 500 gr.
15 seeds. £29.99- € 44.00 in stock.

strain : **sensi skunk.**

A strong plant with that typical Skunky taste and high. It has a high calyx-to-leaf ratio with large, full buds (donkey dicks). Its excellent yield makes this one an absolute must for the greenhouse grower. Flowering: 45-50 days.
Height: 120-150 cm.
Yield: up to 100 gr.
Finishing date in greenhouse: mid-October.
Yield in greenhouse: up to 500 gr.
15 seeds £18.00 - € 24.00 in stock.

strain : **shiva skunk.**

This cross between Skunk #1® and Northern Lights #5® is one of the most reliable varieties that we have ever produced. Excellent hybrid vigour and yield make this one a snap to grow. Works superbly indoors as well as in a greenhouse. Taste and high are similar to Skunk #1®, a rich sweet pungency, but with more resin and better yield. High calyx to leaf ratio, you can almost throw those scissors away as very little manicuring is required. An absolute must for beginners or experts.
Flowering: 45-55 days.
Height: 125 cm. Yield: up to 125 gr
Finishing date in greenhouse: end of October.
Yield in greenhouse: up to 500 gr.
15 seeds. £39.00/- € 66.00 in stock.

strain: **shiva shanti II**

The shiva shanti is a 3 way hybrid which consists mostly a Afghani strain that we call Garlic Bud because of its aroma characteristic. The Shiva Shanti II contains a smaller part of this Garlic Bud and is added with skunk and another Afghani. It is a less stable 4-way hybrid but quality wise very nice.
Flowering: 45-55 days.
Height: 120-150 cm.
Yield: up to 100 gr.
15 seeds £ 10.00- \$14.00 in stock,

strain: **skunk kush.**

A hybrid between our best Hindu Kush and the famous Skunk#1. It has the distinctive qualities of Skunk and the unique pungency of Kush together in a vigorous, even blend. Excellent greenhouse performance.
Flowering: 50-60 days
Height: 110-140 cm.
Yield: up to 100 gr. Flowering in the greenhouse:
end of October Yield in greenhouse: up to 500 gr.
15 seeds. £ 55.00 - \$ 82.00 in stock.

Strain: **indoor mix**

Breeder: sensi seeds
Origin: Netherlands
Indoor
Flowering: Varies
40 seeds: 35.00 in stock
INDOOR MIX Mainly Indica strains in assortment. This package contains forty seeds, the choice is yours. You will definitely find a good parent in this collection.

strain: **Gurerrillas Gusto**

breeder: sensi seeds.
origin: the netherlands.
outdoors
flowering: 50-70 days
15 seeds £ 20.00 \$ 32.00. in stock.
This outdoor strain tested in northern Spain was brought to us as a thank-you from one of our customers. After playing with the plants for some time we managed to produce this guerrilla grower's Indica. A good choice for the first time outdoor grower, as the harvest time allows us to have the crop in before the end of september. Nice sweet flowers build into good sized buds.
Finishing: mid September Height: 200-300 cm Yield: up to 250 gr.

Strain: **Ruderalis Skunk**

Breeder: Sensi Seeds
Origin: Europe
Outdoor
Flowering: 60-70 days
15 seeds: £ 30.00 \$45.00 in Stock
Ruderalis is an early-flowering variety that grows wild in parts of Eastern Europe and Russia. Early flowering characteristics of Ruderalis have been used to improve the outdoor performance of some of Sensi's best varieties. The advantage of a Ruderalis hybrid is that approx. 50% of the seedlings will begin flowering at the 5-7th internode, regardless of the photoperiod (finishing date Sept. 1). The other half of the seedlings will be much later (October).

The **Ruderalis** originates as a land race from Hungary and the Soviet Union. Flowering in the Ruderalis is not related to photoperiod like most other strains but to age. The Ruderalis Indica® hybrid is a very early and short but also potent hybrid. The heavy Indica makes it more susceptible to mould , If you are lucky with a good autumn then this will be no problem, so prepare to be suprised by this hardy, good quality Indica.
Finishing: September.
Height: 150-200 cm.
Yield: up to 250 gr.
15 seeds £12.00 \$16.00 in stock

Strain: **Durban**

Breeder: sensi seeds
Origin: Netherlands
Outdoor
Flowering: 60+ days
15 seeds: £35.00 \$55.00 in stock
A very early strain from South Africa. Durban is a compact Sativa with a sweet aroma and an up high. One of the most reliable early outdoor varieties, it will produce chunky, solid buds even during the worst season. If you haven't tried Durban, you are missing out on one of the easiest-to-grow, highest-quality early varieties in the world.

Strain: Early Pearl

Breeder: Sensi Seeds

Origin: Holland

Outdoor

Flowering: 60+ days

15 seeds: £ 35.00 in Stock

Early Pearl has always been one of the popular outdoor varieties. Wonderfully sweet and resinous, the plants have a mostly Sativa dominated growth pattern, with excellent potency.

Very mold resistant, even during the worst season.

Strain: Early Skunk

Breeder: Sensi Seeds

Origin: USA / Holland

Outdoor

Flowering: 60+ days

15 seeds: £ 25.00 In Stock

An excellent hybrid between Skunk #1 and Early Pearl.

Outdoor growers are usually dissatisfied with the finishing date of the regular Skunk strain. The Early Skunk finishes about 2 weeks earlier than Skunk #1 due to the influence of the Early Pearl. The influence of the latter is also noticeable in the smell and the high: sweet and smooth.

On top of that: the strain combines a good yield with mold resistance.

Strain: Early Girl

Breeder: Sensi Seeds

Origin: Holland

Outdoor

Flowering: 60+ days

15 seeds: £ 35.00 In Stock

This is a mostly Indica variety, one of the earliest in this collection. Very potent, medium yield, with a hashy taste and aroma. These compact plants will tend to grow to one main stem.

An ideal choice for your balcony!

Strain: Jamaican Pearl

Breeder: Sensi Seeds

Origin: Jamaica / Holland

Outdoor / Greenhouse

Flowering: 60-65 days

15 seeds: £ 35.00 \$56.00 in stock.

The Jamaican marleys collie certainly did a'stonish' everybody on the Dutch Highlife Cup of 1999 and was doubtless one of the reasons for winning the big super cup that year.

The Jamaican sweetness and characteristic Sativa high of the plant was greatly appreciated by the judges.

The same mother was used to realize this sweet outdoor hybrid between the Jamaican and our best Earl pearl. Flowering, sweetness and mould resistance are some of the qualities of this remarkable outdoor hybrid.

Finishing: October 1. Height: 200-300 cm. Yield: up to 400 gr.

KC Brains

Welcome to our fantastic KC Brains selection of seeds marked at unbeatable prices. All varieties will work indoor or outdoor, with special attention given to make sure of a substantial harvest under natural light. KC won the coveted WeedCup this year 2001 with his Haze Special.

Spontanica indica (in/outdoor)

This variety crossed between Secret Project Number 1 and a KC 33 is a success both indoor and outdoor. Expect great harvests. There's no plant like it.

Harvest under natural light: end of Sept. to mid-Oct. Height: 4.5 m Yield: 900 gr

Strain: Spontanica

Breeder: KC Brains

Origin: Holland

Indoor / Outdoor

Flowering: 50-70 days

10 seeds: £ 9.50 \$15 in stock.

Strain: KC33

Breeder: KC Brains

Origin: Thailand / Brazil / Holland

Indoor / Outdoor

Flowering: 40-65 days

10 seeds: £ 9.50 \$15 in stock

K.C. 33 sativa/indica (in/outdoor)

A Dutch strain, cultivated for years, crossed with Thai and Brazil male plants.

The K.C.33 is further developed for outdoor growing, but is also indoor a Number 1. The buds are compact and have a lemon fresh taste and produce double THC.

Flowering Period: 6-9 weeks Height: 100 cm Yield: 130 gr.

Harvest under natural light: end of Sept. Height: 2.5-3.75 m Yield: up to 900 gr.

Strain: KC36

Breeder: KC Brains

Origin: Holland

Indoor / Outdoor

Flowering: 40-60 days

10 seeds: £ 9.50 \$15 in stock

K.C. 36 sativa/indica (in/outdoor)

More production for every square meter! Parents of this success product are kept secret. K.C.36 is a short, stocky plant that produces giant buds and is very productive. A true THC bomb.

Harvest under natural light: end of Sept./ middle of Oct. Height: 1.75 m Yield: up to 900 gr.

Strain: MindBender

Breeder: KC Brains

Origin: Afghanistan / Holland

Indoor / Outdoor

Flowering: 40-65 days

10 seeds: £9.50/ \$15 in stock

MindBender (in/outdoor)

The parents of this plant are a double K.C.2 with a K.C.33 and an Afghani.

This plant which could turn red, has sweet buds and a great aroma.

Harvest under natural light: end of Sept./ middle of Oct. Height: 2-2.5 m Yield: up to 750 gr.

strain Afghani special

origin Afghanistan / Holland

Breeder: K.C Brains

Origin: Netherlands

Outdoor

Flowering: 42-63

10 seeds: £9.50 / \$15.00 in stock.

The ancestors of Afghani Special indica are an old Afghani strain, crossed over with a new double Afghani. This indica has a strong sweet scent, the leaves are wide, and dark green. A weed from the good old days. Harvest Outdoors: end Sept Height: 2.5-3 m. Yield: 700 gr.

Strain: Original Northern Lights

Breeder: KC Brains

Origin: USA / Holland

Indoor / Outdoor / GH

Flowering: 50-70 days

10 seeds: £9.50 \$14.50 in stock

Northern Light Special indica/sativa (in/outdoor)

The Strongest variety in the world with a nice sweet taste. This strain is short and compact making it a lucrative plant for indoor growing.

Harvest under natural light: mid Oct. Height: 2-2.5 m Yield: 750 gr.

Strain: Mango

Breeder: KC Brains

Origin: Holland

Indoor / Outdoor

Flowering: 42-63 days

10 seeds: £ 9.50/ \$15 in stock.

Mango indica (indoor/outdoor)

The parents are a K.C. SPECIAL SELECT with a K.C.33 and an Afghani-like plant. This plant has extremely big buds, a great production and an early harvest.

Harvest Outdoors: end of Sept./ middle of Oct. Height: 2.2-3 m Yield: up to 800 gr.

Strain: Leda Uno

Breeder: KC Brains

Origin: Brazil / Holland

Indoor / Outdoor

Flowering: 42-63 days

10 seeds: £ 9.50 \$15 in stock.

Leda Uno sativa/indica Highlife Cup Winner 1997-1998 (indoor/outdoor)

Leda Uno is a strain that can be used for indoor and outdoor growing. The parents of this strain are K.C.33 and a secret Brazilian female, after that it was crossed with a K.C. 606 early flowering male crossed with LEDA. A superior plant with lemon characteristics.

Harvest Outdoors: end of Sept. Height: 2.5-3.9 m Yield: up to 800 gr.

Strain: **White KC**

Breeder: KC Brains
Origin: Holland
Indoor / Outdoor / GH
Flowering: 42-77 days
10 seeds: £ 9.50 \$15 in stock.
White KC : indica - (in/outdoor)
The ancestors of this plant are a male K.C. 606 and Real White Lady (which has secret ancestors herself). This special indoor quality gives a very satisfactory harvest.
Outdoor: Flower: 8-10 weeks ~ Harvest: Sept./Oct. ~ Height: 1.25-2.25 m ~ Yield: up to 900 gr.

Strain: **T.N.R.**

Breeder: KC Brains
Origin: Thailand / Holland
Outdoor
Flowering: 56 days
10 seeds: £9.50 \$15 in stock.
T.N.R. sativa/indica (outdoor)
TNR is a special outdoor plant. The parents are a Thai lady that has been growing for 28 years in Holland, crossed over with a double KC 2. This plant is the giant of cannabis plants, with huge colas. The buds have a pure Thai aroma.
Harvest Outdoors: mid Oct. Height: 4 m Yield: up to 1 kilo.

Strain: **Haze Special**

Breeder: KC Brains
Origin: Holland
Indoor / Outdoor
Flowering: 42-63 days
10 seeds: £9.50 / \$15 in stock
Haze Special : Sativa - (in/outdoor)
This variety was meant for indoor cultivation, but outdoors it can give good results as well. The ancestors of this specimen are a Nevil's Haze, crossed with the K.C. 606. It is an early flowering plant with a special Haze taste.
Outdoors: ~ Flower: 8-11 weeks ~ Harvest: end of Sept. ~ Height: 225-250 ~ Yield: up to 800 gr

Strain: **Brazil XT**

Breeder: KC Brains
Origin: Brazil / Holland
Indoor / Outdoor / GH
Flowering: 63-84 days
10 seeds: £ 9.50. in stock.
Brazil x K.C. sativa (indoor) A plant well suited for the indoor cultivation with a great production. The Brazil x KC has compact buds and a strong aroma. The parents of this plant are MANGO VERMELHO from Paranaiba Brazil and KC 606.

Strain: **Cyber Crystal**

Breeder: KC Brains
Origin: Holland
Indoor / Outdoor / GH
Flowering: 56-77 days
10 seeds: £ 9.50 \$ 15 out of Stock
Indica
The Cyber Crystal is a plant mostly used for growing indoors. The buds of this plant are covered with a bed of THC snow. This strain is short and compact, the taste is fresh and sweet.
Indoors: 6-8 weeks flowering, 110-125cm height, up to 145 gram yield
Outdoors: 8-11 week flowering, 190-225cm height, up to 750 gram yield, harvest end of Sept. through mid Oct.

Strain: **Sweet Dreams**

Breeder: KC Brains
Origin: Holland
Indoor / Outdoor / GH
Flowering: 56-70 days
10 seeds: £ 9.50 \$15. in stock.
Indica/Sativa
A fine indoor variety which will give you a large yield. The plant has an imported Californian BB-skunk for a mother, crossed with a K.C. 606.
Indoors: 6-9 week flowering, 100cm height, up to 130 gram yield
Outdoors: 8-10 week flowering, 150-225cm height, up to 900 gram yield, harvest end of Sept.

Strain: **Swiss-xT**

Breeder: KC Brains
Origin: Holland

Indoor / Outdoor / GH

Flowering: 49-70 days
10 seeds: £ 9.50 \$15 In Stock
This variety has been developed for indoor growing. The parents of this plant are Mr. Swiss crossed with a double K.C. private project. The herb of this plant is very stoned. This sort is positively different from all the others.

Strain: **Crystal Paradise**

Breeder: KC Brains
Origin: Holland
Indoor / Outdoor / GH
Flowering: 42-67 days
10 seeds: £9.50 / \$15 in stock
This plant is descended from an imported Californian BB Skunk and a male Brazil. You will love its huge buds and the real Brazilian taste!
Specifications:
Type: Indica/Sativa
Indoor:
Flower: 6-9.5 weeks

Strain: **California Original**

Breeder: KC Brains
Origin: California / Holland
Indoor / Outdoor / GH
Flowering: 49-70 days
10 seeds: £ 9.50 \$15 In Stock
This California is a strain that is suitable for indoor and outdoor cultivation. It is descended from an original American California, crossed with Skunk. This variety has a great body.

Strain: **Crystal Limit** no pic yet

Breeder: KC Brains

Flowering: 56-70 days
10 seeds: £ 9.50 \$15 in Stock
A very successful variety for indoor growing. We have this specimen crossbred from Crystal with K.C. 606.
Specifications:
Type: Indica
indoor:
Flower: 6-10 weeks
Average Height: 95 cm
Yield: up to 110 gr.
Outdoor: Flower: 8-10 weeks

Strain: **Bahia Black Head** no pic yet

Breeder: KC Brains
Origin: Rio / Holland
Indoor / Outdoor / GH
Flowering: 56-70 days
10 seeds: £9.50 \$ 15 In Stock
all aboard the magic bus for a trip of a life time

Pradise Seeds

After 12 years of growing, testing and experimenting with many different varieties, Paradise Seeds was founded in 1994. About 17 years ago in Amsterdam, many coffeeshops started to sell imported hash from India Afghanistan or Morocco and weed from Thailand, Columbia, Mexico or Malawi. Most of this was of poor quality. But things were changing, new types were introduced from the U.S that were early crossbreeds of already higher quality. Since then we got involved in the early research for better quality strains. This took place in Amsterdam and at several outdoor locations in Holland. Our aim was to create better weed, with a sweet / spicy taste and stronger high, for our own use.

Durga Mata®

(the mother goddess). Genetics: This Indica is a cross of two Super Shiva& Specifics: Selected for the resin (THC) content. This gorgeous plant is mind-blowing, has a unique aroma and herbal spicy flavour, and is easy to grow. You should get to know her.
Flowering time: 50 - 55 days
Yield per m2: 400 - 450 grams
Yield per plant (outdoors): Approximately 500 grams
Harvest time (outdoors): Beginning of October (at 50° North latitude)
Growing tips: For outdoors, 6 hours a day of direct sun for the best result.
Price: £20.00 \$32.00 in stock.

Dutch Dragon

© Genetics: Mostly Sativa with a touch of Indica

Specifics: High yields and superb quality on long sticky colas makes this Dragon of Dutch descent a spectacular plant for indoor and outdoor growing. Due to the combination of her sweet taste and strong potency, she is the favourite to many regular smokers.

Flowering time: 60 - 65 days

Yield per m2 : 400 - 500 grams

Yield per plant (outdoors): 600 grams or more. She can become a tall plant with hundreds of buds. In the tops the flowers are growing densely and abundantly.

Harvest time (outdoors): Middle of October (at 50°)

Growing tips: Let her sunbathing all day long and she shows you why she is a dragon.

Price: £32.00 \$49.00 in stock.

Sensi Star ®

Genetics: One of the strongest Indica's that you will ever encounter.

Specifics: First price winner in the Highlife Cup 1999, bio indoors and first price winner in the Hightimes Cannabis Cup 1999! She produces powerful, compact buds, crowned with legendary amounts of resin. The dense, strong and characteristic aroma speaks for itself. She is one of worlds finest cannabis strains, and has successfully become the new standard in growing.

Flowering time: 55 - 60 days

Yield per m2 : 350 - 400 grams

Yield per plant (outdoors): 300 - 400 grams

Harvest time (outdoors): Beginning of October (at 50° N.L.)

Growing tips: Sensi Star doesn't like high levels of nutrients.

Price: £44.00 \$70 in stock,

AmsterdamFlame ®

Genetics: Mostly Indica

Specifics: This outstanding plant of excellent quality with her sparkling looks is selected for the lovers of cannabis best. Her wonderful high and soft subtle taste carries us like a summerbreeze, telling tales of mysteries. A plant worthy for the 'canna'seur.

Flowering time: 50 - 56 days

Yield per m2 : 400 - 450 grams

Yield per plant (outdoors): At least 500 grams.

Harvest time (outdoors): 3rd week of October (at 50° N.L.)

Growing tips: Keep her moist and at least 5 hours of direct sunlight per day.

Price: £32.00 \$49.00 in stock.

Nebula ® (starcloud)

Genetics: Slightly more Sativa (Haze), then Indica.

Specifics: Winner of the fourth place in the Hightimes Cannabis Cup 1999! Like the name suggests this plant is covered with twinkling shiny THC glands. Her fruity flavour and scent is a delight to even the most experienced smoker. She is bound to get you into the realm of space. Her buzz is typically transcendental and it is known she takes you far beyond your grasp. When you want to join the worlds of nebula, she is waiting to give you universal depth.

Flowering time: 56 - 62 days

Yield per m2 : 450 - 500 grams

Yield per plant (outdoors): 500 to 600 grams

Harvest time (outdoors): Middle of October (at 50° N.L.)

Growing tips: Nebula shows a strong reaction to increase of light, outdoors the more sun, the better!

Price: £38.00 \$59.00 in stock.

Belladonna ®

Genetics: A cross of Superskunk and a F1 hybrid potent male of 60% Sativa and 40% Indica origin.

Specifics: This mostly Skunk type is a real beauty, with very tight, compact orange buds. This beauty absorbs the light of the world in 60 days. During this blossoming process she develops to maturity. Her tempting signals are of the kind you want to experience, but be warned, her tripping high is of a hallucinogenic nature.

Flowering time: 55 - 60 days

Yield per m2 : 400 to 450 gram

Yield per plant (outdoors): 400 grams is feasible.

Harvest time (outdoors): Middle of October (at 50° N.L.)

Growing tips: She performs well in a sea of green technique.

Price: £22.00 \$35.00 in stock.

Sheherazade ®

Genetics: Her mother is a true Afghan queen, the father a strong handsome king, mostly Sativa. Specifics: Due to her family heritage, Sheherazade has got the depth from the valleys of Hindu Kush, as well as the soaring highs from the far East. Most of all, the traits of this sultry princess is her heavy musk-like sweetness. Now available for you to enjoy, a 'thousand and one night' long-lasting warm caress of breathtaking up high!

Flowering time: 56 - 60 days

Yield per m2 : 350 - 450 grams

Yield per plant (outdoors): 300 to 400 grams

Harvest time (outdoors): Middle of October (at 50° N.L.)

Growing tips: She performs like a queen when you give her devotion, space and enough light. Outdoors, 7 hours a day of direct sunlight is recommended.

Price: £35.00 \$56.00 in stock.

Sweet Purple®

Genetics: She is selected from Purple plants, crossed with an early, large yielding Dutch variety, and then, to sweeten her, crossed with a high quality plant with huge amounts of resin. Specifics: A very strong, rather tall plant with hue's of purple and pink, that tastes like strawberries. She grows good indoors, and is also perfectly adapted to colder regions such as Holland for outdoor growing. Her early flowering means you can harvest fat colas before the "bad" weather starts.

Flowering time: 56 - 60 days

Yield per m2 : 350 - 400 grams

Yield per plant (outdoors): 500 grams (half a kilo) is feasible.

Harvest time (outdoors): End of September, beginning of October (at 50° N.L.)

Growing tips: When grown indoors, induce flowering early, after 1 week to 10 days vegetative state.

Price: £12.00 \$20.00 in stock.

Swiss Bliss ®

A wonderful mostly Sativa variety, abundant in growth, that flavours a mix of tropical fruits. The branching pattern makes her ideal for pruning. This means you can put less plants per square meter as you would have in a sea of green setup, and still be able to harvest a terrific yield of very nice sticky buds on several branches, within approximately 9 weeks of flowering. When smoked you feel ecstatic and joyful, really high!!

Suitable environments: Indoors. Outdoors in subtropical and temperate climates from 15° - 47° Northern and Southern latitude.

Yield per m2 (indoors): minimum 400 grams

Yield per plant (outdoors): up to 1000 grams

Harvest time (outdoors): end October early November (Northern latitude)

Growing tips: This one needs a bit more space.

10 seeds: £ 40.00 \$60.00 € 60,- in stock

Magic Bud ®

Magic Bud is the finest blend of Indica and Sativa, which makes her into an easy to grow bud bomb. The floral and aromatic taste makes her smooth to smoke with a body relaxing effect, combined with a pleasant Sativa cerebral high. This plant of fine stature produces beautiful nugs in a relatively short time, approximately 50 days indoors. Many commercial growers would like to have this plant in their gardens, not only for its high yield and short flowering time, but also for her quality which is beyond many commercial strains. Suitable environments: Indoors. Outdoors from 15° - 50° Northern and Southern latitude.

Yield per m2 (indoors): 500 grams

Yield per plant (outdoors): at least 500 grams

Harvest time (outdoors): Middle of October (Northern latitude)

10 seeds: £20.00 € 30,- \$30.00 in stock.

Sugar Babe ®

This variety is a true beauty. Powerful as an Indica plant can be with compact full buds powdered white as snow alike the Alp mountaintops where she was developed. Inherited from her partly Afghani background, she is well adapted to the outdoor. The smoke is very distinctive and fresh, a bit lemon like with some metal taste to it. Her energetic and uplifting effect makes you feel like doing fun things, such as skiing. Good yields indoors and outdoors, approximately 400 grams on compact sugar dipped, 30 cm long buds. Suitable environments: Indoors. Outdoors from 15° - 50° Northern and Southern latitude.

Flowering time of this ideal plant is only 54 to 60 days.

Yield per m2 (indoors): 400 - 450 grams

Yield per plant (outdoors): 400 grams and more

Harvest time (outdoors): Early October (Northern latitude)

Retail price: £30.00 € 40,- \$40.00 in stock,

Nirvana

all Nirvana standard now only £9.99 / \$15 for 10 seeds

The history of Nirvana goes way back to the end of the 1980's. At that time Nirvana's founder was working at Amsterdam's most famous grow-shop, the legendary "Positronics", and it was the knowledge and inspiration that he received there that moved him to think about starting his own seed company. Years were spent traveling, seeking out and collecting seeds from the finest strains. And more years went in experimentation, growing, cross breeding and

developing the new strains from among which Nirvana selected the best to become their range of high quality hybrid seeds. After applying and expanding his experience in a number of Amsterdam's best known grow-shops it came time to offer the expertise he had gained, and the high quality products he had developed, to the world. The result of this initiative was the foundation of Nirvana in 1995. Originally a seed specialist, Nirvana is now an innovative business concept. It has developed into a shop with a unique and original range of self-developed hemp products that extend the uses of this extraordinary plant further than ever before. Nirvana means: a state of happiness.

new 100 % feminized **Pure Power Plant** This is a strong Sativa variety developed in the late 90's from South African strains. PPP produces loads of crystal and has tremendous growth potential both indoors and out. Generally better results are obtained with outdoor cultivation in good conditions, if you're a less experienced indoor grower. PPP is a high THC plant that's why it's called, Power Plant, in addition to its powerful growth. This variety gives you a soaring high. Specs:

Flowering: 56 days

Height: 130-150cm / 260cm

this new variety is a combination of Afghan, skunk 1 and northern light. very sticky buds with the density of Afghan, smell as sweet as skunk 1, smoke like northern light. strong crystallised white buds. indica /sativa mix.

strain: **misty.**

flowering: 7-8 weeks.

10 seeds: £9.99 \$15 in stock.

loaded with crystals. looks like white widow but produces denser buds, has big flowers. short and bushy plant.

strain: **northern light.**

flowering: 8-9 weeks

10 seeds: £9.99 \$15 in stock

a short bushy plant, strong abd sweet loaded with T.H.C.

big buds with few leaves, great for commercial growers .Indica.

strain: **skunk#1**

flowering: 8 weeks.

10 seeds: £9.99 \$ 15 in stock .

SK #1 is used in base mixes of all sorts of newly named plants. It has a great consistancy of generating a good strong punch, with a great skunky taste. The sk #1 is definately for the skunk lover in you! The sk #1 will flower in 8 weeks. It has a very strong genetic strain that can take a lot abuse.

strain:**top 44.**

flowering: 7-8 weeks

10 seeds: £9.99 / \$15 in stock.

This is our second commercial plant, but unlike the big bud the flowers have a sweeter taste. This is our fastest flowering plant becoming ready in only 6 weeks. Strong and easy to handle also makes a great plant for first timers.

strain: **masterkush.**

flowering: 8-9 weeks

10 seeds: £9.99 \$15 in stock.

This plant is a 2 time winner of cannabis cup. Master kush is a strong plant for almost all climates. Only the real cool countries out will have a second guess. This plant has maintained a high quality and a good quantity with a great taste. Flower within 8 weeks makes an excellent choice. This plant is a tetraploide kind, witch means that it shows sometimes female flowers in the splitting of the internodes which is unique.

Strain: **Citral**

flowering :56 days

Citral produces a nice mellow herbal taste, very good yield and strong hard buds. Indoor for best results, grow to a height of around 100 to 120 cm before changing the photo period. Citral produces a fresh aroma and interesting cerebral experience for the growing enthusiast. Some of the genetics for this strain come from the Hindu Kush mountain region near a village district named Chitral.

Flowering: ~56 days Height: 90-130cm indoor / ~160+ cm outdoor Yield: 135g indoor / 370g or more outdoor Indica/Sativa: 80/20 Harvest: If outdoor 2nd half of Oct.

10 seeds £9.99 \$15.00 in stock.

strain: **Northern light x haze.**

flowering: 8-9 weeks.

10 seeds: £9.99 \$15 in stock.

The northern lights mixed with lambs breath is an excellent mix. Big plant with big leaves. Light green. It will grow to 15 feet tall outdoors. Will produce 4-6 ounces per plant. An extremely sweet smell. A unique and high quality stone. Flowering: 9-10 weeks Yield: up to 100 grams

strain: **Northern light x shiva**

flowering: 8 weeks.

10 seeds: £ 9.99 \$15 in stock.

Strong sweet weed loaded with thc.

Big buds and low on leaves.

Stronger taste than the original northern lights, a short bushy plant that grows well on bio soil.

Stop feeding fertilizer 2 weeks before harvest.

A northern light shiva cross.

mostly indica.

strain: **Bubble gum.**

flowering: 10 weeks.

10 seeds: £9.99 / \$15. in stock.

This heavy ganja is brought from America and makes extremaly large flowers witch produce an enormously amount of thc crystals. very special flavor. A moderate yielding plant. 40% indica

strain: **Hindu kush.**

flowering: 8 weeks.

10 seeds: £9.99 \$15 in stock.

The original genes from this strain come from the Hindu Kush valley.

A lushy mountainious area in central asia.

Te seeds where brought in the 80'ies and crossbreded with several varieties to create this lovely indian type.

The plant smells lovely and the leaves are big and dark green. A kind that you can smoke all day.

Indica sativa mix

strain: **white shark.**

flowering: 8-9 weeks.

10 seeds: £ 9.99 \$15 out of stock.

The original white shark is crossed with our most potend male: skunk nr 1. The buds are big and sticky with a nice sativa high. Not realy high yielding but a very strong smoke tiny skinny leaves. Mosly sativa

Strain: **White widow**

Breeder: Nirvana Seeds Standard

Origin: Holland

Indoor / Outdoor / GH

Flowering: 56-63 days

10 seeds: £ 9.99 \$15 in stock.

one of our loveliest plants (power plant) does not yield as well as we would like but this plant one can ski down. Flowering in 8 weeks with an outstanding taste to be savoured as your eyelashes meet. Also a good medical use plant.

Strain: **Pure Power Plant**

Breeder: Nirvana Seeds Standard

Origin: South Africa

Indoor / Outdoor / GH

Flowering: 56 days

10 seeds: £ 9.99 \$15 in stock.

Power Plant (mostly Sativa) was developed in 1997 from new South African genetics. This strain has been inbred only, never hybridized. Very rich in THC.

It is a strain with an enormous grow potential. Indoor as well as in a greenhouse the plants have an enormous yield. Indoors flowering starts already one week after turning back the light cycle to 12 hours. Outdoor flowering starts late, but the plants ripen very fast. This variety is very uniform. Strong up high, very soft smoke.

Strain: **Nirvana Special**

Breeder: Nirvana Seeds Standard

Origin: Holland

Indoor / Outdoor / GH

Flowering: 56 days

10 seeds : £9.99 \$15 in stock.

Jack Herrer Hybrid Hybrid. A sweet pungent smell, with a nice Sativa High.

Indica Sativa mix.

Strain: **Durban Poison**

Breeder: Nirvana Seeds Standard

Origin: USA / Holland

Indoor / Outdoor / GH

Flowering: 50-60 days

10 seeds: £ 9.99 \$15 in stock.

Durban Poison seeds from South Africa were grown out to select a particularly vigorous male parent plant, which was then crossed with the best Skunk#1 clones to be found in Holland producing a manageable plant for indoor cultivation which finishes in 8 to 9 weeks

Mostly Sativa this Durban cross should give the discerning toker a seriously 'up' buzz.

Strain: **White Rhino**

Breeder: Nirvana Seeds Standard

Origin: Holland

Indoor / Outdoor / GH

Flowering: 55-65 days

10 seeds: £9.99 \$15 In Stock

version of a decidedly good Widow cross.

Strain: **Northern Lights#5 x BigBud**

Breeder: Nirvana Seeds Standard

Origin: USA / Holland

Indoor / Outdoor / GH

Flowering: 49-55 days

10 seeds: £ 9.99 \$15 in stock,

This is one of the oldest commercial flowers crossed with a great Northern Lights. The purpose of the big bud is yield. Big strong flowers with a lot of product. The big bud will flower in 8 weeks with a great skunky taste in quantity.

Strain: **K2**

Breeder: Nirvana Seeds Standard

Origin: Holland

Indoor / Outdoor / GH

Flowering: 56 days

10 seeds: £ 9.99 \$15 in stock.

Good commercial plant with very high THC content. Looks like a snow storm hit the plant when finished well. 75% Indica, 25% Sativa.

Strain: **(blue mystic) Blueberry**

Breeder: Nirvana

Seeds Standard

Origin: USA / Holland

Indoor / Outdoor / GH

Flowering: 49-56 days

10 seeds: £ 9.99 / \$15 in stock.

The fast and fruity indica from North America. Amazing blueberry smell when finished properly!

Strain: **Afghani**

Breeder: Nirvana Seeds Standard

Origin: Afghanistan / NL

Indoor / Outdoor / GH

Flowering: 45-55 days

10 seeds: £9.99 / \$15 in stock.

Afghan is another popular plant staying low and bushy. With big leaves for soaking up the sun. Afghan is a fat flower producer. Good yields and very strong tuff plant and can take most climates.

Strain: **Jack Herer**

Breeder: Nirvana Seeds Standard

Origin: Holland

Indoor / Outdoor / GH

Flowering: 56-63 days

10 seeds: £ 9.99 \$15 in stock.

The mystical 3-way Dutch plant that has revolutionized the business.

Strain: **Chrystal**

Breeder: Nirvana Seeds Standard

Origin: Holland

Indoor / Greenhouse

Flowering: 56 days

10 seeds: £9.99 \$15 In Stock

Chrystal is a cross between a popular production clone called Crystal which has been doing the rounds on the Dutch commercial Cannabis growing scene. The cross is a male Skunk #1 selected by Mau and kept as a stud father for many of his breeding projects.

All flower times begin when the hours of sunlight reach 13 hours and begin to fall below

Most plants are capable of surviving 1 of 2 frosts? If in a worse case scenario Pay attention to molds with thick morning dues or prolonged damp days in later flowering

Early Special

This plant is an miracle, as soon as the seeds starts to grow it is producing flowers, nice sweet cristals are gathering around the buds, all through the year.

Exspecialli very handy for the people who live in the northern countries like above Denmark, Poland and in northern Canada and Alaska.

A familie from early bud.

A skunk mix. (50% sativa)

Yield: 1 kilo per square meter.

Height: 1.5 till 3 meters. Flowering all through the year.

Harvest: ready before winter

10 seeds . £9.99 \$15 in stock

New Purple Power

This plant is one of the oldest strains grown outdoors, since the sixties.

The name says it allready, the buds can be deep purple till almost black.

Easy to grow, good for cold climates and mostly mold resistant.

Mostly sativa.

Height: 1-3 meters

Tiny thin leaves, sweet taste. Flowering time 6-8 weeks.

Harvest late Sept

10 seeds £9.99 \$15 in stock.

Swiss Miss

Imported: Switzerland Pure breeding Sativa/Indica: looks pure Sativa

Appearance: looks like Mexican Sativa

Type high/strength: lightweight smoke Height: 2m Yield: med Harvest date (Netherlands natural photoperiod): end Sept 12hr day exposure harvest (# of weeks): 8-10 indoor / greenhouse / outdoor Early flowering (good breeding stock for earliness). flower: 8-9 weeks

harvest end of september

10 seeds £9.99 \$15 in stock.

Mixed sativa.

Outdoors,an originall sativa,with tall females and sweet glittering buds,to get you high,and stay active,for a happy high feeling.easy to grow!

10 seeds £9.99 \$15 in stock.

Early Girl

"This is a mostly Indica variety, one of the earliest in our outdoor collection.

Very potent, medium yield, with a hashy taste and aroma. These compact plants will tend to grow to one main stem. An ideal choice for your balcony.

flower: 7-9 weeks

harvest end september/begin october

10 seeds £9.99 \$15 in stock

Hollands Hoop

"Developed: inbred 10 plus years Stabilised hybrid Sativa/Indica: California

Sativa crossed with Indica Appearance: big long clusters, green to goldish at harvest Smell/taste: sweet smell flower: 7-8 weeks

harvest: september

10 seeds £9.99 \$15 in stock

Hawaii x Skunk

"Mostly Indica (F1 hybrid) with exceptionally broad leaves. Lots of resin on leaves as well as flowers, with a musky hash like aroma. Strong physical high.

Yields are above average. Short rounded plants. Flower: 9-12 weeks

Harvest: end of October

10 seeds £9.99 \$15 in stock.

CannaBiogen

Twenty years of travelling the world in search of the grail, from the mountains of Jamaica and Colombia in the New World to Pakistan, India and Thailand.

Meticulous selections from more than one hundred varieties and careful progeny testings have culminated in magnificent examples that bring us the gamut of the sublime.The majority of the varieties we carry are from original landrace stock, cultivated in their respective lands for generations and brought back by ourselves and our friends who have travelled to those far away places in search of cannabis seeds with the purpose of safeguarding them for posterity.

strain :Carbie

A first rate backcross (Jamaica x Jamaica/NL5/Haze) between our best female from the Blue Mountains in Jamaica and a champion NL/Haze bring us a great yielding sativa that can be grown indoors. Yield and quality are complemented by its resistancy to plagues, especially those brought about by humid climates.

Time seems to stop as the senses sharpen, this sativa hybrid is a gem sativa lovers love to own.

Flower: 65/70 days. Seventy days for maximun yield. Shortening the light period incrementally from 12 to 8 hours in the last 2 weeks is best to augment resin production and to avoid typical sativa reflowering.

Outdoors: End of Sept/Early October

Yield: 250-375 grams/m2.

PRICE 12 SEEDS: £30.00 \$44.00 soon come.

strain : sugarloaf.

An F1 Hibrid of extraordinary vigor, large tricomés and dense, resinous buds.

The mother, a beautiful indica whose seeds were brought back from Pakistan was crossed with our favorite Capricho male (Capricho, a backcrossed Manali x Colombian). This indica / sativa combination with its high proportion of calix to leaves ratio and a potent psychoactive high is also a large producer whose branches need to be tied to avoid breakage.

A wonderful, delightful treat that can be grown indoors and outdoors.

Flower: 55/65 days

Outdoors: End of Sept/Early October.

Yield: 300-450 grams/m2.

PRICE 12 SEEDS: £35.00 \$48.00 soon come.

strain: Leshaze.

Is a complex hybrid of excellent stock, the mother, a stable, early flowering plant from Lesotho, grown there in mountains 2000 mts high. The father, a Skunk/Haze with dutch roots brings us a strong hybrid which grows well both indoors and outdoors

A potent sativa high dominates this hybrid. It's sweet and spicy with an intense perfume with green and purple buds, The buds and even the stems glisten with resin tops a spectacular yield.

Flower: 60-70 days

Outdoor: Mid October

Yield: 250-400 grams/m2

PRICE 12 SEEDS: £25.00 \$ 32.00 soon come.

strain : Sand Storm

A great plant to make hashish from two great hashish lines, both 100% indica:

The mother, an indica from the Chitral Kush region coupled with an

exceptional male clone from Arabene, Morocco

It gives very dense nuggets covered with resin, these plants need to be ventilated well when the buds start putting weight and density. This sweet scented plant is potent, productive and easy to grow.

Flower: 55/65 days

Outdoor: Octubre.

Yield: 250-400 gramos/m2

PRICE 12 SEEDS: £28.00 \$ 40.00 soon come.

strain : Destroyer

A great plant to make hashish from two great hashish lines, both 100% indica:

The mother, an indica from the Chitral Kush region coupled with an

exceptional male clone from Arabene, Morocco

It gives very dense nuggets covered with resin, these plants need to be ventilated well when the buds start putting weight and density. This sweet scented plant is potent, productive and easy to grow.

Flower: 55/65 days

Outdoor: oct.

Yield: 250-400 gramos/m2

PRICE 12 SEEDS: £75.00 \$105.00 soon come.

strain :Taskenti.

A 100% Indica originated in Uzbekistan. Its name comes from one of the best hash in the world, according to experts; a very powerful and resinous strain, of enormous yield, mainly outdoors. It has a refined and subtle hashish perfume, a shade between mint and lemon, very intense.

Original latitude and height cultivation conditions have made its acclimatization very simple, similar to Southern Spain Mountains. Nevertheless a meticulous selection and improvement work has been done to fix genetic dominance for the most important aspects, allowing simultaneously diversifying the zones of growing indoors (also hydroponics) and outdoors.

Indoors plants mature in 7-9 weeks, needing a good ventilation and dry atmosphere, mainly in flowering.

Vegetative period: Minimum 30 days for high performance.

Flowering: 55/65 days

Outdoors: Middle October

Yield: 350-400 gr/m2

PRICE 12 SEEDS: £65.00 \$88.00 soon come .

strain: De Lux Mix.

This unique breeders mix offers many possibilities for experimentation and hybridization between the different genotypes in the landrace varieties. The F1's

within the mix are from CannaBiogen's F1 collection, the result of hybridizations from their meticulously selected parental lines. Expert and novice grower will delight in the variety and fresh genetics in the Deluxe Mix. Chart your own undiscovered country while you improve your skills. Can you tell them apart? Try it!

The Deluxe Mix Collection includes

Blueberry

Jamaica x Blueberry

Brasil/Colombia x India

Priarie Boy

ONLY BY BREEDING VAST NUMBERS OF STRAINS AND HYBRIDS DO WE FIND THE HIGHEST POTENTIAL THAT CANNABIS HAS TO OFFER HELLO AND WELCOME TO PRAIRIE BOYS WORLD I STRIVE TO OFFER THE BEST NEW WORLD STABILITY TO OLD WORLD GENETICS THAT I CAN FIND DOING THIS I HAVE PRODUCED MANY MANY STABLE STRAINS AND A TON OF HYBRIDS THAT I LOVE TO SHARE WITH OTHERS .

Strain: **Wakeford .**

indoor/ outdoor.

10 seeds: £35.00 \$56.00 in stock.

Wakeford is a recent hybrid bred for its name sake the plants were recently grown out in the valley and have a killer couchlock high this strain was produced to make a very strong medicine for very sick man with mean tolerance at that we succeeded we used 0g13b sk#1 x g13 x ubc chemo for this one she yeilds great in sea of green with huge ressin covered buds that are hard and heavy as rocks it takes a good 9 wks but is well worth the wait if you want couch lock with comercial potential this is the plant smooth hash flavour it did great out side this year finishing oct5 SK#1 X G13 X CHEMO @42 DAYS : thanks to leisure puffer at cw for the pic/co PB

strain: **Northern dream (indoor K.G>thunderfuck hybrid)**

indoor :

10 seeds: £35.00 \$56.00 in stock.

we used a NL#5 male to pollinate our best KG thunderfuck mother this is the first generation back cross to a exceptional NL#5 cutting that has been around E. vancouver for some time now huge rock solid main cola dominant plants with a skunky lemon scent very commercial 7-8wk flwr .

Soma Seeds

Soma produce some of the finest bud you will encounter on planet earth. and also produce quality feminized seeds.

strain: **somango-soma#5**

flowering: 9-10 weeks.

10 regular seeds: £50.00 in stock.

10 feminized seeds: £75.00 out of stock sorry,

breeding/ super skunk-big skunk hawiiain-jack herer.

Somango blends the multiple hybrid Jack Herer with Big Skunk Korean to form the fruitiest of all Soma's strains. Previously known by Soma #5, this complex cross was renamed for its tropical mango aroma and flavor.

Somango is optimal as a multiple branch plant, since its genetics encourage long side branches and a height on the taller side. A sea of green method can still be undertaken, but branching and height will need to be controlled. Soma prefers to grow on soil indoors with fully organic nutrients, but other media will also give satisfactory results. As it matures, the leaves shade to purple and the buds become covered in a carpet of crystals that makes fine finger hash. While a moderate yielder, Somango's bud possesses sublime qualities.

strain: **citralah.**

flowering: 9 weeks.

10 regular seeds: £50.00 in stock.

10 feminized seeds: £75.00 in stock.

breeding/ citral-afghani-hawiiain.

Citralah a great strain for making hash from. Half it's genetics come from Chitral Pakistan where it is solely used for hash production, and Afghani Hawaiian for the other half. This plant has a strong citrus like smell and taste. It has a very good yield and takes 9 to 10 weeks to finish. Great finger hash when manicuring and great water hash as well . Nice daytime weed.

strain: **Haze heaven.**

flowering:10-11 weeks.

10 regular seeds: £50.00 in stock.

10 feminized seeds: £75.00 in stock.

breeding/ northern lights 5- haze-Afghani-hawiiain.

Haze Heaven is just that, a haze that doesn't take as long to finish as most others, a great yielding plant with giant buds, and that great haze flavor with that hint of Afghanistan in the back of your mind. As with all strains if you don't give your plants just the right amount of quality energy that they need on all levels they will get stunted and take longer to finish. This one again is not for inexperienced growers, experience in patience with cannabis harvest's is definitely needed. This haze doesn't put you in a daze, it takes you to your center.

strain: **reclinng Buddha.**

flowering: 9 weeks.

10 regular seeds: £50.00 out of stock..

10 feminized seeds: £75.00 out of stock.

breeding/super skunk-big skunk Korean- Holland's hope.

Reclining Buddha is a 3-way hybrid that combines the genetics of Holland's Hope with Super Skunkand Big Skunk Korean. Circulating in the Netherlands during the 1980s, Holland's Hope is a mold resistant strain with a very close nodal structure whose name can be attributed to her success in outdoor grows, even in Holland's wettest season. Reclining Buddha has held this characteristic, and combined it with the enjoyable smell and yields of its other two parents. Previously named Soma Skunk V, the new, enlightened name came out of a philosophical session prompted under her influence. A fairly short plant, Reclining Buddha must remain in vegetative phase for a considerable amount of time to become a big plant. She also will not make a lot of side branches, and the ones that do tend to be smaller, a combination that predisposes this variety to do well with minimal effort in a sea of green set-up. Reclining Buddha's buds are tight and narrow, allowing moisture to escape easier than short thicker bud formations. Try this one outdoors even in humid locations for a covert plant that delivers high-quality yield. Buddha buds form many dark auburn hairs early. When everything around it still has white hairs, Reclining Buddha's hairs have turned a color that tempts you to harvest, but exercise patience. Reclining Buddha needs a full 9 weeks to reach maturity, and the high just gets better with the wait. This medicinal quality cannabis has the taste of a sweet cherry candy and an uplifting creative high that is lucid and mentally stimulating. 3rd place, 1999 High Times Cannabis Cup, best indica.

strain: **white willow.**

flowering: 10-11 weeks.

10 regular seeds: £50.00 in stock.

10 feminized seeds: £75.00 out of stock.

breeding/white widow-afghani hawiiain.

White Willow named after my daughter who is quite a strong human being, is also quite a strong plant. A cross of White Widow and Afghani-Hawaiian this plant has massive buds and large THC crystals. The color of the leaves is a dark almost bluish green. The taste is sweet like some special desert. The smell is Afghani-sweet. It takes a while to finish so again you need experience for this one. Quite a good yield. Strong high.

strain: **somativa.**

flowering:10 weeks

10 regular seeds: £50.00 in stock. breeding/ super skunk- big skunk korean-

jack herer . Somativa a mix of genetics from all over the globe. In 1994 the cannabis strain of Sensi-seeds seed bank " Jack Herer" won first prize those seeds were grown mixed first with big skunk Korean, then with a special super skunk. The result is a thin leafed wiry big yielding plant that takes 10 weeks to flower. The buds you get are some of the sweetest tasting flowers you have ever tried. The high is a very uplifting buzz that is good for playing music, meditation, prayer, or any kind of friendly contact between human beings. You need to stake these plants. .

strain:**Rock bud -soma -a+.**

flowering: 8-9 weeks.

10 seeds regular. £50.00 out of stock.

breeding/super skunk-big skunk korean-afghani-afghani hawiiain.

Soma A+ may become the pet of the class. Short to medium in height, this mostly indica strain displays the bushy structure and dense buds of its Afghani heritage. She is a good sea of green plant since height and branching are easy to manage. With an extended vegetation period, Soma A+ can be coaxed into a larger plant, and will perform well while still being short enough to stay inconspicuous in an outdoor garden.

A fast bloomer, Soma A+ finishes in about 8 weeks and wards off spider mites, often being the last plant still holding these pests at bay. The yield makes this a bud for a connoisseur rather than a commercial grower, but the ease of growth and the quality of the final product will make this a coveted weed to share with your inner circle.

strain: **kilimanjaro-soma#1+-**

flowering:10-11 weeks.

10 regular seeds: £50.00 in stock.

breeding/super skunk-big skunk korean-big bud-afghani-hawaiian.

Kilimanjaro formerly known as Soma 1+ lives up to it's name. This bud is quite large with many light red hairs and a real fruity smell. The high is very up and creative, a nice daytime weed. The harvest time is a little long but the yield is worth the wait. A very nice combination of Afghanistan, S.E. Asian, and Sativa, it is not for you first time growers. This strain is better for more experienced grower's, very medicinal!

strain: **lavender-soma#10-**

flowering: 8-9 weeks.

10 regular seeds: £50.00 in stock.

breeding/super skunk-big skunk korean-afghani hawaiian.

Soma #10 brings together a world of weed. Strains with histories that traverse Afghanistan, Hawaii, Korea, the U.S, and Europe are all melded together in this 3-way cross. An exotic looking strain, Soma #10 develops the darkest purple coloration you can imagine. The color is intense, with the leaves turning nearly to black at the ends, they are so deeply saturated with color. The extra dense buds give off a sensually spicy smell akin to Afghani hash. The high calyx to leaf ratio and the legginess of this plant make for simplified manicuring. While not as tall as the Haze strains, Soma #10 can shoot to tall heights when allowed an extended vegetation period before being placed into the flowering phase. If grown in a sea of green, Soma recommends a shortening the veg cycle in order to control the height. This strain will also do well as a multi-branched plant. Outdoors, this variety can thrive in a most temperate zones, although arid climates known for their rich agricultural promise are of course optimal. Soma #10 has a flavor that is similar to Afghani hash, producing a captivating high that circulates through every chakra. A terrific evening or rainy day smoke, Soma #10 will leave you feeling relaxed and mellow, possibly to the point of sleep.

strain: **Ametheyst bud.**

flowering: 9-10 weeks

10 regular seeds: £50.00 in stock.

breeding/ lavender-afghani -hawaiian.

Amethyst Bud is a mix of Lavender Bud and Afghani Hawaiian so the dark purple color from the purple Kush part of it's genetics comes through. This bud is on the smaller side but more of them and they are quite dense with many THC crystals visible with the naked eye. The smell is strong and pungent with a good high for relaxing with a good friend. Leaves a delicious taste in your mouth. When it looks like it's ready wait a week.

strain: **afghan delight.**

flowering: 9-10 weeks.

10 regular seeds: £50.00 /\$75.00 in stock.

breeding/afghani skunk-afghani hawaiian.

Afghan Delight is the strain with the most Afghanistan genetics of any of my strains. A mix of Afghan skunk and Afghan Hawaiian, this strain has very wide leaves and a dark green color. It smells even when it's vegging and you touch the leaves. The buds have a white green color when they are done, and a very Afghani Hash smell. Nice weed for smoking in the evening. Leaves a good taste in your mouth. Don't pick it too early!

strain:**buddhas sister.**

flowering: 9-10 weeks.

10 regular seeds: £50.00/\$75.00 in stock.

breeding/reclining buddah- afghani hawaiian.

Previously called Soma Skunk V+, this variety was renamed Buddha's sister to suit her tendencies and advance her appeal to Amsterdam coffeeshops. What's in a name? Directly after this deliciously good weed acquired a more intriguing name, she regularly sold out at the coffeeshops, and remains one of the best selling weeds available at De Dampkring.

This sibling of Siddhartha is tall and lanky. In the cross with Afghani Hawaiian, she has a considerably increased yield, but less sweet taste than her other half, the Reclining Buddha. Buddha's sister has a flavor like a tart cherry candy, and the scent is similarly tart rather than sweet. The buds have a slippery, silky feel, which means an abundance of greasy resin to make into fantastic hash. She even gives a lot of finger hash that you won't want to wash away after grooming plants. As with all of Soma's varieties, Buddha's sister is medicinal quality cannabis, therapeutic for many conditions. The high is powerful, creative and cerebral in its effects.

strain: **somanna-soma-wide.**

flowering: 8-9 weeks

10 regular seeds: £50.00/\$75.00 in stock.

breeding/super skunk-big skunk korean-c.chinensis-afghani hawaiian.

Somanna formerly Soma Wide+ is the only strain with cannabis Chinensis a type that grows in China, it has a very interesting characteristic of sometimes making an extra budlet on the stem of the large fan leaf. It grows quite wide in

that the side branches really become a large part of the plant. You have to give it room. It has quite a nice color, limey green with very orange hairs. It looks a lot like the old orange bud, but tastes much better. Mellow sativa high.

strain: **big kahuna.**

flowering: 8 weeks.

10 regular seeds: £50.00/\$75.00 in stock.

breeding/big bud-skunk#1-afghani-hawaiian.

Big Kahuna is a good plant for first time grower's, it doesn't branch out too much and has a very large top bud. The smell is very skunky and needs very good smell control in your growing and drying rooms. The flowering time is 8 to 9 weeks. It needs good ventilation as the top bud is very dense and can get mold on the inside, with proper ventilation it does just fine.Strong skunky aroma and flavor. Mellow high.

strain: **free tibet.**

flowering: 9 weeks.

10 regular seeds: £50.00/\$75.00 in stock.

breeding/tibetan-afghani-hawaiian.

Free Tibet the first and only strain using this name beware of imitations as far as this strain goes there are imitations out there. The authentic Free Tibet is a mix of Nepalese hash plant and Afghani Hawaiian, and has a very pungent odor. The taste is exotic and a high that's a favorite with many of my close friends. It makes strong side branches so it needs some room to grow. The main stalk is quite sturdy. Good for outside in cold climates.

strain: **kahuna soma#9**

flowering: 9-10 weeks.

10 seeds regular: £50.00/\$75.00 in stock.

breeding/super skunk-bigskunk korean-jack herer- afghani.

One of Soma's favorite strains, Kahuna is a 4-way cross that brings together a wide set of influences for a complex high. Soma recently renamed his Soma #9 strain Kahuna, which is a Hawaiian title for a religious or spiritual leader that literally means "Keeper of the Secret." The Kahuna variety has both tropical influences in its parentage, and spiritually attuning effects when used. A medium-sized plant, Kahuna produces few side branches and a top bud that will impress you with its length and density. Due to the big, tight buds, conditions must be tended carefully for this variety. For indoor gardens, attention to humidity levels is key for mature buds that are mold-free. While recommended for indoors where variables can be controlled, outdoor growing is possible in reliably dry climates, although an unseasonably rainy season could ruin the promising look of these thick buds with insidious mold. When Kahuna's proper conditions are met, the yield potential is fantastic, offering a harvest of up to 500 g per square meter in a standard sea of green. This variety has shaken a little pepper into an otherwise sweet-tasting puff. . very sweet smelling variety with a powerful cerebral high that invites creativity. This is great daytime pot, complementary to most introspective activities, and comfortable for socializing with colleagues and friends. Kahuna offers medicinally valuable properties for many conditions without interfering with quality and clarity of one's thought.

Mr Nice

Mr nice seed bank is owned by shantibaba.and fronted by international wrongan Howard marks, they have produced almost all of the winning varieties of cannabis since 1990, including legendary varieties such as Northern lights 5 ,silver haze , white widow and white rhino and white shark.

strain: **medicine man.**

flowering: 56-63 days.

yeild: 450-600grams.

15 seeds: £59.00 in stock.

A proven medical marvel for those in need of high levels of the most active ingredient, THC. Almost toxic at times, so handle with care: don't abuse the medicine-man. It has won many awards since its introduction as the white rhino in the late 90's. An incredible strong genetic heritage stemming from a Brazilian sativa/South Indian hybrid combined with a prodigious-yield Afghani. It is a member of the White Widow family and a proven champion for the and terminally ill patients. Those who prefer indoors can expect an incredibly resinous and compact Indica appearance from this plant. It has an expected flowering time of 56 to 60 days. Outdoor growers in the northern hemisphere can expect harvest around October and those in the southern hemisphere by May. The yield should be at least 600 grams a square meter.

strain: **spice.**

flowering:48-60 days

yield:500-600grams

15:seeds:£45.00 in stock.

She is bubbling with rapid growth and well endowed ear as her name suggests. Her pedigree has blossomed out of the union of a Hawaiian indica x Hawaiian sativa and is a stable hybrid that no curry eater can live without. Don't knock our Nice Spice until you have grown her to maturity. She is definitely better than the one that left; we have created our own Nice Spice. Expect yields of around 480-600 g/m2 for indoor growers, with tight nuggets. Expect an indoors harvest between 7-9 weeks, indoors. Outdoors in the northern hemisphere harvest by October, and in the southern hemisphere by May. Be warned of the kick that Spice gives, not to mention the mouth watering cascade of exotic fruit taste. Enjoy growing together.

strain: **black widow.**

flowering:56-65 days.

yield:350-450grams.

15 seeds:£50.00 in stock.

A most infamous strain that since 1994 has won a number of awards, including the High Times Cannabis Cup in 1995, and has acquired acclaim from most corners of the globe - rightly so. It has a pedigree of parentage that combines a Brazilian Sativa with a South Indian hybrid. Basically, it is White Widow changing its colors like its company.

It will seem evident to the cultivator that this species needs slightly more attention to achieve the expected results. Do not forget the necessary love and attention in order to get the best results.

For indoor methods the grower will find that 10 weeks of flowering will be necessary to realize the immense resin production. Expected yield of 350 to 450 grams per square meter. In the northern hemisphere expect harvest around September/October, having planted as late as June. However, there is a chance that rain could reduce the expected yield.

Be Warned. This is the original true blue champion that began a whole new wave of breeds before it consumed its partners.

strain: **critical mass.**

yield: 650-700grams

flowering:45-55 days

15 seeds: £49.00 in stock.

A reworked excellent version of an old breed once known as Big Bud.

This is an absolute must for the cultivator who demands a high yield with an equally high stone. It is the heaviest plant currently in production for commercial farmers and outdoor crops and resembles the male genital protrusion of a giant donkey. Due to its heavy flower construction it can be susceptible to mold if the growing area is too humid. So be warned, and harvest on time. It has a genetic pedigree originating from a particularly heavy Afghani combined with the original Skunk#1.

An expected yield indoors would be 650-750 grams per square meter within 50-55 days, possibly more for the experienced cultivators. If cultivated outdoors, expect harvest in September for the northern hemisphere and by March in the southern hemisphere.

strain: **shark-shock.**

yield: 500-600 grams.

flowering: 50-56 days.

15 seeds: £45.00 in stock.

This is definitely the most successful breed of the late 90's (since its inauguration by Shantibaba as Great White Shark).

It has equally famous genetic heritage and has been awarded a multitude of cannabis cups under the names of the Peacemaker and the Great White Shark. It's parents are well known as White Widow (a Brazilian sativa combined with a south Indian hybrid) and Skunk#1. It is a pleasure to watch this plant grow into a densely compacted white skunk with extreme aromas and equally pleasurable to use. Strictly tested, but only on humans. We never use our products on animals.

Indoors, expect a 50-56 day flowering cycle and a yield of between 500-600 grams per square meter. Outdoors in the northern hemisphere, harvest in September to early October; and in the southern hemisphere, March to early April.

strain: **devil.**

yield: 550-600 grams

flowering: 48-60 days.

15 seeds: £42.00 in stock.

The definitive plant for those interested in outdoors/greenhouses. Due to its Afghani pedigree, taste, reddish aura, and magical mind journey tendencies, this plant provides quite a wonderful therapy. No one can be unhappy possessing this nice devil (and a righteous one at that). It has a genetic make-up of Afghan x Afghan/Skunk and shows initial slow growth until it has an established root ball. Then watch out, brothers and sisters! Expect to finish this plant in the northern hemisphere by October and in the Southern hemisphere by June/July. Indoors, 8-10 weeks with a yield expected of at least 550-600 grams per square meter. Definitely recommended for first time growers.

Strain: **Shit**

Breeder: Mr Nice

Origin: Holland

Indoor / Outdoor / GH

Flowering: 45 days

15 seeds: £ 20.00 / \$ 30 in stock.

An absolute classic and original Skunk/Afghani that has won many awards. It is a sure-bet for first time cultivators of interior, exterior, or glasshouse grown plants. The yield will be extremely substantial, with expectations between 550-650 grams per square metre.

The finishing time will be within 45 days of the flowering's first appearance on the plant. Expect harvest in late September to early October in the northern hemisphere and in the southern hemisphere by the end of April. A proven true breed since the 80's.

Strain: **Super Silver Haze**

Breeder: Mr Nice

Origin: Holland

Indoor / Outdoor / GH

Flowering: 56-70 days

15 seeds: £ 75 / \$ 100 in stock

A champion of champions since winning its hat-trick at the 1997, 1998, and 1999 High Times Cannabis Cups and comprising the most commercial strains known to the uncivilized world: Skunk, NL and Haze. Such achievements confer an undoubtedly regal pedigree.

It's an excellent breed for those who wish to possess the stash of stashes and leaves one gasping for reality. Expect harvest in 8-10 weeks with top yields (450-550g/m2) and heavy resin production. In the northern hemisphere completion date would be expected by late October; in the southern hemisphere, late May/June.

This complex hybrid is in the cutting edge in practical Haze hybrids, designed to astound the grower and consumer alike. Recommendation is unnecessary as most people can't see the Haze for their daze.

Strain: **Dreamtime**

Breeder: Mr Nice

Origin: Holland

Indoor / Outdoor / GH

Flowering: Varies

15 seeds: £ 20.00 - \$ 30 out of stock.

A selection of mixed indoor varieties of excellent parentage including Skunk, NL, Haze, and Afghan. Highly recommended for the first time grower or those that search for an economic solution to their problems. Guaranteed to turn the consumer on and personally recommended.

It has an 8-10 weeks flowering cycle, and yields are expected to be between 380-550 g/m2.

Strain: **La Nina**

Breeder: Mr Nice

Origin: Holland

Indoor / Outdoor / GH

Flowering: 56-70 days

15 seeds: £ 55.00- \$ 80 in stock.

A family member that had previously been kept private for The Family.

Strongly related to El Niño (Bio Cup 98 HTCC), La Niña manifests characteristics that are predictable, contrary to her name's implication. She has a genetic composition of Haze x White Widow, making her an inevitable candidate for a hot love story with her consumer. Expect her to bare her voluptuous resinous fruits within 8-10 weeks on a flowering stage.

Indoors, an estimated yield per square meter would be 450-550 grams. In the northern hemisphere, expect harvest by September; in the southern hemisphere, by April.

Strain: **Early Queen**

Breeder: Mr Nice

Origin: Holland

Indoor / Outdoor / GH

Flowering: 42-56 days

15 seeds: £ 30.00- \$ 40 in stock

Since the beginning of the 1990's, this three way hybrid has earned acclaim in the cultivators' world. It is quick to finish both indoors and outdoors and is, therefore, perfect for cold climate countries in the northern hemisphere.

The flowering cycle is expected to be between 6-8 weeks with indoor cultivation. Expect harvest time in the northern hemisphere as early as September and in the southern hemisphere by March. The yields will surprise the victims. The genetic composition of this breed stems from early Californian blends mixed with a touch of Mexican.

So, Signor Cultivator, enjoy your Early Queen and her fruits like a happy farmer should Real early, real juicy, and the real thing.

Strain: **WalkAbout**

Breeder: Mr Nice

Origin: Holland

Indoor / Outdoor / GH

Flowering: 55-65 days

15 seeds: £ 20.00- \$ 30 in stock.

A selection of mixed outdoor varieties with all genetics of supreme sources including Thai, Haze, India, early Skunks, Mexicans, and New Guinea. Highly recommended for those in need of walkabout.

A guaranteed recipe for outdoors or greenhouse cultivators, with its range of early finishes and a few late flowers.

Spice of Life Seeds

Spice of Life features unique Canadian and Dutch genetics, using only the highest quality breeding stock to bring you new flavors. All plants are now selected by Breeder Steve in Switzerland greenhouses for the largest parental selection anywhere! "After a bit of a hiatus, we're back and better than ever. We hear you missed us and wanted us back and so it is that we're returning to the old menu to strut our stuff and be whisked around the world on jets to exotic locales for a life of luxuriating in marvelous gardens. If you have a marvelous garden all of the sisters and cousins would love to come for a visit and stay as long as you'll keep us. You might decide you need more room; you'll love us all so much.

We hope you'll respect our preferred dietary requirements. We are accustomed to dining on the finest of biological excrement and simply adore the tingle of beneficial microbial action on our roots. Please, no harsh chemicals. We don't like synthetics! Breeder Steve will be releasing many varieties from the 'Spice of Life' catalogue later this year, so keep checking back!

We hope you'll respect our preferred dietary requirements. We are accustomed to dining on the finest of biological excrement and simply adore the tingle of beneficial microbial action on our roots. Please, no harsh chemicals. We don't like synthetics!

Breeder Steve will be releasing many varieties from the 'Spice of Life' catalogue later this year, so keep checking back!

Sweet Tooth #3 (fourth generation, 3rd Backcross to Sweet Pink Grapefruit mother.

This Sweet Tooth is the result of one backcross line wherein the goal in searching the father was an emphasis on the taxonomy and aroma of the original SPG mother. The Grapefruit is a true favorite among growers and consumers. It is possibly the most cultivated strain among commercial producers in Vancouver. The preceding BX2 seed that the father was selected from produced quite homogenous grapefruit-like plants, this generation should be suitable for crossing. The plant is high yielding for a Sweet Tooth yet retains the exceptional candied sweetness this strain is famous for. A beautiful plant with a beautiful taste and a positive vibration. A smiling high is guaranteed from these heady flowers. The plants are quite hardy and easy to grow, and prefer a drier finishing time, as the buds become fat enough for mold to be of concern. These chunky monkeys often require staking but in a windy location they should be stout enough to hold their own (significant) weight. Does well as a small bush but will become a large bush given adequate growth parameters. Whether this is an exceptional commercial strain or head stash is for you to decide. I truly hope you enjoy these plants as much as I do.

Indoors Flowering: 8wks

Outdoors: mid.Oct

Indoors Yield: Way Above Average (easily 500gms per meter)

Outdoors: Above Average

12 seeds £45.00 \$72.00 in stock.

spice of life adventure mix

lot of Sweet Tooth... Shishkeberry, Blue Domino, Big Treat, California Dream, Tropical Treat, Jack Herer, Ortega, Strawberry, M39 - all hit with a Sweet Tooth. These male plants were put around the perimeter of the last Sweet Tooth garden specifically for a lovely Adventure Mix. If you are just looking for some new mothers and aren't as concerned with pedigree, you will find a wide variety of very original plants in here.

strain: adventure mix

indoor/outdoor/gh

flowering: varies

12 seeds: £15.00 \$24.00 out of stock.

strain: **L.U.I. (legends ultimate indica).**

flowering: 8-9 weeks.

10 seeds: £39.00 in stock.

The "LegendsUltimate Indica" is a combination of our two most favorite indica's. This F1 hybrid was mothered by a previously unreleased Ortega plant from California. The Ortega's heavy indica traits shone through with its' tight buds and extremely stoney finish. The father, a second backcross Sweet Tooth from Spice of Life Seeds, adds the sweet and pungent flavor Breeder Steve strains are know for.

Strain: **Blockhead**

Breeder: Spice of Life

Origin: Pacific North/West

Indoor / Outdoor / GH

Flowering: 8 weeks

12 seeds: £ 35.00 In Stock

This is a new addition to Spice of Life Seeds. The mother was selected from seed developed by one crazy yanqui. The exact origins are somewhat of a mystery. It is strong pot. The feminized mothers were fairly homogenous, although from several of the line, and another more extreme sativa. This mother had indica-like buds on a sativa sized plant. Crossed with the same SwT father as Sweet Tooth #3, I am sure you find it distinctly different from anything on the market. It should probably not even be on the market as it encourages psychosis. Not good for unstable folks! It has been known to magnify neurotic behaviour.

Yield Indoors: good

Yield Outdoors: very good

Flowering Period Indoors: 56 days

Finishing Time Outdoors: mid Oct. 50*N

Strain: **Sweet Tooth #4** (no image yet)

Breeder: Spice of Life

Origin: Pacific North/West

Indoor / Outdoor / GH

Flowering: 8 weeks

12 seeds: £ 45 / \$ 70 In Stock

strain: **rockaberry**

breeder: spice of life

origin:

indoor/outdoor/ greenhouse.

flowering : 8 weeks

12 seeds £40.00 / \$60 in stock.

The Rockaberry is the result of pollinating a Moonshine Rocket Fuel(Blue VelvetXBlue Moonshine) with Shishkaberry pollen. The plants are strikingly odd, and most will have mauve colouring throughout the light greenbuds.

Many will exhibit golfball-like buds that are some of the most dense nuggets you will find. On average they will be done by 8 weeks flowering. They can get a bit too tall for my liking, and I found I was training most of them sideways at the top. You will find the bud very unusual, with a very Blue family taste. breeder steve.

strain : **blue satellite #2** no pic yet

flowering :

12 seeds £ 79.00 \$120.00 in stock. (limited supply)

{A rare a exquisite blueberry sativa mother has been seeded with our easiest to grow, best yielding sweet tooth male. The same pollen used to create the sweet tooth#3 has now bounced back into orbit with an ancestral cross, as the sweet tooth #1 obtained 50% of its genetics from a resinous Blueberry male. An unforgettable plant , they wil not be mistaken for anything else. All plants have purple stocks.A good yielder fininshing early oct after 8 weeks flowering.}

Homegrown fantasies

Homegrown Fantaseeds is a sister company to the very successful Amsterdam Coffeeshop, Homegrown Fantasy. The Fantaseeds seed company broke onto the scene in a big way, winning the 1997 Cannabis Cup for overall seedbank quality. Low prices and massively good weed make this collection one of the most popular in recent years.

strain: **original misty**.

flowering: 56-63 days

10 seeds: £35.00 out of stock. sorry , soon come.

this is one sexy lady, a truly beautiful plant , bustling with thc glands a top producer in terms of yeild gourment taste and a sweet aroma.

strain: **silver blue**.

flowering: 56-63 days.

10 seeds: £40.00 in stock.

from the (Silver Pearl+ and (Blueberry+ families. The Silver Blue is the (Big Bud+ of the white weed varieties. This variety is highly resinous and has a high thc content with top quality taste. The calyxThe plant grows strong and sturdy with broad- shaped leaves, which makes it easy to manage and maintain in all climates. It is a must for the novice gardener. The (Silver Blue+ has a high bud to stem ratio: with it's strong aromatic smell and full- bodied buds, also makes it a cash croppers paradise. Coming from the stock of HGF's (Haze+ man, the (Silver Blue+ is a pleasure to grow and a pleasure to blow. es are medium to large.

strain: **flashback**.

flowering: 56-63 days

10 seeds: £25.00 in stock.

Flash Back is the variety for inside, outside and greenhouse. This variety will grow under any circumstances and produce a nice bud. It is an early flowering Sativa/Indica hybrid. Gives beautiful tall fat tops. When grown outside it shows a little purple in the end. It has a real sweet aroma and an uplifting Sativa High.

strain: **fourway.**

flowering: 56- 60 days.

10 seeds: £20.00 out of stock, sorry soon come.

25% Indica, 25% Ruderalis, 25% Northern Lights and 25% Skunk #1 equals Fourway #1. Looks a lot like an Indica, strong and easy to grow. A very high yield, good buds and minimum of leaves. Soft taste and an excellent high.

strain: **eclipse.**

flowering: 56-70 days

10 seeds: £35.00 in stock.

A new variety, mostly Indica with a sweet taste, our version of the bubble gum/ bubble berry famous by American clients. This is one for the young and the young at heart. One of the fruitiest tastes there is.

strain: **homegrown fantasy.**

flowering: 56-70 days.

10 seeds. £35.00 in stock.

This variety retains the sugar coating of all the white strains, but has even larger trichomes bulging out from stems and buds. This was achieved by crossing an outstanding afghan (12 years in development) and a white widow. This has improved the plants hardiness and flavor, and made the buds denser still. If you appreciate the hard-hitting stone of the "white" strains, but are tired of the sour old taste it sometimes gives, well, this is the one for you.

strain: **skunk red hair.**

flowering: 56-63 days

10 seeds: £15.00 out of stock , sorry, soon come.

The variety which made indoor growing possible since 1985. It's still the growers favorite. Under the right conditions it's even tastier outdoors.

strain: **Afghani.**

flowering: 56-63 days.

10 seeds: £25.00 in stock.

This is one the most potent varieties, well known with growers, and never a disappointment. 100% Indica with very wide leaves. Our Afghan was 12 years in development. It has the vigor and yield typical of Afghani's, but a much improved taste. The trichomes contain so much THC they look like they are going to burst. Perfect for cross breeding to add strength, vitality and yield to your old "played out" strains. Heavy THC buds. Some plants turn purple during harvest time. Strong high and a good yield. A must for Indica fans and a real heavy hitter.

strain: **N/L shiva.**

flowering: 56-63 days

10 seeds: £25.00 out of stock, sorry soon come.

This cross has many fans. It was the starting point for many of the special "White Strains". Retained that super Shiva taste, but the stone is something else. Mix of two of the best kinds, very dense buds. A very pretty lady if you had to have a photo of just one plant. This is it.

Strain: **Purple Power**

Breeder: Homegrown Fantaseeds

Origin: Netherlands

Indoor / Outdoor / GH

Flowering: 56 days

10 seeds: £15.00. \$24.00

out of stock. sorry.

Purple colored buds, wonderful magical fragrance, lots of THC, fast growing and early flowering make this an ideal outdoor choice, lots of purple buds with a nice mellow high to remind you of summertime. Grows very quickly, not suitable for indoors. This a very unique plant, grows like a typical indica with sativa influence, that's noticeable in the high when smoking it.

Strain: **Early Girl**

Breeder: Homegrown Fantaseeds

Origin: Netherlands

Indoor / Outdoor / GH

Flowering: 56 days

10 seeds: £ 18.00 out of Stock sorry, soon come.

Indica X Sativa mix: This plant will start to flower, usually within 8 weeks without the need for less hours of sunlight, so you're sure of a harvest, not much smell but some tight buds and a nice layer of THC make this plant a good choice for the discreet outdoor gardener.

Strain: **Mango**

Breeder: Homegrown Fantaseeds

Origin: Netherlands

Indoor / Outdoor / GH

Flowering: 56 days

10 seeds: £ 25.00 out of Stock

Mango is a 100% Indica crossbreed with a H#1 KC 33 and our Afghani. Real favorite amongst growers and smokers, beautiful plant to see and a smooth taste. Your fully aware that you have a real potent plant in your garden.

Try this outside for something that will really impress your friends. One of the best tasting Outdoor strains.

Strain: **First Lady**

Breeder: Homegrown Fantaseeds

Origin: Netherlands

Indoor / Outdoor / GH

Flowering: 56 days

10 seeds: £ 40.00 In Stock

This is the queen mother of the White Widow strain. The most appreciated and rewarded sort of the last few years in Holland. And as the name suggest, totally white with crystals. Always places high in the various cannabis competitions, and took 2nd prize (Hydro) High Life '98.

Very soft taste and a cool high.

Strain: **K2**

Breeder: Homegrown Fantaseeds

Origin: Netherlands

Indoor / Outdoor / GH

Flowering: 56 days

10 seeds: £ 25.00 In Stock

It's the little sister of the White Widow Bio, short plant ideal for people with little space. Very soft taste and decent high. Grown very much by local growers, a perfect compromise between quality and yield.

Strongly favored by Hydro growers. Very good yield.

Strain: **B-52**

Breeder: Homegrown Fantaseeds

Origin: Holland

Indoor / Outdoor / GH

Flowering: 49 days

10 seeds: £ 25.00 In Stock

This plant is a truly superior Skunk breed that grows some very heavy buds. Ideal for the commercial Skunk grower. As with other Skunk varieties, this one also has a superior and a sweet taste that make you detect the sativa influence. A super fast Skunk strain.

Strain: **Blue Haze**

Breeder: Homegrown Fantaseeds

Origin: USA / Holland

Indoor / Outdoor / GH

Flowering: 56-70 days

10 seeds: £ 45.00 In Stock

A unique cross between the homegrown haze and the blueberry, with a classy sweet musky taste with a strong stone. The growing characteristics are of the body of the indica, with the length of the sativa. An easy plant with a strong touch of Sativa.

Strain: **Millennium**

Breeder: Homegrown Fantaseeds

Origin: Holland

Indoor / Outdoor / GH

Flowering: 56-70 days

10 seeds: £ 35.00 In Stock

Millenium is the plant for the future. It is mostly an Indica. This plant can yield upto 600 grams per square meter. Grown close packed, this sea of green style will produce huge colas. You will need to support these plants due to their height and weight.

Strain: **Armageddon-47**

Breeder: Homegrown Fantaseeds

Origin: Holland

Indoor / Outdoor / GH

Flowering: 47 days

10 seeds: £ 45.00 In Stock

A mostly sativa strain. Our version of the famous "one hit wonder". Won several prizes in the 90's. Super Sativa high. Grows and flowers real fast for a sativa.

Strain: **Outdoor Mix**

Breeder: Homegrown Fantaseeds

Origin: Netherlands
Outdoor
Flowering: varies days
10 seeds: £ 30.00 In Stock

Strain: **Indoor Mix**
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Indoor
Flowering: varies days
10 seeds: £ 30.00 In Stock

Strain: **Caramella**
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Outdoor
Flowering: 56-63 days
10 seeds: £ 30.00 In Stock
This variety is a stable homogeneous, with big fat tops, long cola's with a lovely fresh caramel smell. This variety has been bred for the last 15 years with lots of success. This Indica/Sativa hybrid is crossed back and selected on taste and a high calyx/leaf ratio. Good yield, uplifting high, easy to grow and a lot of crystals, a beautiful plant.

Strain: **Jan Herer**
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Indoor
Flowering: 56-70 days
10 seeds: £ 45.00 In Stock
a Jack Herer hybrid. If you are a Jack Herer fan but found it a nightmare to grow, this is the plant for you. Much faster to grow and more predictable than Jack Herer. A fresh taste and a strong sativa influenced high. Has attracted a lot of interest amongst growers everywhere.

Strain: **Purple High**
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Outdoor
Flowering: 42-56 days
10 seeds: £ 20.00 out of Stock sorry.
Original Dutch outdoor variety, strong plant. Almost all plants turn a rich purple, sticky with T.H.C. Very easy to grow, early finish. 100% Indica, unusually fragrant smell. Tastes a little rough, but delivers a clear and sharp high.

Strain: **Skunk Special**
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Indoor
Flowering: 56-70 days
10 seeds: £ 30.00 In Stock
Related to the Skunk #1, it has the qualities of big heavy buds and lots of crystals. As the name suggests, something special amongst the skunk family. Very heavy stoned and the heaviest yield of all our skunk varieties.

Strain: **Shiva Afghani**
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Indoor
Flowering: 56 days
10 seeds: £ 30.00 In Stock
Another old Ed Special, his last gift to the Dutch seed trade before leaving Europe. Fast flowering, above average yield and all branches bud up to their full length. Good to grow just about anywhere but especially good outside in a warmer climate. It's extremely resinous buds create a unique spacey high.

Strain: **Kamamist**
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Indoor
Flowering: 56-70 days
10 seeds: £ 45.00 in stock
Kamamist Pure sativa, really strong high. In appearance similar to South-East Asian strains of the 1970's. The buds are a bit fluffy, so not so much weight. Commercially, it's not too interesting, but for your personal stash, it's one to have. So energizing that you can't sleep.

Strain: **Super Crystal**
Breeder: Homegrown Fantaseeds

Origin: Netherlands
Indoor
Flowering: 56 days
10 seeds: £ 45.00 In Stock

This is the strain that took everyone by surprise at the High Times Cup. Undisputed favorite amongst the judges, won us best seed company and a lot of friends. One of the celebrity judges said "A real golden nugget, hit me across the back of the head like a 2" by 4" I did not think I could get higher until I smoked Super Crystal, A super shiva mix with 75 % Indica with a strong oriental taste, With this low and compact plant you'll grow a real beauty.

Flying Dutchman seeds

the Flying dutchman brought over pure true breeding strains like Early California, Thai, Mexican and Silver Haze from Columbia, Afghan and South African seeds. Most importantly he brought over a few crosses that he had already made himself, including the very first Skunk Number One which is a Columbian, Mexican, Afghan cross. This earned him his present nickname THE SKUNK MAN.

Thai-tanic.

Developed : Thailand, USA, Holland, F-1 hybrid Sativa / Indica : Mostly Sativa
Appearance : Very resinous, thick heavy buds
Smell / taste : Typical Thai, with Skunk undertones
High / strength : Extremely strong, a clear up high
Yield per m2 : High
Sowing time : May / June Outdoor
harvest : November (Holland)
Flowering period : 9 - 12 weeks (12 hrs indoor)
Don't panic, this one will only take you up and up and up! A very compact Sativa variety, classic chocolate Thai smell and taste. The Skunk father dominates only in fast maturation, high yields and general vigour. A heavy crystal producer that is extremely potent with a trippy cerebral high.
11 seeds: £26.00 \$39.00 in stock.

fumar con dios.

11 seeds: £30.00 \$48.00 in stock.
Developed : Holland, F-1 hybrid
Sativa / Indica : 75 % / 25 %
Appearance : Sativa looking, very resinous
Smell / taste : Superior, fruity sweet taste
High / strength : Clear spiritual energetic
high Yield per m2 :
Good Sowing time : May / June
Outdoor harvest : October / November (Holland)
Flowering period : 9 - 12 weeks (12 hrs indoor)
Enjoy the Fruit of the Gods.

Pure Haze smell, pure Haze taste, pure Haze effect. The Skunk father keeps the height down and the maturation time to within 12 weeks. He also pumps up the yields to a respectable 300 grammes per square metre. This powerful Haze comes highly recommended for impatient Haze lovers. Only one generation removed from the original Haze of the 1970's.

strain : the pure.

Developed : USA,
stabilized hybrid Sativa / Indica : 75 % / 25 %
Appearance : Big flowers, limegreen to gold
Smell / taste : Sweet smell, full, satisfying taste
High / strength : Very strong, cerebral/physical
Yield per m2 : Very high Sowing time : May / June
Outdoor harvest : October (Holland)
Flowering period : 8 weeks (12 hrs indoor)

The one and only Original Skunk # 1.
Large yields can be expected from this variety, The Pure is extremely homogenous, and is perfectly adapted for all growing methods. Whether she is being grown indoors, in a greenhouse or in the great outdoors, the Pure is a strain that expresses the best of both it's Sativa and Indica heritage.
11 seeds. £18.95 \$29.00 in stock

strain: Early durban

Developed : S. Africa, California, Holland
F-1 hybrid Sativa / Indica : Mostly Sativa
Appearance : Lots of branches with sticky buds
Smell / taste : Leaning towards the Durban side
High / strength : Very strong, mentally and physically
Yield per m2 : Very high Sowing time : May / June
Outdoor harvest : Early October (Holland)
Flowering period : 8 weeks (12 hrs indoor) Early, easy and powerful. Feels happy growing outdoors.

As comfortable outdoors in most temperate regions as indoors, Early Durban is a tough plant that will reward the grower with high yields quickly, mostly Sativa in nature with a cerebral/physical effect and an Aniseed taste.

11 seeds £21.95 \$34.00 out of stock

strain: **kerala krush.**

Developed : USA / Holland

Sativa / Indica : Mostly Sativa

Appearance : Slender sativa type

Smell / taste : Sweet and fruity

High / strength : Very potent, cerebral

Yield per m2 : High

Sowing time : May / June Outdoor harvest : October / November (Holland)

Flowering period : 9- 11 weeks (12 hrs indoor)

Extremely vigorous Sativa variety!

An extremely vigorous Sativa crossing of the highest calibre, a medium tall plant with good yields for a Sativa. The Skunk father boosts fast maturation without interfering with the high or taste of the pure South Indian Sativa. Very smooth complex taste and smell with a clear cerebral high.

11 seeds £25.00 \$39.00 in stock.

starin: **afghanica.**

Developed : Afghanistan, Holland,

F-1 hybrid Sativa / Indica : Mostly Indica

Appearance : Very resinous, heavy buds

Smell / taste : Sweet taste. Thick and greasy

High / strength : Very strong, physical

Yield per m2 : High

Sowing time : May / June Outdoor harvest : October (Holland)

Flowering period : 8 weeks (12 hrs indoor)

Protecting the real Afghani values!

Dominant Afghan taste, form and quality of high coupled with dominant Skunk yield, vigour and general potency gives you the cream of the crops. Heavy compact buds that drip with resin in the heat. Heavy stone. Good for many medical applications.

11 seeds £29.00 \$46.00 in stock.

strain : **pineapples punch.**

Developed: USA, Holland

Sativa / Indica: Mostly Sativa

Appearance: Sativa type with thick heavy buds

Smell / taste: Truly superior, sweet taste

High / strength: Tropical salad bar very strong

Yield per m2: high

Sowing time: May / June Outdoor harvest: End of October (Holland)

Flowering period: 9 - 10 weeks (12 hrs indoor)

A taste of the tropics!

A specially selected Real Mc Coy crossed back to a Skunk#1 daddy, to offer the chance for wider genetic diversity for those who love the Hawaiian. A little more chunky and Skunky than the Real McCoy, with a distinctive pineapple taste and smell. Very cerebral in effect. A great strain to cross with the Real McCoy and/or other extreme Sativa types.

11 seeds £35.00 \$55.00 in stock.

strain: **pot of gold.**

Developed: Hawaii, USA, Holland,

F-1 hybrid Sativa / Indica: Primarily Indica

Appearance: Extremely resinous flowers and leaves

Sativa Appearance: Mix

Smell / taste: Mix High /

strength: Mix

Yield per m2: High

Sowing time: May / June Outdoor harvest: October / November (Holland)

Flowering period: 9 - 12 weeks (12 hrs indoor)

Many different varieties of mothers, a good gene mix for selections.

A delicious selection from the Flying Dutchmen. All the quality you have come to expect from us but in a mixed bag. Selected from our top breeding line seeds, big juicy Sativa's. Different mothers bred with the same father. For those who love variety this is the spice.

12 seeds: Mixed Sativa Diva's (12 seeds consisting of 4 Thai Tanic, 4 Swazi Safari and 4 Fuma Con Dios)

£22.00 \$35.00 out of stock.

strain: **Hayleys comet.**

Developed: USA / Holland

Sativa / Indica: 60% / 40%

Appearance: Heavy buds, orange to gold at harvest

Smell / taste: Sweet citrus smell and taste

High / strength: Strong physical / cerebral

Yield per m2: High Sowing time: May / June

Outdoor harvest: Late august / late September

(Holland) Flowering period: 7 - 8 weeks (12 hrs indoor) Fast heavy and easy to grow!

An early Early Californian variety crossed with the Skunk #1, very homogenous fast maturing variety, suitably to grow outdoors. In many temperate regions. A large percentage of the plants trigger into flower at the slightest reduction of photoperiod. Haley's Comet has a sweet citrus taste and smell with a well balanced physical/cerebral high. High yielding and easy to grow.

11 seeds £33.00 \$50 out of stock. .

strain: **The Real Mc Coy.**

Developed: Hawaii, USA, Holland,

F-1 hybrid Sativa / Indica: 60 % / 40 %

Appearance: Looks like Sativa

Smell / taste: Fruity, spicy

High / strength: Strong, cerebral

Yield per m2: Good

Sowing time: May / June Outdoor harvest: November (Holland)

Flowering period: 10 - 12 weeks (12 hrs indoor)

A perfect balance of sweet, spicy... it can't be described by words alone!

A very special cross for the true connoisseur, a wonderfully sweet and spicy bouquet and taste that can only be described as smoking a tropical salad bar.

Tingly on the tongue, soft on the throat and high in the brain, The Real McCoy reaches the parts other weed can not reach. Grown properly yields can exceed 300 grammes per square metre.

11 seeds £35.00 \$55 in stock

strain **Swazi Safari:**

Developed: S. Africa, USA, Holland,

F-1 hybrid Sativa / Indica: A very special cross, mostly sativa Appearance:

Very resinous long buds

Smell / taste: Fairly sweet with a hashy bite

High / strength: Very clear up high, very strong

Yield per m2: Good

Sowing time: May / June Outdoor harvest: October / November (Holland)

Flowering period: 9 - 11 weeks (12 hrs indoor)

Be careful, this is a real African bush adventure!

A perfectly balanced Sativa cross, a slender plant that matures to carry sweet heavy buds. The taste is similar to Original Haze but a little sweeter like good hashish. With fairly good yields and a crystal clear, energizing high, this cross is perfect for adding clarity to your cosmic thoughts.
11 seeds £35.00 \$ 55 in stock.

strain : **Artic sun** .

Developed: Holland

Sativa / Indica: 60 % / 40 %

Appearance: White, extremely resinous

Smell / taste: Pungent, greasy with skunk undertones

High / strength: Physical, Cerebral

Yield per m2: Very high Sowing time: May / June Outdoor harvest: October (Holland)

Flowering period: 8 - 10 weeks (12 hrs indoor)

Good for medical applications

A marriage of old and new world genetics. Mostly Sativa with long, dense and crystal laden buds. High yielding and extremely potent. The high is both physical and cerebral in nature with a pungent smell and taste perfect for medical applications.

11 seeds £35.00 \$ 55 in stock.

strain : **Haze mist**.

Developed: USA, Holland

Sativa / Indica: Almost pure Sativa

Appearance: Sativa looking, very resinous

Smell / taste: Sweet and spicy

High / strength: Clear, energetic, extremely potent

Yield per m2: High

Sowing time: May / June Outdoor harvest: November (Holland)

Flowering period: 10 - 14 weeks (12 hrs indoor) A pure Sativa diva!

The balance between the potency and sweetness of the Kerala with the spicyness and soaring cerebral high of the Original Haze are perfectly expressed in this almost pure Sativa cross. For patient Haze lovers only, a very special cross that will reward the grower with a product that is unsurpassed in recent history. Good yield for an almost pure Sativa. South Indian is one of the main building blocks that was used to make the Original Haze back in the 70's.

11 seeds £40.00 \$60 in stock.

strain: **Fuma Con Diablos**.

Developed: Holland,

F-1 hybrid Sativa / Indica: 75 % / 25 %

Appearance: Sativa looking

Smell / taste: Superior, sweet taste

High / strength: Clear spiritual energetic high

Yield per m2: High

Sowing time: May / June Outdoor harvest: October / November (Holland)

Flowering period: 9 - 12 weeks (12 hrs indoor) A very potent haze variety!

The tables are turned, our 25% T.H.C. Skunk #1 mother crossed with our pure Original Haze father. Very potent Haze dominant strain, perfect for a breeding project with Fumar Con Dios or The Original Haze.

11 seeds £ 40.00 \$60 in stock.

strain : **The Original Haze**.

Developed: Pure breeding Sativa / Indica: Pure Sativa

Appearance: Very resinous, heavy buds

Smell / taste: Sweet and sour

High / strength: Very potent, clear up, energetic high

Yield per m2: Good Sowing time: May / June Outdoor harvest: End of December (Holland)

Flowering period: 12 - 16 weeks (12 hrs indoor) Special breeding stock.

The only original pure haze available.

We have worked with this variety in Holland for almost 20 years now. It is the base for all the Haze you can find here in Holland. Since being stabilized in the late 70's The Original Haze has never been hybridized. Perfect for breeding projects due to it's pure breeding status. For commercial growers this strain is not recommended due to it's size and long maturation time. Very potent with an energetic cerebral high.

11 seeds £50.00 \$80 in stock.

Originates from: Holland
Euro 74,00 (£ 48,94) in stock.

White Widow

The exact composition of this Indica-Sativa-hybrid is one of the best kept secrets. Extremely high quality plant with a fruity taste that provides a very strong high. Winner of the Highlife Cup and High Times Cannabis Cup.
Flowering time: 8 – 9 weeks.
Height: 160 cm
Yield: 300 g.
Originates from: Holland
Euro 42,00 (£ 27,78) in stock.

Sagarmartha Seeds

The Sativa Seedbank is a new seedbank founded in cooperation with Nirvana ©. The breeders from Nirvana © developed new strains next to the already existing ones, exclusively sold by The Sativa Seedbank. The breeders gained a knowledge after 20 years of experimenting, crossing and stabilizing of cannabis seeds. That's why the quality of the seeds is very high. The Sativa Seedbank is specialized in sativa strains, that means that we developed the seeds that will give a plant with the true sativa high.

strain: Indigo

Indigo is a strong plant but a slow starter. Be patient as the seeds take longer than normal to sprout. Don't vegetate too long because this plant stretches during flowering.

The buds have a sweet smell and red brown hairs.

The up funky high gives a very happy experience.

Flowering time: 63-70 days

Inside cultivation

Sativa/Indica

Yield: 450 grams per m2

Sea of green

10 seeds £18.00 \$25 in stock

strain : white lady.

White lady is a compact plant with an abundance of crystals. Few leaves makes this plant easy to manicure. With a fresh taste and an extremely high level of THC this strain is popular among growers and blowers.

Flowering time 55-60 days

Inside cultivation

Sativa/Indica mix

Yield: app.400 grams per square meter

10 seeds £18.00 \$25 in stock.

strain. : Haze

This plant originally came from California. It is a pure sativa plant that flowers long. The plant has thin gold bronze coloured buds. The yield is a bit low but the almost psychedelic high is very unique. A special treat for the connoisseur.

Flowering time 70-85 days

Inside cultivation

Sativa

Yield: 500 gram per m2

10 seeds £24.00 \$35 in stock.

Strain: cannabis sativa slang.

An updated version of early girl, this strain grows easily and doesn't require much attention. The plant grows tall with big leaves. The buds are covered with crystals and have a fresh, fruity smell.

Flowering time: 56-64 days

Outside cultivation

Sativa

Yield: Appr. 400 till 800 grams per plant.

harvest - Ending half/end of october

10 seeds £20.00 \$30 in stock

strain:full moon.

This plant can reach a height of 2 to 3 meters and has a strong stone. It has a strong taste and a sweet smell. The buds can become 50 to 80 centimeters long and are very sticky. Beautiful bushy buds with large dark green leaves.

Sativa Seed Bank

The Sativa Seedbank is a new seedbank founded in cooperation with Nirvana ©.The breeders from Nirvana © developed new strains next to the already existing ones, exclusively sold by The Sativa Seedbank.The breeders gained a knowledge after 20 years of experimenting, crossing and stabilizing of cannabis seeds .That's why the quality of the seeds is very high.The Sativa Seedbank is specialized in sativa strains, that means that we developed the seeds that will give a plant with the true sativa high.

strain: Indigo

Indigo is a strong plant but a slow starter. Be patient as the seeds take longer than normal to sprout. Don't vegetate too long because this plant stretches during flowering. The buds have a sweet smell and red brown hairs. The up funky high gives a very happy experience.

Flowering time: 63-70 days

Inside cultivation

Sativa/Indica

Yield: 450 grams per m2

Sea of green
