**Dr Chronics Special Selector**

Choice strains for the cannabis user, the best buds, grown out from North America, and beyond.

**Blue Grass seeds.**

**Blue Hen**
Grown from two Cannabis Cup winners, Blueberry and Super Silver Haze. Blue Grassseeds has embarked on an ambitious project to breed the first true medicinal strain. Powered by SSH and Blueberry with the famous Blueberry flavour.

Type: 50/50 Indica/Sativa;  
Height: 4 feet indoors;  
Flower: 6-8 weeks;  
Yield: 120-160 grams 
**Blue Goo**
Blue goo: Blue bubble juice x double g. Maybe one of the best scrog strains on the market today! Wonderful blue berry flavour crossed with the awesome power of g13. High is very powerful and sometimes trippy that leads to a solid peaceful couch lock.

Type: 50/50 Indica/Sativa;  
Height: 4 feet;  
Flower: 7-8 weeks;  
Yield: 100-120 grams

**Blue Kiev**
An old favorite brought back by popular demand. Our homebred Blue Russian was crossed with a very potent AK 47 male. This is one of our top yielding strains and will deliver a knock-out blueberry flavored narcotic stone. Excellent relief for pain, arthritis, depression or anxiety.

Type: 50/50 Indica/Sativa;  
Height: 4 feet;  
Flower: 6-8 weeks;  
Yield: 120-160 grams

**Blue Russian**
(Blue Hen x Juicy Russian) 
Possibly our most beautiful plant, we expected this one to be good but WHAT a surprise! She looks like blue rubber, peels out leaving the starting gate going straight to the front, grows into a big fat berry-smelling giant showing of resin-coating few can match. Leaves no doubt about who the father is, his blue
highness stamped all over this one. Juicy Russian #4 was the fairest of all of those Russians, a splendid individual, sheer delight to smoke.

Type: indica/sativa  
height: 4 foot indoors  
flowering: 50-55 days  
yield: 80-125 g

**Chimera**

Doc chronic is happy to announce that we now carry Chimera seeds. Chimera produces some of the finest strains available today, cast your eyes on this fine selection.

**Dr Chronics Cherry pot**
100% feminized  
Breeder: D.C/ capt.B  
origin: california/ holland  
flowering: 56-63 days  
12 seeds: £49.00 $78.00 out of stock

ONLY BY BREEDING VAST NUMBERS OF STRAINS AND HYBRIDS DO WE FIND THE HIGHEST POTENTIAL THAT CANNABIS HAS TO OFFER.

**Cherry pot**
Indoor/outdoor.

**Northern dream**
(indoor K.G>thunderfuck hybrid)

We used a NL#5 male to pollinate our best KG thunderfuck mother this is the first generation back cross to a exceptional NL#5 cutting that has been around E. vancouver for some time now huge rock solid main cola dominant plants with a skunky lemon scent very commercial 7-8wk flwr.

**Malibu**
Flowering 55-60 days.

**Skywalker**
NEW NEW NEW ............
flowering: 56-63 days  
10 seeds regular: £50.00 $80.00 in stock  
10 feminized seeds £75.00 $120 in stock.

**Isis**

**Dutch Passion**

Dutch passion where one of the first seed company's to feminize seeds, they have been producing seeds for over 10 years.

The basis of there success has been the genetic control they have over there variteis and the constant influx of new genetics they obtain world wide.

**Cherry pot**
10 seeds feminized: £85.00 $135.00 in stock.

**Isis**

**Flowering:** 50-55 days
**Height:** 4 feet indoors
**Yield:** Good!
New from Dutch Passion. Mostly sativa with a clear haze influence, first class high branches bow down towards the end of the life cycle of the plant due to the weight of the buds.

---

**strain: ultra skunk.**
flowering: 42-63 days.
indoor:
10 seeds regular: £30.00 $48.00 in stock.
10 seeds feminized: NEW NEW NEW £55.00 $88.00 in stock.
In our Swiss experiment we flowered several Dutch and Swiss Skunk clones and also several skunk seed varieties. Our goal was to select the best possible Skunk. By hybridizing the best two Skunk plants we created 'Ultra Skunk', a very homogenous variety. Thick buds with wooly pistols. Sweet, soft and fruity taste with a distinctly long lasting 'Up' high...

---

**strain: blueberry.**
flowering: 8-10 weeks
indoor / green house:
10 seeds regular: £40.00 $65.00 in stock.
feminised: £69.00 $110.00 in stock.
Blueberry is a mostly Indica (80% Indica, 20% Sativa) strain, that dates to the late 1970's. A large producer under optimum conditions. A dense and stout plant with red, purple and finally blue hues, that usually cure to a lavender blue. The finished product has a very fruity aroma and taste of blueberry. It produces a notable and pleasantly euphoric high of the highest quality and is very long lasting. Medium to large calyxes.

---

**strain: mazar.**
flowering: 8-9 weeks
indoor / greenhouse
10 seeds regular: £30.00 $48.00 in stock.
feminised: £60.00 $96.00 in stock.
This is an upgraded selection of the valued former Afghan/Skunk. The taste is softer than before with an impressive yield. The Afghani (Mazar-i-Shariff) part is a very short Christmas tree-like plant, 100% Indica and very resinous. The F1-cross with Skunk #1 gives the variety a bigger yield and better taste. Very good "up" high. As both parents are very consistent, the offspring is very consistent too.

---

**strain: flo.**
flowering: 9-11 weeks
indoor / greenhouse
10 seeds regular: £40.00 $64.00 in stock.
feminised: £80.00 $128.00 in stock.
original flo is a sativa/indica cross the large tight spear shaped buds are made up of small densely packed purple calyxes. The plants are taller and like to branch out. A super producer, the flavor like nepalese temple hash. A most pleasant and enjoyable smoke.

---

**strain: skunk pass.**
flowering: 8-9 weeks
10 seeds regular: £28.00 $45.00 in stock.
10 feminized seeds: £50.00 $80.00 in stock.
This variety was strongly improved in 1998, a breakthrough in the development of this variety. A sturdy plant with the power and yield of the famous Northern Lights #5. Hybridized with the best of our potent 100% Haze genetics. This variety has a solid, strong lasting "high", combined with a well balanced, soft smoking experience. Good for bumber harvests. A perfect variety to select from clones.

---

**strain: Durban poison.**
flowering: 8-9 weeks
10 seeds regular: £26.00 $42.00 out of stock.
feminized: £52.00 $80.00 in stock.
rom south Africa produced in Holland. exclusively inbred never hybridized, 100% sativa.large long bud leaves, buds are also large and long with lots of resin. a sweet licorice or anise flavour.does very well under artificial light.

---

**strain: oasis.**
flowering: 8-9 weeks
10 seeds regular: £22.75 $36.00 in stock.
feminised: £62.00 $99.00 in stock.
One of our most popular varieties, Oasis is our Northern Lights #2 selection. A very strong plant, almost spidermite resistant. Good yield, excellent taste and excellent high.

---

**strain: masterkush.**
flowering: 8-9 weeks.
10 seeds regular: £26.00 $39.00 in stock.
feminised: £50.00 $80.00 in stock.
A F1 cross between two different Hindu-kush strains. yield is high. Excellent high and strong taste. one of Dr Chronicles favorites

---

**strain: power plant.**
flowering: 8 weeks.
10 regular seeds: £22.00 $34.00 in stock.
10 feminized seeds: £55.00 $88.00 in stock.
This strain has been inbred only, never hybridized. Very rich in THC. It is a strain with an enormous growth potential. Indoor as well as in a greenhouse the plants have an enormous yield. Indoors flowering starts already one week after turning back the light cycle to 12 hours. Outdoor, flowering starts late, but the plants ripen very fast. This variety is very uniform. Strong "up high", very soft smoke.

---

**strain: Green Spirit (feminized)**
Breeder: Dutch Passion
Origin: Holland
Indoor
Flowering: 56 days
10 seeds/feminized £60.00 - $96.00 in stock
Big Bud and Skunk #1, Green Spirit gives huge yields indoors. Select the longer flowering plants for best results.

---

**strain: Passion #1 © Outdoor**
breeder:dutch passion
outdoor
flowering 42 days 1st week october
10 seeds regular £20.00 $32.00 in stock.
10 seeds feminized £40.00 $64.00 in stock.
Passion #1 (Amstel Gold) is an Indica variety developed in California in the seventies, and has been grown outdoors in Holland since 1980. Smokes soft with a citrus-like aroma and has a good high. Easy to grow, grows with long compact resinous buds. One of the best green outdoor varieties worldwide. THC = 18.6%, CBD < 0.1%<BR>

---

**strain: Voodoo**
Breeder: Dutch Passion Feminized
Origin: Thailand / Holland
Outdoor / Greenhouse
Flowering: 49 days
10 seeds: feminized £50.00 -$80.00 in stock.
regular £ 25.00 - $40.00 in stock.
Voodoo was developed as a green strain, from Thai parents in 1997. The Thai parents have been grown in Holland for years already. A very strong plant with long thick buds. Has a Thai aroma and a clear, fresh smell. Sativa high, very productive. One lab's report on ths variety was THC=8.2%, CBD < 0.1%, S/T=11.0%

---

**strain: Khola** (feminized)
Breeder: Dutch Passion Feminized
Origin: Thailand / Brazil / Holland

---
Indoor / Outdoor
Flowering: 49-70 days
10 seeds: feminized: £ 50.00 / $ 80.00 in stock.
10 seeds: regular: £ 25.00 / $40.00 in stock.
A stabilized Dutch hybrid specially developed for outdoor growing by crossing selected Thai & Brazilian strains, but also with superb indoor results. Dark leafed, early flowering mold resistant with compact resinous buds. Not recommended for the novice but a must for connoisseurs.

Strain: Shaman (feminized)
Breeder: Dutch Passion Feminized
Origin: Holland
Outdoor
Flowering: 56-63 days
10 seeds: feminized: £ 30.00 / $ 50.00 in stock.
10 seeds: regular: £ 15.00 / $20 in stock.
Shaman: Outdoor
This is our former variety Purple/Skunk. This variety is a hybrid (F1) of Purple #1 and an early Skunk. About 50% of the plants turn purple during flowering. 87.5% Sativa and 12.5% Indica. One lab's report on this variety was THC=13.7%, CBD=0.4%

Strain: Trance (feminized)
Breeder: Dutch Passion Feminized
Origin: Holland
Outdoor
Flowering: 49 days
10 seeds: feminized £ 40.00 / $ 60 in stock.
10 seeds: regular: £20.00 / $ 30 in stock.
Trance: Outdoor: An upgrade of our former variety Skunk/Indica. With 100% Skunk seeds, it's not possible to grow fully mature outdoor plants, because the seeds were selected for growing under artificial lights and greenhouse. Skunk was crossed with an early Indica, to let it mature sooner and to make the plant stronger for outdoor conditions. This is the F1 generation. It has come out as a very nice strain.

Strain: Twilight (feminized)
Breeder: Dutch Passion Feminized
Origin: Holland
Outdoor
Flowering: 49-56 days
10 seeds: feminized £ 35.00 / $ 60.00 in stock.
10 seeds: regular: £ 20.00 / $ 40.00 in stock.
A beautiful purple variety with high yields and Afghan taste. Heavy buds and high, 100% Indica.

Strain: Purple #1 (feminized)
Breeder: Dutch Passion Feminized
Origin: Holland
Outdoor
Flowering: 56 days
10 seeds: feminized: £ 40.00 / $ 60 in stock.
10 seeds: regular: £ 20.00 / $ 30.00 in stock.
Purple #1: Outdoor
A strong plant (50% Indica, 50% Sativa), easy to grow. Purple Afghan seeds have been crossed in Holland with Indica and Sativa varieties since 1983. The plants are fully adapted to the Dutch climate and have a respectable yield. This variety has calyxes that turn purple, starting at the beginning of flowering.
Up to 90% of the plants turn purple. Has a rough, but subtle aroma and a very good high.

Strain: Skunk#1
Flowering: 45-75 days
10 regular seeds: £ 15.00 in stock £25.00 in stock
Skunk#1 (75% Sativa, 25% Indica) was originally a cross between 25% Afghani, 25% Mexican Acapulco Gold and 50% Columbian Gold. This variety is a stabilized homogeneous strain. Blooms with long, thick buds, varying in color from light green to golden. Very high flower to leaf ratio. Mold susceptible the last 6 weeks of flowering. Soft and sweet aroma and a very strong “up” high. Excellent variety for indoor growing or greenhouse with darkening system. Very high yields. Easy to manicure.

Blue Moonshine © Indoor
A super potent Blueberry Indica, coated with a strong concentration of tall standing trichomes. This produces a long lasting very narcotic experience -body high blueberry. Short (80 cm) stout kush plants that produce dense, tight, rock hard nuggets of trichome-coated bud. A true "hash-plant".
Flowering period: 9 weeks
Harvest time outdoor: mid Nov.
10 seeds £40.00 $64.00 in stock.

2nd price "High Times Cup" 2000
1st price "Highlife Cup" 2002
strain: Euforia
Developed by our breeders in 1996. A very fine Skunk selection, very commercial, very heavy bloom, bumper harvest, the famous Skunk high, taste is not so sweet as our other Skunk selections. One of our favorites, also for greenhouse.
Flowering period: 7 weeks
Harvest time outdoor: end of Oct, beginning of Nov.
10 seeds £25.00 $40.00 in stock.

strain: Cali Orange
Flowering: 56 days.
10 seeds regular £25.00 $40.00 in stock.
A hybrid Indica/Sativa hybrid. With its blue/purple shades, a very decorative plant. At harvest time the buds turn lavender-blue to aubergine. The buds are silver with THC-glands. The buds are hard and the plant is very productive. It has a fresh, sweet and herbal aroma and taste. The energetic "High" lasts for a very long time. Don’t miss this variety.

strain: Orange Bud
Flowering: 8 weeks
10 regular seeds: £20.00 $30 out of stock.
A 100% Skunk selection, grows with thick hard buds and orange pistils. A very appreciated variety.

strain: Super Haze
Flowering: 10-12 weeks
10 seeds regular: £ 28.00 $ 45.00 in stock.
Formerly this strain was called “Haze/Skunk”. Still one of the best for the Dutch Passion team. Originally Haze is a pure Sativa strain. It is crossed with Skunk#1 to get a bigger yield, a softer taste and a shorter flowering period. Truly superior sweet taste. The high is incredibly clear and up energy. A very favorite strain from our collection. Very high yield for an almost 100% Sativa variety.

strain: Buddha
Flowering: 8 weeks
10 seeds regular: £30.00 $ 48.00 in stock.
Another favorite from our collection, developed by Dutch Passion breeders in 1996. A female Oasis/Shaiva/Haze crossed with a male Oasis/Shaiva/Skunk.

strain: Ultra Skunk
Flowering: 42-63 days
10 seeds regular: £ 30.00 $ 48.00 in stock.
10 seeds: feminized: £ 55.00 $ 88.00 in stock.
Swiss experiment we flowered several Dutch and Swiss Skunk clones and also several skunk seed varieties. Our goal was to select the best possible Skunk. By hybridizing the best two Skunk plants we created ‘Ultra Skunk’, a very homogenous variety. Thick buds with wooly pistils. Sweet, soft and fruity taste with a distinctly long lasting “Up” high...

strain: Delta 9
Flowering: 56-70 days
10 seeds regular: £55.00 $88.00 in stock.
Delta 9 is one of the best Sativa’s possible. We hybridized an ‘Isis’ female with a ‘Flo’ male. The result has a Haze like aroma but the taste of the ‘Isis’ combining to produce a subtle but high yield. Good yield of exceptional quality can remind you of the Kashmari hash of the 70’s. A rich plant with big buds.

strain: Dream Weaver
Flowering: 56-70 days
10 seeds: £ 40.00 / $ 64.00 in stock.

strain: Hawaiian Haze
Flowering: 56-70 days
10 seeds: £ 40.00 / $ 64.00 in stock.

strain: Hawaiian Haze
Flowering: 56-70 days
10 seeds: £ 40.00 / $ 64.00 in stock.

strain: Hawaiian Haze
Flowering: 56-70 days
10 seeds: £ 40.00 / $ 64.00 in stock.

strain: Hawaiian Haze
Flowering: 56-70 days
10 seeds: £ 40.00 / $ 64.00 in stock.
Serious Seeds

Serious seeds is a small firm concentrating on the production of high quality, stable and consistent cannabis seeds. Serious strains are bred and stabilized for many generations with quality as the highest priority. These stable strains are selected for their unique properties, and then crossed to produce seeds for vigorous F1 hybrids. When you grow serious seeds you can be assured that the results will be consistent because every batch of seeds has been tested for germination rate and uniformity. You will notice that we carry only five sorts of seeds and maybe you wonder why? After all there are over 100 listed in some seed banks. Instead of padding there seed bank with varieties that are available elsewhere where serious sells only a few, custom developed and always prize winning varieties.

Serious seeds are packed in packs of 15 seeds and every pack has a batch number.

Serious Seeds, 1035-500 grams

15 seeds: £48.00 $76.00 out of stock. Sorry.

This easy to grow plant is our most popular. It is of medium height and produces good yields quickly. Extremely STRONG odor and smoke. Take extra care for odor control when growing near neighbors. The name was given not out of any idea of violence, but in association with the ‘one hit wonder’ that the smoke is. Quality without compromise makes AK suitable for commercial grows or home use. These plants have a short flowering period for a sativa, producing compact, not too leafy buds that gleam with a coat of resin crystals. Winning seven prizes!! In Cannabis competitions, including second prize for the best Sativa in the 1999 High Times Cannabis Cup, prove it is a favorite to smoke as well as to grow.

Type: Mostly sativa

Indoor clone grow time: 5 – 10 days
Indoor flowering time: 53 – 63 days
Indoor yield: 350 – 500 grams/m2

Outdoor/ Greenhouse harvest time: 15-31 October

Strain: Bubble Gum

Flowering: 56-63 days

Yield: 350-450 grams

15 seeds: £48.00 $76.00 out of stock.

Bubble Gum is a medium tall, usually not too branchy (sometimes stretchy) plant, producing compact, crystal covered buds. Originally the Bubble Gum was developed by growers in Indiana, USA. From there the genetics moved to New England and eventually Holland. It took many generations to finally produce this stable Bubble Gum, with the characteristic, sweet, slightly musky (and no longer resembling a typical bubble gum taste) and euphoric high; the original trademarks of this famous strain. The only inbred strain (no F1 hybrid) in the Serious menu of 1994, and in 1995 and again in 1999, giving Bubble Gum a total of from the judges. Type: Sativa/Indica Hybrid

Indoor clone grow time: 7 – 14 days
Indoor flowering time: 56-63 days

Strain: Chronic

Flowering: 56-63 days

15 seeds: £48.00 $76.00 out of stock.

Our most commercial variety, this medium height, not too dense plant is the perfect combination of good yield and excellent quality. Smokers that know and grow choose this plant for its combination of appearance and sweet smell. With its indica background Chronic can produce up to 600 g/m2 without losing that connoisseur feeling. Grows a single huge central bud with few side branches. Do not top plants to encourage multiple big buds, as this strain does not respond well. Mild, sweet smell develops while flowering, take care to dry thoroughly after harvest (before packaging) to maintain this subtle fragrance. 3rd prize High Times Cannabis Cup 1994, improved in 2000. Of our strains, this is the best choice for growers tired of losing quality when increasing yield. Type: Sativa/Indica Hybrid

Indoor clone grow time: 5 – 10 days
Indoor flowering time: 56-63 days
Indoor yield: 350 – 600 grams/m2

Outdoor/Greenhouse harvest time: 15-31 October

Strain: Kali Mist

Flowering: 56-70 days

10 Seeds Regular: £45.00 $72.00 in stock.

From the Cannabis Buyers Cooperative in California comes the Dream Weaver. We hybridized this Medicinal Indica with a particularly good indica from Humboldt County (California). The high is seriously ‘powerful’ in the words of our test team. Yields above average, excellent taste

THSeeds

THSeeds was established in 1993, making it one of the oldest seed companies in Holland. It began in the C.I.A. (Cannabis In Amsterdam), which was: a Cannabis information center, a world renowned seed shop, the first hemp store in Europe and, according to Robert C. Clarke (author: Marijuana Botany, Hashish!), “the epicenter of the Cannabis universe.” THSeeds quickly gained an excellent reputation among the experienced growers who purchased THSeeds. Year after year, these growers return to buy more THSeeds. Most comment on how pleased they are with the consistency and quality of the THSeeds genetics. This positive feedback from the growers themselves is the solid foundation on which THSeeds has been built. THSeeds is a grower-oriented seed company, we seek as much feedback from growers as possible.

THSeeds brings the best American genetics to Holland. Since its beginning THSeeds has been on the cutting edge of the New School Cannabis Genetics. Born at a time when almost everything in Amsterdam was a mix of Northern Lights, Skunk and Shiva in various proportions, THSeeds has worked long and hard to bring new stable varieties onto the market. Two of our biggest successes are:

The Bubble Gum THSeeds was the seed company responsible for bringing the Original Bubble Gum from the States, and was the first to sell the Bubble Gum seeds (see New York Times, Feb. 1994). These Bubble Gum genetics helped numerous Coffeeshops win many High Times Cannabis Cups over the years. The S.A.G.E. (Sativa Afghani Genetic Equilibrium) Following the Bubble Gum, THSeeds brought the S.A.G.E. from the high mountains of central California to Holland. Named “S.A.G.E.” because of its distinctive spicy smell and taste, this plant’s Haze-y flavor and high will fool you into thinking it is a pure Haze variety. But when you grow it you will not experience the low yields of all other Haze varieties. The large yields you get come from the Afghan side, but without overpowering this plant’s superior Haze flavor. For two years the THC percentage of the 50 varieties entered by all the coffeeshops and seed companies entered in the High Times Cannabis Cup was established. The S.A.G.E. scored 3rd (1998), and 2nd (1999) highest THC with over 20% (see lists on page...). Both years this THC ranking was higher then any of the

Flowering: 56-63 days

15 seeds: £48.00 $76.00 out of stock.

These seeds produce plants that are fantastic in both appearance, and effect. Our most typically indica strain, White Russian is a stable cross of AK-47 and White Widow (a prize winning indica clone). Medium height, consistent plants and dense, very resinous flower tops (crystals appear after about 5 weeks of flowering). With such a strong indica background, the plants smell quite strong during both their growing and flowering period. In an independent seed comparison in which over 150 different seed varieties were grown out in a greenhouse, the White Russian came out as the strongest plant (22% THC, likely to be the strongest plant known at present!!). Winner of the overall Cannabis Cup in 1996 and of the Cup for Best Bio Grass in 1997. The plants yield very powerful buds, coated with resin. Very strong, long lasting high, more cerebral than a knockout. Medicinal plant. Type: Mostly indica

Indoor clone grow time: 5 – 10 days
Indoor flowering time: 56-63 days
Indoor yield: 350-500 grams/m2

Outdoor/Greenhouse harvest time: 15-31 October

**Strain: Stinky Pinky**

**Breeder:** THSeeds  
**Origin:** Holland  
**Indoor**  
**Flowering:** 60 days  
10 seeds: £ 40.00 / $ 60 in stock.  
This is a beautiful, mostly Indica variety that has pink pistils highlighting some of the plants very distinctive budding pattern, rounded main cola with a "crown" of buds and not much more below, great sea of green plant. 
**Type:** Indica  
**Height:** 120 - 140 cm  
**Yield:** 350-400 p.s.m.  
**Flowering Time:** 60 days

**Strain: Mr. Bubble**

**Breeder:** THSeeds  
**Origin:** Holland  
**Indoor**  
**Flowering:** 65-70 days  
10 seeds: £ 50.00 - $ 70 in stock.  
**KALI MIST x BUBBLEGUM** These two Cannabis Cup winning varieties brought together in 1995 by "accident" prove to be the perfect match. The spiciness and clear strength of the Kali Mist is grounded by the classic indica flavor and narcotic effect of the bubblegum. This plant works great in all growing mediums (hydro, bio) and its much easier to grow than any of its original parents. We are sure that when you grow her you'll never let her go down the drain!  
**Type:** Sativa / Indica  
**Height:** 140 -160 cm  
**Yield:** 350-400 p.s.m.  
**Flowering Time:** 65-70 days

**Strain: Mendocino Madness**

**Breeder:** THSeeds  
**Origin:** USA / Holland  
**Outdoor**  
**Flowering:** 49 days  
10 seeds: £ 30.00 / $ 45 in stock.  
**This one of our fastest hybrids.** We crossed a Northern Cali plant called "Madness" that would finish the first week in September with our fasts male breeder plant, that was responsible for the original Kwiskilfer. The results will amaze even experienced outdoor growers, great structure and yield along with bug resistance make this plant a top choice for anyone who braves the outdoor experience.  
**Type:** Indica / Sativa  
**Height:** up to 2 meters  
**Yield:** 300-500 p.s.m.  
**Flowering Time:** 7 weeks

**Strain: Chocolate Chunk**

**Breeder:** THSeeds  
**Origin:** Holland  
**Indoor**  
**Flowering:** 56 days  
10 seeds: £ 40.00 - $ 60 in stock.  
This is real candy. With a definitive kush bottom this pure Indica will melt in your mouth and stick to your hands. Thick, deep green leaves and fat dense buds will make every trip to the grow room feel like being, "a kid in a candy store." Chocolate Chunk is quite easy to grow due to it's quick flowering-time and "single cola" growth pattern. Works great with sea of green method  
**Type:** pure Indica  
**Height:** 100-125 cm  
**Yield:** 350-400 p.s.m.

**Strain: KAL-X**

**Breeder:** THSeeds  
**Origin:** Holland  
**Indoor / Outdoor / GH**  
**Flowering:** 60 days  
10 seeds: £ 30.00 - $ 45 in stock.

Indoor
Flowering: 60-65 days
10 seeds: £ 50.00 / $ 70 in stock.

One Word "Monstrous" will describe this plant. A huge producer with giant cola's will make any "bud waver" happy. Absolutely the best indoor producer we have seen yet. Ideal for planted method 20-30 p.s.m. But beware we don't call it heavy duty fruity for nothing, this plant smells Strong! So air cleaners or ozone generators are suggested.

Type: Sativa/Indica
Height: 120-160 cm
Yield: 400-600 p.s.m.
Flowering Time: 60-65 days.

Strain: The Original Bubblegum
Breeder: THSeeds
Origin: Holland
Indoor
Flowering: 60 days
10 seeds: £28.00 00  out of  stock.

A Beautiful double purple cross grown at 800 m. 60 % Sativa, 40 % Indica. Very sweet flavour and suprisingly great hash maker. Finishing time mid Oct. Yield 300-400 grams per plant.

Type: Mostly Indica
Height : 120-160 cm
Yield: 300 - 400 p.s.m.
Flowering Time: 55-60 days.

Strain: Honeymoon
Breeder: Th seeds
Origin: Netherlands
Environment: Outdoor
Flowering: 60-70
10 seeds: £28.00 00  out of stock.

A Beautiful double purple cross grown at 800 m. 60 % Sativa, 40 % Indica. Very sweet flavour and suprisingly great hash maker. Finishing time mid Oct. Yield 300-400 grams per plant.

Type: Sativa/Indica
Height: 130-160 cm
Yield: 300 - 400 p.s.m.
Flowering Time: mid Oct.

Strain: Punu Budder
Breeder: TH Seeds
Origin: Netherlands
indoor/ outdoor/ green house.

10 seeds: £28.00 00  out of stock.

A Beautiful double purple cross grown at 800 m. 60 % Sativa, 40 % Indica. Very sweet flavour and suprisingly great hash maker. Finishing time mid Oct. Yield 300-400 grams per plant.

Type : Mostly Indica
Height : 120-150 cm
Yield : 300-350 p.s.m.
Flowering Time : 55 - 60 days
10 seeds £35.00 in stock.

Looking for something exotic? Superior Hawaiian genetics dominate the plants appearance, smell, and taste. Stable Afghan lines smooth out the flowering times to a respectable 55-60 days, making this an ideal plant

Strain: Skunk xxx
Breeder: Th seeds
Origin: Netherlands
Flowering: 49-56
10 seeds: £ 15.00 in stock.

Stable 3-way hybrid, old favorite from our skunk collection !

Type: Sativa/Indica
Height: 120-140 cm
Yield: 300 p.s.m
.Flowering Time: 55 days.

strain : big fatty xxx
breeder Th seeds
origin Netherlands
indoor/ outdoor/ greenhouse

Sensi Seed Bank
view our new outdoor selection on the bottom of this page.

Ben Dronkers is at the helm of one of Holland's best and most experienced seed houses. He has steered Sensi Seed Bank to the "higher" echelons of seed technology, producing unique world famous varieties. Their professionalism has led them to be many time first prize winners at the annual " High Times Cannabis Cup" - not only for their superior seeds but also for the best cannabis.

Please note that Sensi Seeds come in packs of 15, 20, 30 or 40, do not buy Sensi Seeds from anyone selling in different quantities as you may not be buying the genuine product.

Strain: First Lady
Breeder: Sensi Seeds
Origin: Holland
Indoor / Outdoor / GH
Flowering: 45-50 days
15 seeds: £ 50.00 / $ 70 in stock

True to its name, this is one of the fastest flowering varieties available. These dominant Indica ladies will flower rapidly and grab your attention in the way that only a lady can. Originated in the high valleys near Mazar-I-Sharif, Chitral, and Kandahar, in Afghanistan and Pakistan; this indica cross will remind our older growers of the good old days when the first ladies were introduced in the western world. This strain is characterized by broad plants with short, woody stems and internodes, and large dark green leaves.

Flowering in greenhouse: mid-October
Yield in greenhouse: up to 500 gr.

Strain: Mothers Finest
Breeder: Sensi Seeds
Origin: Holland
Indoor / Outdoor / GH
Flowering: 50-70 days
15 seeds: £ 55.00 / $ 80.00 in stock.

Every mother will tell you she doesn't have a favourite, but add this strain to your collection, and you'll have trouble deciding on your favourite mother. An Indica-Sativa cross, as funky as they come. Don't be fooled by the shorter flowering times and heavier yields of Mothers Finest, her Sativa breeding is evident from the first toke. Flowering: 50 - 70 days
Height: 140 - 160 cm.
Yield: up to 120 gr.

Strain: American Dream
Breeder: Sensi Seeds
Origin: Holland
Indoor / Outdoor / GH
Flowering: 45-50 days
15 seeds: £ 50.00 / $ 70 in stock

Now here's your chance to grab a piece of the good ol' American Dream. An ideal cash cropper with white crystals frosting not only the buds, but also the stem and beginning of the leaves. This super Indica flowers in seven weeks and will keep you dreaming for hours.

Flowering: 45 - 60 days
Height: 100 - 125 cm
Yield: up to 100 gr.
Flowering in greenhouse: mid-October
Yield in greenhouse: up to 500 gr.

Strain: 4 way
Breeder: sensi seeds
Origin: Netherlands
Indoor
Flowering: 45-60
15 seeds:£ 35.00 00  in stock.

This is a 4-way hybrid of our best indoor strains. Although somewhat variable in growth pattern, all tested plants were fast flowering and of very high quality. This hybrid has some of the sweetest, most balanced tastes and highs that we have yet produced.

strain: Hindu Kush:
Flowering: 45-50 days.
Height: 115-130 cm.
Yield: up to 90 gr.
15 seeds 24.00 32.00  in stock.

This pure Kush originally from the Hindu Kush mountain region is the result of many years of selective inbreeding. The seedlings are very even and consistent, an excellent indoor variety for crops from seed. Wonderfully potent, but not devastating, very mild for an Indica.

strain: Jack Flash.
Flowering: 60-70 days.
15 seeds:£ 64.00 00  in stock.
Yes, here it is, the Jack Herer® hybrid that is easy to grow and already a classic amongst those who know! Everybody who has been growing Super Skunk® before will now choose for this fruity Jack taste with a flash of Haze. It is remarkable easy to grow and fresh and vigorous. It is recommended that you select the medium long flowering plants for finest quality and best results.

strain: MAPLE LEAF INDICA®
flowering: 40-55 days
15 seeds: £37.00 $55.00 in stock.

A most interesting Indica strain with a long history brought out of the Afghan mountains just before the Russian invasion. For some, this precious strain will have a whiff of familiarity because it was used as an important building block for some of the most famous varieties of today. It’s a compact powerful plant with wide fingered leaves and a very sweet Indica Maple aroma.

A delight for connoisseurs, a taste of the past...
Flowering: 45-50 days. Height: 110-135 cm. Yield: up to 110 gr.

strain: Northern lights.
flowering: 45-50 days.
15 seeds: £69.00 in stock.

An absolute must for the indoor grower! For the last couple of years the Northern Lights® has dominated the various Harvest Festivals. Through selective breeding we have succeeded in producing one of the most powerful plants in the world. On top of that, we have developed a strain highly adapted for indoor growing: compact, powerful with a good yield and exceptional resin production. The most lucrative plant for the indoor grower.

strain: hash plant.
flowering: 45-80 days.
15 seeds: £75.00 in stock.

One of the most famous cuttings from the Northwest USA, Hash Plant is named for its hashy-tasting, highly resinous buds. For many years already known as an important building block for other Sensi Seeds hybrids, now the original Hash Plant X NL#1 hybrid is available again. This cross of 25% NL#1 and 75% Hash Plant produces some of the strongest specimens, even experienced Dutch smokers have trouble finishing a joint. This plant is easy to clone, has a very fast finish, abundant resin and a pleasant 'narcotic' high.

strain: black domina.
flowering: 50 days
15 seeds: £59.00 in stock.

This full blooded Indica with large bracts will soon have you on your knees and begging for more. This harsh overpowering lady simply gushes sticky resin to which most men seem to have a fatal attraction. A word of warning: this powerful compact Indica has had a devastating effect on many a man, leaving them apparently beaten and whipped with a strange smile on their faces.

strain: Mr Nice g13 x hash plant.
flowering: 60-days.
15 seeds: £89.00 in stock.

The G13 is an outstanding pure Indica cutting reputedly discovered by the U.S. government research program in Mississippi. Crossed with the Hash Plant it produces one of the best indoor hybrids that unfortunately was only available in the late '80s. Now the Sensi Seed Bank is very proud to have this hybrid in production again and to bring it on the market labeled as "Mr. Nice". This is in honor of Howard Marks, an Oxford graduate, who became one of the biggest Marihuana smugglers of our time. After spending 7 years in an American Penitentiary, Howard released his autobiography "Mr. Nice" and now spends his time promoting the normalisation of Cannabis. If you like a solid and resinous bud with a 'double Indica' hashish taste and aroma, it is time to go for the Mr. Nice G13 x Hashplant. Flowering: 55-60 days. Height: 100-130 cm. Yield: up to 100 gr.

strain: jack herer.
flowering:50-70 days
15 seeds: £89.00, in stock.

This multiple hybrid is the result of many years of selective breeding, combining 3 of the strongest varieties known to man. Even though we are regularly put under pressure by obsessed growers to give pedigree details, I'm afraid that just as with the Coca Cola recipe this Sensi variety will have to remain a secret. This variety produces so much resin that even the branches bristle with stalked glands.

> High Times (May 1995): "the bud was heavy with crystals and resin; the high was immediate and cerebral. An excellent strain." Flowering: 50-70 days. Height: 150-180 cm. Yield: up to 125 gr.

strain: Northern lights#5 x haze.
flowering: 65-75 days.
15 seeds: £89.00 $135.00 in stock.

This hybrid is the pinnacle of achievement in Cannabis breeding today. The result: an extremely potent plant with a great Sativa high. In the 1994 harvest festival this variety was miles ahead of its competitors. The high yields compensate for the slightly longer flowering period. Hybrid vigour provides for lush growth, heavy bud formation and abundant resin. A true champion!

strain: Big Bud
flowering: 50-650 days
15 seeds: £60.00 $90.00 in stock.

One of our most popular varieties. A plant for professional cash croppers. Even experienced growers continue to be amazed and come back to fill their garden with these heavy ladies. It is advisable to tie up the bottom branches as they have a tendency to break due to their excessive weight.

strain: Afghan# 1.
flowering: 45 days.
15 seeds: £39.00 $59.00 in stock.

Our top Afghans have been used for this variety. Characteristic are the big, dark Indica leaves, their strong aroma, sturdy stems and high yield. A must for the Indica connoisseur. At the 1994 Harvest Festival this new variety immediately seized the second place in the Indica category.

strain: Shiva shanti.
flowering: 50-55 days.
15 seeds: £20.00 $32.00 in stock.

This Afghani with its penetrating Indica aroma is one of the better yielders in the collection. It's pleasant taste and above average potency make this an attractive variety for beginners.

strain: silver haze.
flowering: 65-75 days.
15 seeds: £60.00 $95.00 in stock.

Although the cerebral high of the Sativa is preferred by many, indoor growers aren't too fond of this type: Sativas get very tall, take a long time to finish off and produce skimpy yields. We have spent years searching for a superb Indica/Sativa hybrid suited for indoor growing. By crossing the Haze, the most powerful Sativa in the World, to a non-dominant Indica we managed to get the height and flowering time of the plant down to an acceptable level and still retain the unique Sativa qualities of the high. The results: the Silver Haze, winner of the '89 High Times Harvest Festival. Don't expect top yields but top quality that will excite the true connoisseur. Flowering: 65-75 days. Height: 150-180 cm. Yield: up to 100 gr.

strain: Hawaiian Indica.

Aloha! Enjoy the tropical sensation indoors. We have crossed a selected Hawaiian lady with our Northern Lights®. The result is a potent variety with a fresh aroma and a high yield amply compensating for a longer flowering period. For many, this was THE surprise at the 1994 Cannabis Cup.

Flowering: 60-65 days.
Height: 120-150 cm.

Yield: up to 125 gr
15 seeds: £69.00 / £45.00 in stock.

strain: marleys collie.

At the Cannabis Cup in November '97 we were honored to meet Rita Marley. She and the atmosphere of the Cup made us decide to start to work on a strain that we would make in respect for Bob Marley, her late husband. Bob Marley not only spread the fine sound of reggae, but also the Rastafarian religious Cannabis spirit around the globe and we can still feel his vibes today.

The whole Sensi Seed research-kitchen was put to work exclusively with some selected Jamaican plants that where present in our mother rooms already for many years. Amazing results where found in an extraordinary hybrid we made with a fresh Indica, which relates to our Maple leaf Indica strain. A fresh, sweet, celestial Jamaican high with a short intermote length and heavy duty wide fingered Indica leaves. This plant will astonish everyone.

Flowering: 60-65 days.
Height: 130-160 cm.

Yield: up to 120 gr
15 seeds £75.00 - €120.00 in stock.

strain: fruity juice.

An Indica/Sativa cross of the highest order. Both sides of the Indica and Sativa spectrum are fully expressed in this variety. The sweet aroma comes from our most delicious Thai. This rarefied type was originally very difficult to work with, but we eventually found the ideal cross. Expect big yields from this one, with an exceptionally rich sweet aroma.

Flowering: 50-60 days.
Height: 140-180 cm.
Yield in greenhouse: up to 500 gr.
Flowering: 45-55 days.

This cross between Skunk #1® and Northern Lights #5® is one of the most reliable varieties that we have ever produced. Excellent hybrid vigour and yield make this one a snap to grow. Works superbly indoors as well as in a greenhouse. Taste and high are similar to Skunk #1®, a rich sweet pungency, but with more resin and better yield. High calyx to leaf ratio, you can almost throw those scissors away as very little manicuring is required. An absolute must for beginners or experts.

Flowering: 45-55 days.
Height: 125 cm.
Yield: up to 125 gr.
Finishing date in greenhouse: end of October.
Yield in greenhouse: up to 500 gr.
15 seeds: £39.00 - € 66.00 in stock.

strain: shiva shanti II
The shiva shanti II is a 3 way hybrid which consists mostly a Afghani strain that we call Garlic Bud because of its aroma characteristic. The Shiva Shanti II contains a smaller part of this Garlic Bud and is added with skunk and another Afghani. It is a less stable 4 way hybrid but quality wise very nice.

Flowering: 45-55 days.
Height: 120-150 cm.
Yield: up to 100 gr.
15 seeds: £10.00 - € 14.00 in stock.

strain: skunk kush.
A hybrid between our best Hindu Kush and the famous Skunk#1. It has the distinctive qualities of Skunk and the unique pungency of Kush together in a vigorous, even blend. Excellent greenhouse performance.

Flowering: 50-60 days
Height: 110-140 cm.
Yield: up to 100 gr.
Yield in greenhouse: up to 500 gr.
15 seeds: £ 55.00 - $ 82.00 in stock.

strain: shiva kush.
A very early strain from South Africa. Durban is a compact Sativa with a sweet aroma and an up high. One of the most reliable early outdoor varieties, it will produce chunky, solid buds even during the worst season. If you haven't tried Durban, you are missing out on one of the easiest-to-grow, highest-quality early varieties in the world.

Yield in greenhouse: end of October.
Yield in greenhouse: up to 750 gr.
Flowering in greenhouse: end of October.

strain: Durban
Breeder: sensi seeds
Origin: Netherlands
Outdoor
Flowering: 60+ days
15 seeds: £35.00 - $55.00 in stock
A very early strain from South Africa. Durban is a compact Sativa with a sweet aroma and an up high. One of the most reliable early outdoor varieties, it will produce chunky, solid buds even during the worst season. If you haven't tried Durban, you are missing out on one of the easiest-to-grow, highest-quality early varieties in the world.
Strain: Early Pearl
Breeder: Sensi Seeds
Origin: Holland
Indoor / Outdoor
Flowering: 60+ days
15 seeds: £ 35.00  $56.00     in stock

Early Pearl has always been one of the popular outdoor varieties. Wonderfully sweet and resinous, the plants have a mostly Sativa dominated growth pattern, with excellent potency. Very mold resistant, even during the worst season.

Strain: Early Skunk
Breeder: KC Brains
Origin: Brazil / Holland
Indoor / Outdoor
Flowering: 60+ days
15 seeds: £ 25.00  In Stock

An excellent hybrid between Skunk #1 and Early Pearl. Outdoor growers are usually dissatisfied with the finishing date of the regular Skunk strain. The Early Skunk finishes about 2 weeks earlier than Skunk #1 due to the influence of the Early Pearl. The influence of the latter is also noticeable in the smell and the high: sweet and smooth. On top of that: the strain combines a good yield with mold resistance.

Strain: Early Girl
Breeder: Sensi Seeds
Origin: Holland
Indoor / Outdoor
Flowering: 60+ days
15 seeds: £ 36.00  In Stock

This is a mostly Indica variety, one of the earliest in this collection. Very potent, medium yield, with a hashy taste and aroma. These compact plants will tend to grow to one main stem.
An ideal choice for your balcony!

Strain: Jamaican Pearl
Breeder: Sensi Seeds
Origin: Jamaica / Holland
Outdoor / Greenhouse
Flowering: 60-65 days
15 seeds: £ 35.00  $56.00  in stock.
The Jamaican marleys collie certainly did a'stonish' everybody on the Dutch Highlife Cup of 1999 and was double次数 one of the reasons for winning the big super cup that year.
The Jamaican sweetness and characteristic Sativa high of the plant was greatly appreciated by the judges.
The same mother was used to realize this sweet outdoor hybrid between the Jamaican and our best Earl pearl flowering, sweetness and mould resistance are some of the qualities of this remarkable outdoor hybrid.
Finishing: October 1. Height: 200-300 cm. Yield: up to 400 gr.

KC Brains
Welcome to our fantastic KC Brains selection of seeds marked at unbeatable prices. All varieties will work indoor or outdoor, with special attention given to make sure of a substantial harvest under natural light KC won the coveted WeedCup this year 2001 with his Haze Special.

Spontanica indica (in/outdoor)
This variety crossed between Secret Project Number 1 and a KC 33 is a success both indoor and outdoor. Expect great harvests. There’s no plant like it.
Harvest under natural light: end of Sept. to mid-Oct. Height: 4.5 m Yield: 900 gr
Strain: Spontanica
Breeder: KC Brains
Origin: Holland
Indoor / Outdoor
Flowering: 50-70 days
10 seeds: £ 9.50  $15  In stock.

Strain: KC33
Breeder: KC Brains
Origin: Thailand / Brazil / Holland
Indoor / Outdoor
Flowering: 40-65 days
10 seeds: £ 9.50  $15  In stock

A Dutch strain, cultivated for years, crossed with Thai and Brazil male plants. The K.C.33 is further developed for outdoor growing, but is also indoor a Number 1. The buds are compact and have a lemon fresh taste and produce double THC.
Flowering Period: 6-9 weeks Height: 100 cm Yield:130 gr.
Harvest under natural light: end of Sept. Height: 2.5-3.75 m Yield: up to 900 gr.

Strain: KC36
Breeder: KC Brains
Origin: Holland
Indoor / Outdoor
Flowering: 40-60 days
10 seeds: £ 9.50  $15  In stock

More production for every square meter! Parents of this success product are kept secret. K.C.36 is a short, stocky plant that produces giant buds and is very productive. A true THC bomb.
Harvest under natural light: end of Sept./middle of Oct. Height: 1.75 m Yield: up to 900 gr.

Strain: MindBender
Breeder: KC Brains
Origin: Afghanistan / Holland
Indoor / Outdoor
Flowering: 40-65 days
10 seeds: £9.50/ $15  in stock

The parents of this plant are a double K.C.2 with a K.C.33 and an Afghani. This plant which could turn red, has sweet buds and a great aroma.
Harvest under natural light: end of Sept./middle of Oct. Height: 2.2-3.5 m Yield: up to 750 gr.

strain Afghani special
origin Afghanistan / Holland
Breeder: KC Brains
Origin: Netherlands
Outdoor
Flowering: 42-63 days
10 seeds: £9.50 / $15.00 in stock.
The ancestors of Afghani Special indica are an old Afghani strain, crossed over with a new double Afghani. This indica has a strong sweet scent, the leaves are wide, and dark green. A weed from the good old days. Harvest Outdoors: end Sept/Height: 2.5-3 m. Yield: 700 gr.

Strain: Original Northern Lights
Breeder: KC Brains
Origin: USA / Holland
Indoor / Outdoor / GH
Flowering: 50-70 days
10 seeds: £9.50 / $14.50  in stock
Northern Light Special indica/sativa (in/outdoor)
The Strongest variety in the world with a nice sweet taste. This strain is short and compact making it a lucrative plant for indoor growing.

Strain: Mango
Breeder: KC Brains
Origin: Holland
Indoor / Outdoor
Flowering: 42-63 days
10 seeds: £ 9.50  $15  in stock.
Mango indica (indoor/outdoor)
The parents are a K.C. SPECIAL SELECT with a K.C.33 and an Afghani-like plant. This plant has extremely big buds, a great production and an early harvest. Harvest Outdoors: end of Sept./middle of Oct. Height: 2.2-3 m Yield: up to 800 gr.

Strain: Leda Uno
Breeder: KC Brains
Origin: Brazil / Holland
Indoor / Outdoor
Flowering: 42-63 days
10 seeds: £ 9.50  $15  in stock.
Leda Uno indica/sativa Highlife Cup Winner 1997-1998 (indoor/outdoor)
Leda Uno is a strain that can be used for indoor and outdoor growing. The parents of this strain are K.C.33 and a secret Brazilian female, after that it was crossed with a K.C. 606 early flowering male crossed with LEDA. A superior plant with lemon characteristics.
Harvest Outdoors: end of Sept. Height: 2.5-3.9 m Yield: up to 800 gr.
Strain: White KC
Breeder: KC Brains
Origin: Holland
Indoor / Outdoor / GH
Flowering: 42-77 days
10 seeds: £ 9.50 $15 in stock.
White KC : indica - (in/outdoor)
The ancestors of this plant are a male K.C. 606 and Real White Lady (which has secret ancestors herself). This special indoor quality gives a very satisfactory harvest.

Strain: T.N.R.
Breeder: KC Brains
Origin: Thailand / Holland
Outdoor
Flowering: 56 days
10 seeds: £9.50 / $15 in stock.
T.N.R. sativa/indica (outdoor)
TNR is a special outdoor plant. The parents are a Thai lady that has been growing for 28 years in Holland, crossed over with a double K.C 2. This plant is the giant of cannabis plants, with huge colas. The buds have a pure Thai aroma.
Harvest Outdoors: mid Oct. Height: 4 m Yield: up to 1 kilo.

Strain: Haze Special
Breeder: KC Brains
Origin: Holland
Indoor / Outdoor / GH
Flowering: 42-63 days
10 seeds: £9.50 / $15 in stock.
Haze Special : Sativa - (in/outdoor)
This variety was meant for indoor cultivation, but outdoors it can give good results as well. The ancestors of this specimen are a Nevil's Haze, crossed with the K.C. 606. It is an early flowering plant with a special Haze taste.

Strain: Brazil XT
Breeder: KC Brains
Origin: Brazil / Holland
Indoor / Outdoor / GH
Flowering: 63-84 days
10 seeds: £ 9.50. in stock.
Brazil x K.C. sativa (indoor) A plant well suited for the indoor cultivation with a great production. The Brazil x KC has compact buds and a strong aroma. The parents of this plant are MANGO VERMELHO from Paranaiba Brazil and KC 606.

Strain: Crystal Limit no pic yet
Breeder: KC Brains
Origin: Holland

Strain: Bahia Black Head no pic yet
Breeder: KC Brains
Origin: Rio / Holland
Indoor / Outdoor / GH
Flowering: 56-70 days
10 seeds: £9.50 $ 15 In Stock
all aboard the magic bus for a trip of a life time

Pradise Seeds
After 12 years of growing, testing and experimenting with many different varieties, Paradise Seeds was founded in 1994. About 17 years ago in Amsterdam, many coffee shops started to sell imported hash from India Afghanistan or Morocco and weed from Thailand, Columbia, Mexico or Malawi. Most of this was of poor quality. But things were changing, new types were introduced from the U.S that were early crossbreeds of already higher quality. Since then we got involved in the early research for better quality strains. This took place in Amsterdam and at several outdoor locations in Holland. Our aim was to create better weed, with a sweet / spicy taste and stronger high, for our own use.

Durga Mata ®
(the mother goddess). Genetics: This Indica is a cross of two Super Shiva& Specifics: Selected for the resin (THC) content. This gorgeous plant is mind-blowing, has a unique aroma and herbal spicy flavour, and is easy to grow. You should get to know her.
Flowering time: 50 - 55 days
Yield per m2: 400 - 450 grams
Yield per plant (outdoors): Approximately 500 grams
Harvest time (outdoors): Beginning of October (at 50º North latitude)
Growing tips: For outdoors, 6 hours a day of direct sun for the best result.
Price: £20.00 $32.00 in stock.

Dutch Dragon
© Genetics: Mostly Sativa with a touch of Indica
Specifics: High yields and superb quality on long sticky colas makes this Dragon of Dutch descent a spectacular plant for indoor and outdoor growing. Due to the combination of her sweet taste and strong potency, she is the favourite to many regular smokers.

Flowering time: 60 - 65 days
Yield per m²: 400 - 500 grams
Yield per plant (outdoors): 600 grams or more. She can become a tall plant with hundreds of buds. In the tops the flowers are growing densely and abundantly.

Harvest time (outdoors): Middle of October (at 50°N.)
Growing tips: Let her sunbathing all day long and she shows you why she is a dragon.
Price: £32.00 $49.00 in stock.

**Sensi Star ®**
Genetics: One of the strongest Indica's that you will ever encounter.
Specifics: First price winner in the Highlife Cup 1999, bio indoors and first price winner in the Hightimes Cannabis Cup 1999! She produces powerful, compact buds, crowned with legendary amounts of resin. The dense, strong and characteristic aroma speaks for itself. She is one of worlds finest cannabis strains, and has successfully become the new standard in growing.

Flowering time: 55 - 60 days
Yield per m²: 350 - 400 grams
Yield per plant (outdoors): 300 - 400 grams
Harvest time (outdoors): Beginning of October (at 50° N.L.)
Growing tips: Sensi Star doesn’t like high levels of nutrients.
Price: £44.00 $70 in stock.

**AmsterdamFlame ®**
Genetics: Mostly Indica
Specifics: This outstanding plant of excellent quality with her sparkling looks is selected for the lovers of cannabis best. Her wonderful high and soft subtle taste carries us like a summerbreeze, telling tales of mysteries. A plant worthy for the 'canna'seur'.

Flowering time: 50 - 56 days
Yield per m²: 400 - 450 grams
Yield per plant (outdoors): At least 500 grams.
Harvest time (outdoors): 3rd week of October (at 50° N.L.)
Growing tips: Keep her moist and at least 5 hours of direct sunlight per day.
Price: £32.00 $49.00 in stock.

**Nebula (starcloud)**
Genetics: Slightly more Sativa (Haze), then Indica.
Specifics: Winner of the fourth place in the Hightimes Cannabis Cup 1999! Like the name suggests this plant is covered with twinkling shiny THC glands. Her fruity flavour and scent is a delight to even the most experienced smoker. She is bound to get you into the realm of space. Her buzz is typically transcendental and it is known she takes you far beyond your grasp. When you want to join the worlds of nebula, she is waiting to give you universal depth.

Flowering time: 56 - 62 days
Yield per m²: 450 - 500 grams
Yield per plant (outdoors): 500 to 600 grams
Harvest time (outdoors): Middle of October (at 50° N.L.)
Growing tips: Nebula shows a strong reaction to increase of light, outdoors the more sun, the better!
Price: £38.00 $59.00 in stock.

**Belladonna ®**
Genetics: A cross of Superskunk and a F1 hybrid potent male of 60% Sativa and 40% Indica origin.
Specifics: This mostly Skunk type is a real beauty, with very tight, compact orange buds. This beauty absorbs the light of the world in 60 days. During this blossoming process she develops to maturity. Her tempting signals are of the kind you want to experience, but be warned, her tripping high is of a hallucinogenic nature.

Flowering time: 55 - 60 days
Yield per m²: 400 to 450 grams
Yield per plant (outdoors): 400 grams is feasible.
Harvest time (outdoors): Middle of October (at 50° N.L.)
Growing tips: She performs well in a sea of green technique.
Price: £22.00 $35.00 in stock.

**Sheherazade ®**
Genetics: Her mother is a true Afghan queen, the father a strong handsome king, mostly Sativa. Specifics: Due to her family heritage, Sheherazade has got the depth from the valleys of Hindu Kush, as well as the soaring highs from the far East. Most of all, the traits of this sultry princess is her heavy musk-like sweetness. Now available for you to enjoy, a ‘thousand and one night’ long-lasting warm caress of breathtaking up high!

Flowering time: 56 - 60 days
Yield per m²: 350 - 450 grams
Yield per plant (outdoors): 300 to 400 grams
Harvest time (outdoors): Middle of October (at 50° N.L.)
Growing tips: She performs like a queen when you give her devotion, space and enough light. Outdoors, 7 hours a day of direct sunlight is recommended.
Price: £35.00 $66.00 in stock.

**Sweet Purple®**
Genetics: She is selected from Purple plants, crossed with an early, large yielding Dutch variety, and then, to sweeten her, crossed with a highquality plant with huge amounts of resin. Specifics: A very strong, rather tall plant with hue’s of purple and pink, that tastes like strawberries. She grows good indoors, and is also perfectly adapted to colder regions such as Holland for outdoor growing. Her early flowering means you can harvest fat colas before the “bad” weather starts.

Flowering time: 56 - 60 days
Yield per m²: 350 - 400 grams
Yield per plant (outdoors): 500 grams (half a kilo) is feasible.
Harvest time (outdoors): End of September, beginning of October (at 50° N.L.)
Growing tips: When grown indoors, induce flowering early, after 1 week to 10 days vegetative state.
Price: £12.00 $20.00 in stock.

**Swiss Bliss ®**
A wonderful mostly Sativa variety, abundant in growth, that flavoures a mix of tropical fruits. The branching pattern makes her ideal for pruning. This means you can put less plants per square meter as you would have in a sea of green setup, and still be able to harvest a terrific yield of very nice sticky buds on several branches, within approximately 9 weeks of flowering. When smoked you feel ecstatic and joyful, really high!!

Yield per m² (indoors): minimum 400 grams
Yield per plant (outdoors): up to 1000 grams
Harvest time (outdoors): end October early November (Northern latitude)
Growing tips: This one needs a bit more space.
10 seeds: £40.00 $60.00 € 60,- in stock.

**Magic Bud ®**
Magic Bud is the finest blend of Indica and Sativa, which makes her into an easy to grow bud bomb. The floral and aromatic taste makes her smooth to smoke with a body relaxing effect, combined with a pleasant Sativa cerebral high. This plant of fine stature produces beautiful nugs in a relatively short time, approximately 50 days indoors. Many commercial growers would like to have this plant in their gardens, not only for its high yield and short flowering time, but also for her quality which is beyond many commercial strains.

Yield per m² (indoors): 500 grams
Yield per plant (outdoors): at least 500 grams
Harvest time (outdoors): Middle of October (Northern latitude)
10 seeds: £20.00 € 30,- $30.00 in stock.

**Sugar Babe ®**
This variety is a true beauty. Powerful as an Indica plant can be with compact full buds powdered white as snow alike the Alp mountaintops where she was developed. Inherited from her partly Afghani background, she is well adapted to the outdoor. The smoke is very distinctive and fresh, a bit lemon like with some metal taste to it. Her energetic and uplifting effect makes you feel like doing fun things, such as skiing. Good yields indoors and outdoors, approximately 400 grams on compact sugar dipped, 30 cm long buds.

Flowering time of this ideal plant is only 54 to 60 days.
Yield per m² (indoors): 400 - 450 grams
Yield per plant (outdoors): 400 grams and more
Harvest time (outdoors): Early October (Northern latitude)
Retail price: £30.00 € 40,- $40.00 in stock.

**Nirvana**
all Nirvana standard now only £9.99 / $15 for 10 seeds
The history of Nirvana goes way back to the end of the 1980’s. At that time Nirvana’s founder was working at Amsterdam’s most famous grow-shop, the legendary “Positronics”, and it was the knowledge and inspiration that he received there that moved him to think about starting his own seed company. Years were spent traveling, seeking out and collecting seeds from the finest strains. And more years went in experimentation, growing, cross-breeding and
developing the new strains from among which Nirvana selected the best to become their range of high quality hybrid seeds. After applying and expanding his experience in a number of Amsterdam’s best known grow-shops it came time to offer the expertise he had gained, and the high quality products he had developed, to the world. The result of this initiative was the foundation of Nirvana in 1995. Originally a seed specialist, Nirvana is now an innovative business concept. It has developed into a shop with a unique and original range of self-developed hemp products that extend the uses of the extraordinary plant further than ever before. Nirvana means: a state of happiness.

new 100 % feminised Pure Power Plant This is a strong Sativa variety developed in the late 90’s from South African strains. PPP produces loads of crystal and has tremendous growth potential both indoors and out. Generally better results are obtained with outdoor cultivation in good conditions, if you’re a less experienced indoor grower. PPP is a high THC plant that’s why it’s called, Power Plant, in addition to its powerful growth. This variety gives you a soaring high. Specs:
Flowering: 56 days
Height: 130-150cm / 260cm
Yield: 130g indoor / 550g or more outdoor

Yield: 75g indoor / 370-500g outdoor
Indica/Sativa: 10/90 Harvest: If outdoor Nov.
10 seeds £9.99 $15.00 in stock.

Strain: Hollands hope.
Hollands Hope is an Indica/Sativa mix of Afghan with Skunk. Hollands Hope is an ideal plant for the outdoor grower cultivating in cool climates and where short summers may limit the growing season. This is strong plant, mold resistant variety, can grow to nearly 4 meters in height with high yield. This is one of the first strains grown in Holland; it’s recommended by many and has a knock out high.
Specs:
Flowering: ~56 days
Height: 270-310cm
Yield: 600-800g
Indica/Sativa: 80/20 Harvest: End of Sept. 1st of Oct. Sow:
Transplant after last frost or sow when soil temperatures warm to ~ 59F/15C
10 seeds £ 9.99 $15.00 in stock

strain: big bud.

flowering: 8 weeks.
Big buds with few leaves, sweet natural odor, not to stoney. The heaviest crop plant.indica/sativa mix.

strain: ice.

flowering: 8 weeks.
This new variety is a combination of Afghan, skunk 1 and northern light. very sticky buds with the density of Afghan, smell as sweet as skunk 1, smoke like northern light. strong crystallised white buds. indica/sativa mix.

strain: misty.

flowering: 7-8 weeks.
10 seeds: £9.99 $15 in stock.
loaded with crystals. looks like white widow but produces denser buds, has big flowers. short and bushy plant.

strain: northern light.

flowering: 8-9 weeks.
This is our second commercial plant, but unlike the big bud the flowers have a sweeter taste. This is our fastest flowering plant becoming ready in only 6 weeks. Strong and easy to handle also makes a great plant for first timers.

strain: skunk#1

flowering: 8 weeks.
10 seeds: £9.99 $ 15 in stock.
5K #1 is used in base mixes of all sorts of newly named plants. It has a great consistancy of generating a good strong punch, with a great skunky taste. The sk #1 is definately for the skunk lover in you! The sk #1 will flower in 8 weeks. It has a very strong genetic strain that can take a lot abuse.

strain: top 44.

flowering: 7-8 weeks.
This is our second commercial plant, but unlike the big bud the flowers have a sweeter taste. This is our fastest flowering plant becoming ready in only 6 weeks. Strong and easy to handle also makes a great plant for first timers.

strain: masterkush.

flowering: 8-9 weeks.
10 seeds: £9.99 $ 15 in stock.
This plant is a 2 time winner of cannabis cup. Master kush is a strong plant for almost all climates. Only the real cool countries out will have a second guess. This plant has maintained a high quality and a good quantity with a great taste. Flower within 8 weeks makes an excellent choice. This plant is a tetraploide kind, witch means that it showses sometimes female flowers in the splitting of the internodes which is unique.

strain: Citral

flowering: .56 days.
Citril produces a nice mellow herbal taste, very good yield and strong hard buds. Indoor for best results, grow to a height of around 100 to 120 cm before changing the photo period. Citral produces a fresh aroma and interesting cerebral experience for the growing enthusiast. Some of the genetics for this strain come from the Hindu Kush mountain region near a village district named Chitral.
Flowering: ~56 days Height: 90-130cm indoor / ~160+ cm outdoor Yield: 135g indoor / 370g or more outdoor Indica/Sativa: 80/20 Harvest: If outdoor 2nd half of Oct.
10 seeds £9.99 $15.00 in stock.

strain: Northern light x haze.

flowering: 8-9 weeks.
10 seeds: £9.99  $15 in stock.
The northern lights mixed with lambs breath is an excellent mix. Big plant with big leaves. Light green. It will grow to 15 feet tall outdoors. Will produce 4-6 ounces per plant. An extremely sweet smell. A unique and high quality stone. Flowering: 9-10 weeks Yield: up to 100 grams

strain: Northern light x shiva
flowering: 8 weeks.
The original white shark is crossed with our most potent male: skunk nr 1. The buds are big and sticky with a nice sativa high. Not really high yielding but a very strong smoke tiny skinny leaves. Mostly sativa

strain: Bubble gum.
flowering: 10 weeks.
This heavy ganja is brought from America and makes extrememly large flowers which produce an enormously amount of the cristals. very special flavor. A moderate yielding plant. 40% indica

strain: Hindu kush.
flowering: 8 weeks.
The original genes from this strain come from the Hindu Kush valley. A lusy mountainous area in central asia. The seeds were brought in the 80`ies and crossbred with several varietes to create this lovely indian type. The plant smells lovely and the leaves are big and dark green. A kind that you can smoke all day. Indica sativa mix

strain: White widow
Breeder: Nirvana Seeds Standard
Origin: Holland
Indoor / Outdoor / GH
Flowering: 56-63 days
One of our loveliest plants (power plant) does not yield as well as we would like but this plant one can ski down. Flowering in 8 weeks with an outstanding taste to be savoured as your eyelashes meet. Also a good medical use plant.

strain: Pure Power Plant
Breeder: Nirvana Seeds Standard
Origin: South Africa
Indoor / Outdoor / GH
Flowering: 56 days
Power Plant (mostly Sativa) was developed in 1997 from new South African genetics. This strain has been inbred only, never hybridized. Very rich in THC. It is a strain with an enormous grow potential. Indoor as well as in a greenhouse the plants have an enormous yield. Indoors flowering starts already one week after turning back the light cycle to 12 hours. Outdoor flowering starts late, but the plants ripen very fast. This variety is very uniform. Strong up high, very soft smoke.

strain: Nirvana Special
Breeder: Nirvana Seeds Standard
Origin: Holland
Indoor / Outdoor / GH
Flowering: 56 days
Jack Herer Hybrid Hybrid. A sweet pungent smell, with a nice Sativa High. Indica Sativa mix.

strain: Durban Poison
Breeder: Nirvana Seeds Standard
Origin: USA / Holland
Indoor / Outdoor / GH
Flowering: 50-60 days
Durban Poison seeds from South Africa were grown out to select a particularly vigorous male parent plant, which was then crossed with the best Skunk#1 clones to be found in Holland producing a manageable plant for indoor cultivation which finishes in 8 to 9 weeks. Mostly Sativa this Durban cross should give the discerning tokker a seriously 'up' buzz. 

strain: White Rhino
Breeder: Nirvana Seeds Standard
Origin: Holland
Indoor / Outdoor / GH
Flowering: 55-65 days
10 seeds: £9.99 / $15 In Stock
version of a decidedly good Widow cross.

strain: Northern Lights#5 x BigBud
Breeder: Nirvana Seeds Standard
Origin: USA / Holland
Indoor / Outdoor / GH
Flowering: 49-55 days
This is one of the oldest commercial flowers crossed with a great Northern Lights. The purpose of the big bud is yield. Big strong flowers with a lot of product. The big bud will flower in 8 weeks with a great skunky taste in quantity.

strain: K2
Breeder: Nirvana Seeds Standard
Origin: Holland
Indoor / Outdoor / GH
Flowering: 56 days
Good commercial plant with very high THC content. Looks like a snow storm hit the plant when finished well. 75% Indica, 25% Sativa.

strain: (blue mystic) Blueberry
Breeder: Nirvana Seeds Standard
Origin: USA / Holland
Indoor / Outdoor / GH
Flowering: 49-56 days
The fast and fruity indica from North America. Amazing blueberry smell when finished properly!

strain: Afghan
Breeder: Nirvana Seeds Standard
Origin: Afghanistan / NL
Indoor / Outdoor / GH
Flowering: 45-55 days
Afghan is another popular plant staying low and bushy. With big leaves for soaking up the sun. Afghan is a fat flower producer. Good yields and very strong tuff plant and can take most climates.

strain: Jack Herer
Breeder: Nirvana Seeds Standard
Origin: Holland
Indoor / Outdoor / GH
Flowering: 56-63 days
The mystical 3-way Dutch plant that has revolutionized the business.

strain: Chrystral
Breeder: Nirvana Seeds Standard
Origin: Holland
Indoor / Greenhouse
Flowering: 56 days
10 seeds: £9.99 / $15 In Stock
Chrystral is a cross between a popular production clone called Crystal which has been doing the rounds on the Dutch commercial Cannabis growing scene. The cross is a male Skunk#1 selected by Mau and kept as a stud father for many of his breeding projects.

All flower times begin when the hours of sunlight reach 13 hours and begin to fall below
Most plants are capable of surviving 1 of 2 frosts? If in a worse case scenario Pay attention to molds with thick morning dews or prolonged damp days in later flowering
Early Special
This plant is an miracle, as soon as the seeds starts to grow it is producing flowers, nice sweet cristals are gathering around the buds, all through the year.
Expecially very handy for the people who live in the northern countries like above Denmark, Poland and in northern Canada and Alaska.
A famile from early buds
A skunk mix. (50% sativa)
Yield: 1 kilo per square meter.
Height: 1.5 till 3 meters. Flowering all through the year.
Harvest: ready before winter
10 seeds . £9.99  $15 in stock

New Purple Power
This plant is one of the oldest strains grown outdoors, since the sixties.
The name says it alreadly, the buds can be deep purple till almost black.
Easy to grow, good for cold climates and mostly mold resistant.
Mostly sativa.

Outdoors,an origionall sativa,with tall females and sweet glittering buds,to get you high,and stay active,for a happy high feeling,easy to grow!
10 seeds £9.99 $15 in stock.

Early Girl
*This is a mostly Indica variety, one of the earliest in our outdoor collection.
Very potent, medium yield, with a hashy taste and aroma. These compact plants will tend to grow to one main stem. An ideal choice for your balcony.
flower: 7-9 weeks
harvest end september/begin october
10 seeds £9.99 $15 in stock

Hollands Hoop
*Developed: inbred 10 plus years Stabilised hybrid Sativa/Indica: California Sativa crossed with Indica Appearance: big long clusters, green to goldish at harvest Smell/taste: sweet smell flower: 7-8 weeks
harvest: september
10 seeds £9.99 $15 in stock

Hawaii x Skunk
*Mostly Indica (F1 hybrid) with exceptionally broad leaves. Lots of resin on leaves as well as flowers, with a musky hash like aroma. Strong physical high.
Yields are above average. Short rounded plants. Flower: 9-12 weeks
Harvest: end of October
10 seeds £9.99 $15 in stock.

CannaBiogen
Twenty years of travelling the world in search of the grail, from the mountains of Jamaica and Colombia in the New World to Pakistan, India and Thailand.
Meticulous selections from more than one hundred varieties and careful progeny testings have culminated in magnificent examples that bring us the gamut of the sublime.
The majority of the varieties we carry are from original landrace stock, cultivated in their respective lands for generations and brought back by ourselves and our friends who have travelled to those far away places in search of cannabis seeds with the purpose of safeguarding them for posterity.

strain: Carbie
A first rate backcross (Jamaica x Jamaica/NL5/Haze) between our best female from the Blue Mountains in Jamaica and a champion NL/Haze bring us a great yielding sativa that can be grown indoors. Yield and quality are complemented by its resistance to plagues, especially those brought about by humid climates.
Time seems to stop as the senses sharpen, this sativa hybrid is a gem sativa lovers love to own.
Flower: 65/70 days. Seventy days for maximum yield. Shortening the light period incrementally from 12 to 8 hours in the last 2 weeks is best to augment resin production and to avoid typical sativa reflowering.
Outdoors: End of Sept/Early October
Yield: 250-375 grams/m2.
PRICE 12 SEEDS: £30.00 $44.00 soon come.

strain: sugarloaf.
An F1 Hibrid of extraordinary vigor, large trichomes and dense, resinous buds. The mother, a beautiful indica whose seeds were brought back from Pakistan was crossed with our favorite Capricho male (Capricho, a backcrossed Manali x Colombian). This indica / sativa combination with its high proportion of caix to leaves ratio and a potent psicotastic high is also a large producer whose branches need to be tied to avoid breakage.
A wonderful, delightful treat that can be grown indoors and outdoors.
Flower: 55/65 days
Outdoors: End of Sept/Early October.
Yield: 300-450 grams/m2.
PRICE 12 SEEDS: £35.00 $48.00 soon come.

strain: Leshaze.
Is a complex hybrid of excellent stock, the mother, a stable, early flowering plant from Lesotho, gromwed there in mountains 2000 mts high. The father, a Skunk/Haze with dutch roots brings us a strong hybrid which grows well both indoors and outdoors.
A potent sativa high dominates this hybrid. It's sweet and spicy with an intense perfume with green and purple buds, The buds and even the stems glisten with resin tops a spectacular yield.
Flower: 60-70 days
Outdoor: Mid October
Yield: 250-400 grams/m2
PRICE 12 SEEDS: £25.00 $ 32.00 soon come.

strain: Sand Storm
A great plant to make hashish from two great hashish lines, both 100% indica. The mother, an indica from the Chitral Kush region coupled with an exceptional male clone from Arabene, Morroco, it gives very dense nuggets covered with resin, these plants need to be ventilated well when the buds start putting weight and density. This sweet scented plant is potent, productive and easy to grow.
Flower: 55/65 days
Outdoor: Octubre.
Yield: 250-400 grams/m2
PRICE 12 SEEDS: £25.00 $ 32.00 soon come.

strain : Destroyer
A great plant to make hashish from two great hashish lines, both 100% indica. The mother, an indica from the Chitral Kush region coupled with an exceptional male clone from Arabene, Morroco. It gives very dense nuggets covered with resin, these plants need to be ventilated well when the buds start putting weight and density. This sweet scented plant is potent, productive and easy to grow.
Flower: 55/65 days
Outdoor: oct.
Yield: 250-400 grams/m2
PRICE 12 SEEDS: £75.00 $105.00 soon come.

strain : Taskenti.
A 100% Indica originated in Uzbekistan. Its name comes from one of the best hash in the world, according to experts; a very powerful and resinous strain, of enormous yield, mainly outdoors. It has a refined and subtle hashish perfume, a shade between mint and lemon, very intense.
Original latitude and height cultivation conditions have made its acclimatization very simple, similar to Southern Spain Mountains. Nevertheless a meticulous selection and improvement work has been done to fix genetic dominance for resin production and to avoid typical sativa reflowering.
Indoors plants mature in 7-9 weeks, needing a good ventilation and dry atmosphere, mainly in flowering.
Vegetative period: Minimum 30 days for high performance.
Flowering: 55/65 days
Outdoors: Mid October
Yield: 350-400 gr/m2
PRICE 12 SEEDS: £35.00 $48.00 soon come.

strain: De Lux Mix.
This unique breeders mix offers many possibilities for experimentation and hibridization between the different genotypes in the landrace varieties. The F1's
within the mix are from CannaBiogen's F1 collection, the result of hybridizations from their meticulously selected parental lines. Expert and novice grower will delight in the variety and fresh genetics in the Deluxe Mix. Chart your own undiscovered country while you improve your skills. Can you tell them apart? Try it!

**Strain: Wakeford.**

**indoor/ outdoor.**

10 seeds: £35.00 $56.00 in stock.

Wakeford is a recent hybrid bred for its name sake the plants were recently grown out in the valley and have a killer couchlock high this strain was produced to make a very strong medicine for very sick man with mean tolerance at that we succeeded we used 0g13b sk#1 x g13 x uchemocomo for this one she yields great in sea of green with huge resin covered buds that are hard and heavy as rocks it takes a good 9 wks but is well worth the wait if you want couch lock with commercial potential this is the plant smooth hash flavour it did great out side this year finishing oct5

SK#1 X G13 X CHEMO @42 DAYS : thanks to leisure puffer at cw for the pic/co PB

**strain: Northern dream (indoor K.>thunderfuck hybrid)**

**indoor.**

10 seeds: £35.00 $56.00 in stock.

we used a NL#5 male to pollinate our best KG thunderfuck mother this is the first generation back cross to a exceptional NL#5 cutting that has been around E. vancouver for some time now huge rock solid main cola dominant plants with a skunky lemon scent very commercial 7-Bwk fwr.

**Soma Seeds**

Soma produce some of the finest bud you will encounter on planet earth. and also produce quality feminized seeds.

**strain: somango-soma#5**

flowering: 9-10 weeks.

10 regular seeds: £50.00 in stock.

10 feminized seeds: £75.00 out of stock sorry.

breeding/ super skunk-big skunk hawaiian-jack herer.

Somango blends the multiple hybrid Jack Herer with Big Skunk Korean to form the fruitiest of all Soma's strains. Previously known by Soma #5, this complex cross was renamed for its tropical mango aroma and flavor.

Somango is optimal as a multiple branch plant, since its genetics encourage long side branches and a height on the taller side. A sea of green method can still be undertaken, but branching and height will need to be controlled. Soma prefers to grow on soil indoors with fully organic nutrients, but other media will also give satisfactory results. As it matures, the leaves shade to purple and the buds become covered in a carpet of crystals that makes fine finger hash. While a moderate yielding strain, Somango's buds possess sublime qualities.

**strain: citralah.**

flowering: 9 weeks.

10 regular seeds: £50.00 in stock.

10 feminized seeds: £75.00 in stock.

breeding/ citral-afghani-hawaiian.

Citralah a great strain for making hash from. Half it's genetics come from Chitral Pakistan where it is solely used for hash production, and Afgani Hawaiian for the other half. This plant has a strong citrus like smell and taste. It has a very good yield and takes 9 to 10 weeks to finish. Great finger hash when manicuring and great water hash as well . Nice daytime weed.

**strain: Haze heaven.**

flowering:10-11 weeks.

10 regular seeds: £50.00 in stock.

10 feminized seeds: £75.00 in stock.

breeding/ northern lights 5- haze-Afghani-hawaiain.

Haze Heaven is just that, a haze that doesn't take as long to finish as most others, a great yielding plant with giant buds, and that great haze flavor with that hint of Afghanistan in the back of your mind. As with all strains if you don't give your plants just the right amount of quality energy that they need on all levels they will get stunted and take longer to finish. This one again is not for inexperienced growers, experience in patience with cannabis harvest's is definitely needed. This haze doesn't put you in a daze, it takes you to your center.

**strain: reclining Buddha.**

flowering: 9 weeks.

10 regular seeds: £50.00 out of stock.

10 feminized seeds: £75.00 out of stock.

breeding/super skunk-big skunk Korean- Holland's hope.

Reclining Buddha is a 3-way hybrid that combines the genetics of Holland's Hope with Super Skunked Big Skunk Korean. Circulating in the Netherlands during the 1980s, Holland's Hope is a mold resistant strain with a very close nodal structure whose name can be attributed to her success in outdoor grows, even in Holland's wettest season. Reclining Buddha has held this characteristic, and combined it with the enjoyable smell and yields of its other two parents. Previously named Soma Skunk V, the new, enlightened name came out of a philosophical session prompted under her influence. A fairly short plant, Reclining Buddha must remain in vegetative phase for a considerable amount of time to become a big plant. She also will not make a lot of side branches, and the ones that do tend to be smaller, a combination that predisposes this variety to do well with minimal effort in a sea of green set-up. Reclining Buddha's buds are tight and narrow, allowing moisture to escape easier than short thicker buds in conical formations. Try this one outdoors even in humid locations for a covert plant that delivers high-quality yield. Buddha buds form many dark auburn hairs early. When everything around it still has white hairs, Reclining Buddha's hairs have turned a color that tempts you to harvest, but exercise patience. Reclining Buddha needs a full 9 weeks to reach maturity, and the high just gets better with the wait. This medicinal quality cannabis has the taste of a sweet cherry candy and an uplifting creative high that is lucid and mentally stimulating. 3rd place, 1999 High Times Cannabis Cup, best indica.

**strain: white willow.**

flowering: 10-11 weeks.

10 regular seeds: £50.00 in stock.

10 feminized seeds: £75.00 out of stock.

breeding/white widow-afghani hawaiain.

White Willow named after my daughter who is quite a strong human being, is also quite a strong plant. A cross of White Widow and Afghani-Hawaiian this plant has massive buds and large THC crystals. The color of the leaves is a dark almost bluish green. The taste is sweet like some special desert. The smell is Afghani-sweet. It takes a while to finish so again you need experience for this one. Quite a good yield. Strong high.

**strain: somativa.**

flowering:10 weeks

10 regular seeds: £50.00 in stock.

breeding/super skunk-big skunk korean-jack herer. Somativa a mix of genetics from all over the globe. In 1994 the cannabis strain of Sensi-seeds seed bank " Jack Herer" won first prize those seeds were grown mixed first with big skunk Korean, then with a special super skunk. The result is a thin leafed wiry big yielding plant that takes 10 weeks to flower. The buds you get are some of the sweetest tasting flowers you have ever tried. The high is a very uplifting buzz that is good for playing music, meditation, prayer, or any kind of friendly contact between human beings. You need to stake these plants. .

**strain: Rock bud -soma -a+.**

flowering: 8-9 weeks.

10 seeds regular. £50.00 out of stock.

breeding/super skunk-big skunk korean-afghani hawaiian.

Soma A+ may become the pet of the class. Short to medium in height, this strain: kilimanjaro-soma#1++

flowering:10-11 weeks.

10 regular seeds: £50.00 in stock.

breeding/super skunk-big skunk korean-afghani hawaiian.

Soma A+ may become the pet of the class. Short to medium in height, this strain: kilimanjaro-soma#1++

flowering:10-11 weeks.

10 regular seeds: £50.00 in stock.

breeding/super skunk-big skunk korean-afghani hawaiian.

Soma A+ may become the pet of the class. Short to medium in height, this
Somanna formerly Soma Wide+ is the only strain with cannabis Chinensis a breeding/super skunk-big skunk korean-afghani hawaiiain. flowering: 8-9 weeks. 10 regular seeds: £50.00/$75.00 in stock. 

somanna-soma-wide.

Soma #10 brings together a world of weed. Strains with histories that traverse Afghanistan, Hawaii, Korea, the U.S. and Europe are all melded together in this 3-way cross. An exotic looking strain, Soma #10 develops the darkest purple coloration you can imagine. The color is intense, with the leaves turning nearly black at the ends, they are so deeply saturated with color. The extra dense buds give off a sensually spicy smell akin to Afghan hash. The high calyx to leaf ratio and the legginess of this plant make for simplified manicuring. While not as tall as the Haze strains, Soma #10 can shoot to tall heights when allowed an extended vegetation period before being placed into the flowering phase. If grown in a sea of green, Soma recommends a shortening the veg cycle in order to control the height. This strain will also do well as a multi-branched plant. Outdoors, this variety can thrive in a most temperate zones, although arid climates known for their rich agricultural promise are of course optimal. Soma #10 has a flavor that is similar to Afghan hash, producing a captivating high that circulates through every chakra. A terrific evening or rainy day smoke. Soma #10 will leave you feeling relaxed and mellow, possibly to the point of sleep.

strains: lavender-soma#10

Afghan Delight is the strain with the most Afghanistan genetics of any of my strains. A mix of Afghan skunk and Afghan Hawaiian, this strain has very wide leaves and a dark green color. It smells even when it’s vegging and you touch the leaves. The buds have a white green color when they are done, and a very Afghan Hash smell. Nice weed for smoking in the evening. Leaves a good taste in your mouth. When it looks like it’s ready wait a week.

strains: Amethyst bud.

Medicinal Delight is a mix of Nepalese hash plant and Afghani Hawaiian, and has a very pungent odor. The taste is exotic and a high that’s a favorite with many of my close friends. It makes strong side branches so it needs some room to grow. The main stalk is quite sturdy. Good for outside in cold climates.

strains: Buddhas sister.

Kilimanjaro formerly known as Soma 1+ lives up to it’s name. This bud is quite large with many light red hairs and a real fruity smell. The high is very up and creative, a nice daytime weed. The harvest time is a little long but the yield is worth the wait. A very nice combination of Afghanistan, S.E. Asian, and Sativa, it is not for you first time growers. This strain is better for more experienced grower’s, very medicinal!!

strains: big kahuna.

Big Kahuna is a good plant for first time grower’s, it doesn’t branch out too much and has a very large top bud. The smell is very skunky and needs very good smell control in your growing and drying rooms. The flowering time is 8 to 9 weeks. It needs good ventilation as the top bud is very dense and can get mold on the inside, with proper ventilation it does just fine. Strong skunky aroma and flavor. Mellow high.

strains: Free Tibet.

Soma’s favorite strains, Kahuna is a 4-way cross that brings together a wide set of influences for a complex high. Soma recently renamed his Soma #9 strain Kahuna, which is a Hawaiian title for a religious or spiritual leader that literally means “Keeper of the Secret.” The Kahuna variety has both tropical influences in its parentage, and spiritually attuning effects when used. A medium-sized plant, Kahuna produces few side branches and a top bud that will impress you with its length and density. Due to the big, tight buds, conditions must be tended carefully for this variety. For indoor gardens, attention to humidity levels is key for mature buds that are mold-free. While recommended for indoors where variables can be controlled, outdoor growing is possible in reliably dry climates, although an unseasonably rainy season could ruin the promising look of these thick buds with insidious mold. When Kahuna’s proper conditions are met, the yield potential is fantastic, offering a harvest of up to 500 g per square meter in a standard sea of green. This variety has shaken a little pepper into an otherwise sweet-tasting puff . very sweet smelling variety with a powerful cerebral high that invites creativity. This is great daytime pot, complementary to most introspective activities, and comfortable for socializing with colleagues and friends. Kahuna offers medicinally valuable properties for many conditions without interfering with quality and clarity of one’s thought.

strains: Mr Nice

Mr Nice seed bank is owned by shantibaba and fronted by international renown Howard marks, they have produced almost all of the winning varieties of cannabis since 1990, including legendary varieties such as Northern lights 5 ,silver haze , white widow and white rhino and white shark.

strains: Medicine Man.

Big Kahuna brings together a world of weed. Strains with histories that traverse Afghanistan, Hawaii, Korea, the U.S. and Europe are all melded together in this 3-way cross. An exotic looking strain, Big Kahuna develops the darkest purple coloration you can imagine. The color is intense, with the leaves turning nearly black at the ends, they are so deeply saturated with color. The extra dense buds give off a sensually spicy smell akin to Afghan hash. The high calyx to leaf ratio and the legginess of this plant make for simplified manicuring. While not as tall as the Haze strains, Big Kahuna doesn’t branch out too much and has a very large top bud. The smell is very skunky and needs very good smell control in your growing and drying rooms. The flowering time is 8 to 9 weeks. It needs good ventilation as the top bud is very dense and can get mold on the inside, with proper ventilation it does just fine. Strong skunky aroma and flavor. Mellow high.

strains: Spice.

Yeild: 450-600 grams.

Soma formerly Soma Wide+ is the only strain with cannabis Chinensis a type that grows in China, it has a very interesting characteristic of sometimes making an extra budlet on the stem of the large fan leaf. It grows quite wide in that the side branches really become a large part of the plant. You have to give it room. It has quite a nice color, limey green with very orange hairs. It looks a lot like the old orange bud, but tastes much better. Mellow sativa high.

strains: Lavender-soma#10.

strains: Amethyst bud.

strains: Afghan Delight.

strains: Buddhas sister.

strains: Medicine Man.

strains: Spice.

strains: Free Tibet.

strains: Kahuna soma#9.
She is bubbling with rapid growth and well endowed ear as her name suggests. Her pedigree has blossomed out of the union of a Hawaiian indica x Hawaiian sativa and is a stable hybrid that no curry eater can live without. Don't knock our Nice Spice until you have grown her to maturity. She is definitely better than the one that left; we have created our own Nice Spice. Expect yields of around 480-600 g/m2 for indoor growers, with tight nuggets. Expect an indoors harvest between 7-9 weeks, indoors. Outdoors in the northern hemisphere harvest by October, and in the southern hemisphere by late May. Be warned of the kick that Spice gives, not to mention the mouth-watering cascade of exotic fruit taste. Enjoy growing together.

strain: black widow.
flowering: 56-65 days.
yield: 350-450 grams.
15 seeds: £50.00 in stock.

A most infamous strain that since 1994 has won a number of awards, including the High Times Cannabis Cup in 1995, and has acquired acclaim from most corners of the globe - rightly so. It has a pedigree of parentage that combines a Brazilian Sativa with a South Indian hybrid. Basically, it is White Widow changing its colors like its company.

It will seem evident to the cultivator that this species needs slightly more attention to achieve the expected results. Do not forget the necessary love and attention in order to get the best results.

For indoor methods the grower will find that 10 weeks of flowering will be necessary to realise the immense resin production. Expected yield of 350 to 450 grams per square meter. In the northern hemisphere expect harvest around September/October, having planted as late as June. However, there is a chance that rain could reduce the expected yield.

Be Warned. This is the original true blue champion that began a whole new wave of breeds before it consumed its partners.

strain: critical mass.
flowering: 45-55 days
yield: 650-700 grams
15 seeds: £49.00 in stock.

A reworked excellent version of an old breed once known as Big Bud. This is an absolute must for the cultivator who demands a high yield with an equally high stone. It is the heaviest plant currently in production for commercial farmers and outdoor crops and resembles the male genital protrusion of a giant donkey. Due to its heavy flower construction it can be susceptible to mold if the growing area is too humid. So be warned, and harvest on time. It has a genetic pedigree originating from a particularly heavy Afghan combined with the original Skunk#1.

An expected yield indoors would be 650-750 grams per square meter within 50-55 days, possibly more for the experienced cultivators. If cultivated outdoors, expect harvest in September for the northern hemisphere and by March in the southern hemisphere.

strain: shark-shock.
yield: 500-600 grams
flowering: 50-56 days
15 seeds: £45.00 in stock.

This is definitely the most successful breed of the late 90's (since its inauguration by Shantibaba as Great White Shark).

It has equally famous genetic heritage and has been awarded a multitude of cannabis cups under the names of the Peacemaker and the Great White Shark. It's parents are well known as White Widow (a Brazilian sativa combined with a south Indian hybrid) and Skunk#1. It is a pleasure to watch this plant grow into a densely compacted white skunk with extreme aromas and equally pleasurable to use. Strictly tested, but only on humans. We never use our products on animals.

Indoors, expect a 50-56 day flowering cycle and a yield of between 500-600 grams per square meter. Outdoors in the northern hemisphere, harvest in September to early October; and in the southern hemisphere, March to early April.

strain: devil.
yield: 550-600 grams
flowering: 48-60 days
15 seeds: £42.00 in stock.

The definitive plant for those interested in outdoors/greenhouses. Due to its Afghani pedigree, taste, reddish aura, and magical mind journey tendencies, this plant provides quite a wonderful therapy. No one can be unhappy possessing this nice devil (and a righteous one at that). It has a genetic make-up of Afghan x Afghan/Skunk and shows initial slow growth until it has an established root ball. Then watch out, brothers and sisters! Expect to finish this plant in the Northern hemisphere by October and in the Southern hemisphere by June/July.

Indoors, 8-10 weeks with a yield expected of at least 550-600 grams per square meter. Definitely recommended for first time growers.

strain: Shit
Breeder: Mr Nice
Origin: Holland
Indoor / Outdoor / GH
Flowering: 45 days
15 seeds: £20.00 / $30 in stock.

An absolute classic and original Skunk/Afghani that has won many awards. It is a sure-bet for first time cultivators of interior, exterior, or glasshouse grown plants. The yield will be extremely substantial, with expectations between 550-650 grams per square metre.

The finishing time will be within 45 days of the flowering's first appearance on the plant. Expect harvest in late September to early October in the northern hemisphere and in the southern hemisphere by the end of April. A proven true breed since the 80's.

strain: Super Silver Haze
Breeder: Mr Nice
Origin: Holland
Indoor / Outdoor / GH
Flowering: 56-70 days
15 seeds: £75 / $100 in stock

A champion of champions since winning its hat-trick at the 1997, 1998, and 1999 High Times Cannabis Cups and comprising the most commercial strains known to the uncivilized world: Skunk, NL, and Haze. Such achievements confer an undoubtedly regal pedigree.

It's an excellent breed for those who wish to possess the stash of stashes and leaves one gasping for reality. Expect harvest in 8-10 weeks with top yields (450-550g/m2) and heavy resin production. In the northern hemisphere completion date would be expected by late October; in the southern hemisphere, late May/June.

This complex hybrid is in the cutting edge in practical Haze hybrids, designed to astound the grower and consumer alike. Recommendation is unnecessary as most people can't see the Haze for their daze.

strain: Dreamtime
Breeder: Mr Nice
Origin: Holland
Indoor / Outdoor / GH
Flowering: Varies
15 seeds: £20.00 - $30 out of stock.

A selection of mixed indoor varieties of excellent parentage including Skunk, NL, Haze, and Afghan. Highly recommended for the first time grower or those that search for an economic solution to their problems. Guaranteed to turn the consumer on and personally recommended.

It has an 8-10 weeks flowering cycle, and yields are expected to be between 380-550 g/m2.

strain: La Nina
Breeder: Mr Nice
Origin: Holland
Indoor / Outdoor / GH
Flowering: 56-70 days
15 seeds: £55.00- $80 in stock.

A family member that had previously been kept private for The Family. Strongly related to El Niño (Bio Cup 98 HTCC), La Niña manifests characteristics that are predictable, contrary to her name's implication. She has a genetic composition of Haze x White Widow, making her an inevitable candidate for a hot love story with her consumer. Expect her to bare her voluptuous resinous fruits within 8-10 weeks on a flowering stage.

Indoors, an estimated yield per square meter would be 450-550 grams. In the northern hemisphere, expect harvest by September; in the southern hemisphere, by April.

strain: Early Queen
Breeder: Mr Nice
Origin: Holland
Indoor / Outdoor / GH
Flowering: 42-56 days
15 seeds: £30.00- $40 in stock.

Since the beginning of the 1990's, this three way hybrid has earned acclaim in the cultivators' world. It is quick to finish both indoors and outdoors and is, therefore, perfect for cold climate countries in the northern hemisphere. The flowering cycle is expected to be between 6-8 weeks with indoor cultivation. Expect harvest time in the northern hemisphere as early as September and in the southern hemisphere by March. The yields will surprise the victims. The genetic composition of this breed stems from early Californian blends mixed with a touch of Mexican.

So, Signor Cultivator, enjoy your Early Queen and her fruits like a happy farmer should Real early, real juicy, and the real thing.
Strain: WalkAbout  
Breeder: Mr Nice  
Origin: Holland  
Indoor / Outdoor / GH  
Flowering: 55-65 days  
15 seeds: £20.00 - $30 in stock.

A selection of mixed outdoor varieties with all genetics of supreme sources including Thai, Haze, India, early Skunks, Mexicans, and New Guinea. Highly recommended for those in need of walkabout. A guaranteed recipe for outdoors or greenhouse cultivators, with its range of early finishes and a few late flowers.

### Spice of Life Seeds

Spice of Life features unique Canadian and Dutch genetics, using only the highest quality breeding stock to bring you new flavors. All plants are now selected by Breeder Steve in Switzerland greenhouses for the largest parental selection anywhere! "After a bit of a hiatus, we're back and better than ever. We heard you missed us and wanted us back and so it is that we're returning to the old menu to strut our stuff and be whisked around the world on jets to exotic locales for a life of luxuriating in marvelous gardens. If you have a marvelous garden all of the sisters and cousins would love to come for a visit and stay as long as you'll keep us. You might decide you need more room; you'll love us all so much.

We hope you'll respect our preferred dietary requirements. We are accustomed to dining on the fined of biological excrement and simply adore the tingle of beneficial microbial action on our roots. Please, no harsh chemicals. We don't like synthetics!

Breeder Steve will be releasing many varieties from the 'Spice of Life' catalogue later this year, so keep checking back!

### Sweet Tooth #3

(fourth generation, 3rd Backcross to Sweet Pink Grapefruit mother.

This Sweet Tooth is the result of one backcross wherein the goal in searching the father was an emphasis on the taxonomy and aroma of the original SPG mother. The Grapefruit is a true favorite among growers and consumers. It is possibly the most cultivated strain among commercial producers in Vancouver. The preceding BX2 seed that the father was selected from produced quite homogenous grapefruit-like plants, this generation should be suitable for hybridizing. The plant Sweet Tooth yet retains the exceptional candied sweetness this strain is famous for. A beautiful plant with a beautiful taste and a positive vibration. A smiling high is guaranteed from these heady flowers. The plants are quite hardy and easy to grow, and prefer a drier finishing time, as the buds become fat enough for mold to be of concern. These chunky monkeys often require staking but in a windy location they should be stout enough to hold their own (significant) weight. Does well as a small bush but will become a large bush given adequate growth parameters. Whether this is an exceptional commercial strain or head stash is for you to decide. I truly hope you enjoy these plants as much as I do.

Indoors Flowering: 8wks  
Outdoors: mid Oct.

Indoors Yield: Way Above Average (easily 500gms per meter)  
Outdoors: Above Average

12 seeds £45.00 - $72.00 in stock.

### spice of life adventure mix

Lot of Sweet Tooth... Shishkaberry, Blue Domino, Big Treat, California Dream, Tropical Treat, Jack Herer, Ortega, Strawberry, M39 - all hit with a Sweet Tooth. These male plants were put around the perimeter of the last Sweet Tooth garden specifically for a lovely Adventure Mix. If you are just looking for some new mothers and aren't as concerned with pedigree, you will find a wide variety of very original plants in here.

strain: adventure mix  
indoor/outdoor/gh  
flowering: varies

12 seeds: £15.00 - $24.00 out of stock.

10 seeds: £39.00 in stock.

The "LegendsUltimate Indica" is a combination of our two most favorite indica's. This F1 hybrid was mothered by a previously unreleased Ortega plant from California. The Ortega's heavy indica traits shine through with its' light buds and extremely stoney finish. The father, a second backcross Sweet Tooth from Spice of Life Seeds, adds the sweet and pungent flavor Breeder Steve strains are know for.

Strain: Blockhead

### Breeder: Spice of Life  
Origin: Pacific North/West  
Indoor / Outdoor / GH  
Flowering: 8 weeks

12 seeds: £35.00 In Stock

This is a new addition to Spice of Life Seeds. The mother was selected from seed developed by one crazy yanki. The exact origins are somewhat of a mystery. It is strong pot. The feminized mothers were fairly homogenous, although from several of the line, and another more extreme sativa. This mother had indica-like buds on a sativa sized plant. Crossed with the same SwT father as Sweet Tooth #3, I am sure you find it distinctly different from anything on the market. It should probably not even be on the market as it encourages psychosis. Not good for unstable folks! It has been known to magnify neurotic behaviour.

Yield Indoors: good  
Yield Outdoors: very good  
Flowering Period Indoors: 56 days  
Finishing Time Outdoors: mid Oct. 50°N

### L.U.I. (legends ultimate indica).

strain: Sweet Tooth #4 (no image yet)

 BREEDER: Spice of Life  
ORIGIN: Pacific North/West  
INDOOR / OUTDOOR / GH  
FLOWERING: 8 weeks

12 seeds £40.00 / $60 in stock.

The Rockaberry is the result of pollinating a Moonshine Rocket Fuel (Blue VelvetXBlue Moonshine) with Shishkaberry pollen. The plants are strikingly odd, and most will have mauve colouring throughout the light green buds. Many will exhibit golfball-like buds that are some of the most dense nuggs you will find. On average they will be done by 8 weeks flowering. They can get a bit too tall for my liking, and I found I was training most of them sideways at the top. You will find the bud very unusual, with a very Blue family taste.

breeder steve.

strain: blue satellite #2

flowering: 8-9 weeks

12 seeds £35.00 In Stock

A rare and exquisite blueberry sativa mother has been seeded with our easiest to grow, best yielding sweet tooth male. The same pollen used to create the sweet tooth#3 has now bounced back into orbit with an ancestral cross, as the sweet tooth #1 obtained 50% of its genetics from a resinous Blueberry male. An unforgettable plant, they will not be mistaken for anything else. All plants have purple stocks. A good yields finishing early oct after 8 weeks flowering.

### Homegrown Fantasies

Homegrown Fantaseeds is a sister company to the very successful Amsterdam Coffeeshop, Homegrown Fantasy. The Fantaseeds seed company broke onto the scene in a big way, winning the 1997 Cannabis Cup for overall seedbank quality. Low prices and massively good weed make this collection one of the most popular in recent years.

strain: original misty

flowering: 56-63 days

10 seeds: £35.00 out of stock. sorry, soon come.

This is one sexy lady, a truly beautiful plant, bustling with thc glands a top producer in terms of yeild gourment taste and a sweet aroma.

strain: silver blue.

flowering: 56-63 days.

10 seeds: £40.00 in stock.

from the (Silver Pear+) and (Blueberry+) families. The Silver Blue is the (Big Bud+) of the white weed varieties. This variety is highly resinous and has a high thc content with top quality taste. The calix(The plant grows strong and sturdy with broad- shaped leaves, which makes it easy to manage and maintain in all climates. It is a must for the novice gardener. The (Silver Blue+ has a high bud to stem ratio: with it's strong aromatic smell and full- bodied buds, also makes it a cash croppers paradise. Coming from the stock of HGF3s (Haze+ man, the (Silver Blue+) is a pleasure to grow and a pleasure to blow. es are medium to large.

strain: flashback

flowering: 56-63 days.
10 seeds: £25.00 in stock.
Flash Back is the variety for inside, outside and greenhouse. This variety will
grow under any circumstances and produce a nice bud. It is an early flowering
Sativa/Indica hybrid. Gives beautiful tall fat tops. When grown outside it shows
a little purple in the end. It has a real sweet aroma and an uplifting Sativa High.

strain: fourway.
flowering: 56-60 days.
10 seeds: £35.00 in stock.
25% Indica, 25% Ruderalis, 25% Northern Lights and 25% Skunk #1 equals
Fourway #1. Looks a lot like an Indica, strong and easy to grow. A very high
yield, good buds and minimum of leaves. Soft taste and an excellent high.

strain: eclipse.
flowering: 56-70 days
10 seeds: £35.00 in stock.
A new variety, mostly Indica with a sweet taste, our version of the bubble gum/
bubble berry famous by American clients. This is one for the young and the
young at heart. One of the fruitiest tastes there is.

strain: homegrown fantasy.
flowering: 56-70 days.
10 seeds. £15.00 out of stock, sorry, soon come.
This variety retains the sugar coating of all the white strains, but has even
larger trichomes bulging out from stems and buds. This was achieved by
crossing an outstanding Afghan (12 years in development) and a white widow.
This has improved the plants hardness and flavor, and made the buds denser
still. If you appreciate the hard-hitting stone of the "white" strains, but are tired of
the sour old taste it sometimes gives, well, this is the one for you.

strain: Afghani.
flowering: 56-63 days.
10 seeds: £25.00 in stock.
This is one the most potent varieties, well known with growers, and never a
disappointment. 100% Indica with very wide leaves. Our Afghan was 12 years
in development. I t has the vigor and yield typical of Afghan's, but a much
improved taste. The trichomes contain so much THC they look like they are
goin g to burst. Perfect for cross breeding to add strength, vitality and yield to your old "played out" strains. Heavy THC buds. Some plants turn purple during
harvest time. Strong high and a good yield. A must for Indica fans and a real
heavy hitter.

strain: N/L shiva.
flowering: 56-63 days
10 seeds: £25.00 out of stock, sorry soon come.
This cross has many fans. It was the starting point for many of the special
"White Strains". Retained that super Shiva taste, but the stone is something
else. Mix of two of the best kinds, very dense buds. A very pretty lady if you
had to have a photo of just one plant. This is it.

Strain: Purple Power
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Indoor / Outdoor / GH
Flowering: 56 days
10 seeds: £15.00, $24.00
out of stock, sorry.
Purple colored buds, wonderful magical fragrance, lots of THC, fast growing
and early flowering make this an ideal outdoor choice, lots of purple buds with
a nice mellow high to remind you of summertime. Grows very quickly, not
suitable for indoors. This a very unique plant, grows like a typical indica with
sativa influence, that's noticeable in the high when smoking it.

Strain: Early Girl
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Indoor / Outdoor / GH
Flowering: 56 days
10 seeds: £18.00 out of Stock, sorry, soon come.
Indica X Sativa mix: This plant will start to flower, usually within 8 weeks
without the need for less hours of sunlight, so you're sure of a harvest, not
much smell but some tight buds and a nice layer of THC make this plant a
good choice for the discreet outdoor gardener.

Strain: Mango
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Indoor / Outdoor / GH
Flowering: 56 days
10 seeds: £25.00 out of stock
Mango is a 100% Indica crossbreed with a H#1 KC 33 and our Afghan. Real
favorite among growers, and smokers, beautiful plant to see. A very smooth
taste. Your fully aware that you have a real potent plant in your garden.
Try this outside for something that will really impress your friends. One of
the best tasting Outdoor strains.

Strain: First Lady
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Indoor / Outdoor / GH
Flowering: 56 days
10 seeds: £40.00
This is the queen mother of the White Widow strain. The most appreciated
and rewarded sort of the last few years in Holland. And as the name suggest,
totally white with crystals. Always places high in the various cannabis
competitions, and took 2nd prize (Hydro) High Life '98. Very soft taste and a cool high.

Strain: K2
Breeder: Homegrown Fantaseeds
Origin: Netherlands
Indoor / Outdoor / GH
Flowering: 56 days
10 seeds: £25.00
It's the little sister of the White Widow Bio, short plant ideal for people with little
space. Very soft taste and decent high. Grown very much by local growers, a
perfect compromise between quality and yield.
Strongly favored by Hydro growers. Very good yield.

Strain: B-52
Breeder: Homegrown Fantaseeds
Origin: Holland
Indoor / Outdoor / GH
Flowering: 49 days
10 seeds: £25.00
This plant is a truly superior Skunk breed that grows some very heavy buds.
Ideal for the commercial Skunk grower. As with other Skunk varieties, this one
also has a superior and a sweet taste that make you detect the sativa
influence. A super fast Skunk strain.

Strain: Blue Haze
Breeder: Homegrown Fantaseeds
Origin: USA / Holland
Indoor / Outdoor / GH
Flowering: 56-70 days
10 seeds: £45.00
A unique cross between the homegrown haze and the blueberry, with a classy
sweet musky taste with a strong stone. The growing characteristics are of the
body of the indica, with the length of the sativa. An easy plant with a strong
touch of Sativa.

Strain: Millennium
Breeder: Homegrown Fantaseeds
Origin: Holland
Indoor / Outdoor / GH
Flowering: 56-70 days
10 seeds: £35.00
Millenium is the plant for the future. It is mostly an indica. This plant can yield
upto 800 grams per square meter. Grown close packed, this sea of green style
will produce huge colas. You will need to support these plants due to their
weight and height.

Strain: Armageddon-47
Breeder: Homegrown Fantaseeds
Origin: Holland
Indoor / Outdoor / GH
Flowering: 47 days
10 seeds: £45.00
A mostly sativa strain. Our version of the famous "one hit wonder". Won
several prizes in the 90's. Super Sativa high. Grows and flowers real fast for a
sativa.

Strain: Outdoor Mix
Breeder: Homegrown Fantaseeds
Breeder: Homegrown Fantaseeds
Strain: Super Crystal
Origin: Netherlands
Indoor
Flowering: 56 days
10 seeds: £45.00 In Stock
This is the strain that took everyone by surprise. At the High Times Cup, it won us the best seed company award and a lot of friends. One of the judges said, "A real golden nugget, hit me across the back of the head like a 2 by 4!" I did not think I could get higher until I smoked Super Crystal. A super shiva mix with 75% Indica and a strong oriental taste. With this low and compact plant, you'll grow a real beauty.

**Flying Dutchman seeds**
The Flying Dutchman brought over pure true breeding strains like Early California, Thai, Mexican and Silver Haze from Columbia, Afghan and South African seeds. Most importantly, they brought over a few crosses that had already made themselves, including the very first Skunk Number One which is a Columbian/Mexican/Afghan cross. This earned him his present nickname THE SKUNK MAN.

**Thai-tanic.**
- Developed: Thailand, USA, Holland
- F-1 hybrid Sativa / Indica: Mostly Sativa
- Appearance: Very thick, sticky heavy buds
- Smell / taste: Typical Thai, with Skunk undertones
- High / strength: Extremely strong, a clear up high
- Yield per m2: High
- Sowing time: May / June
- Outdoor harvest: November (Holland)
- Flowering period: 9 - 12 weeks (12 hrs indoor)

Don't panic, this one only takes you up and up! A very compact variety, classic chocolate Thai smell and taste. The Thai father dominates only in fast maturation, high yields and general vigour. A heavy crystal producer that is extremly potent with a trippy cerebral high.

11 seeds: £26.00 $39.00 in stock.

**Fumar con Dios.**
- 11 seeds: £30.00 $48.00 in stock.
- Developed: Holland, F-1 hybrid
- Sativa / Indica: 75% / 25%
- Appearance: Sativa looking, very resinous
- Smell / taste: Sweet, fruity sweet taste
- High / strength: Clear cerebral/physical
- Yield per m2: Very high
- Sowing time: May / June
- Outdoor harvest: October / November (Holland)
- Flowering period: 9 - 12 weeks (12 hrs indoor)

Enjoy the fruit of the gods.

Pure Haze smell, pure Haze taste, pure Haze effect. The Thai father keeps the height down and the maturation time to within 12 weeks. He also pumps up the yields to a respectable 300 grammes per square metre. This powerful Haze is highly recommended for impatient Haze lovers. Only one generation removed from the original Haze of the 1970's.

11 seeds: £26.95 $29.00 in stock.

**Strain: The Pure.**
- Developed: USA
- Stabilized hybrid Sativa / Indica: 75% / 25%
- Appearance: Big flowers, limegreen to gold
- Smell / taste: Sweet smell, full, satisfying taste
- High / strength: Very strong, cerebral/physical
- Yield per m2: Very high
- Sowing time: May / June
- Outdoor harvest: October (Holland)
- Flowering period: 9 weeks (12 hrs indoor)
- The one and only Original Skunk #1.

Large yields can be expected from this variety. The Pure is extremely homogenous, and is perfectly adapted for all growing methods. Whether she is being grown indoors, in a greenhouse, or in the great outdoors, the Pure is a strain that expresses the best of both its Sativa and Indica heritage.

11 seeds: £18.95 $29.00 in stock.

**Strain: Early Durban.**
- Developed: S. Africa, California, Holland
- F-1 hybrid Sativa / Indica: Mostly Sativa
- Appearance: Lots of branches with sticky buds
- Smell / taste: Leaning towards the Durban side
- High / strength: Very strong, mentally and physically
- Yield per m2: Very high
- Sowing time: May / June
- Outdoor harvest: Early October (Holland)
- Flowering period: 8 weeks (12 hrs indoor)

Early, easy and powerful. Feels happy growing outdoors.
As comfortable outdoors in most temperate regions as indoors, Early Durban is a tough plant that will reward the grower with high yields quickly, mostly Sativa in nature with a cerebral/physical effect and an Aniseed taste.

11 seeds £21.95 $34.00 out of stock

strain: kerala krush.
Developed: USA / Holland
Sativa / Indica: Mostly Sativa
Appearance: Slender sativa type
Smell / taste: Sweet and fruity
High / strength: Very potent, cerebral
Yield per m2: High
Sowing time: May / June Outdoor harvest: October / November (Holland)
Flowering period: 9 - 11 weeks (12 hrs indoor)
Extremely vigorous Sativa variety!
An extremely vigorous Sativa crossing of the highest calibre, a medium tall plant with good yields for a Sativa. The Skunk father boosts fast maturation without interfering with the high or taste of the pure South Indian Sativa. Very smooth complex taste and smell with a clear cerebral high.
11 seeds £25.00 $39.00 in stock.

strain: afghanica.
Developed: Afghanistan, Holland,
F-1 hybrid Sativa / Indica: Mostly Indica
Appearance: Very resinous, heavy buds
Smell / taste: Sweet taste. Thick and greasy
High / strength: Very strong, physical
Yield per m2: High
Sowing time: May / June Outdoor harvest: End of October (Holland)
Flowering period: 9 - 10 weeks (12 hrs indoor)
A taste of the tropics!
A specially selected Real McCoy crossed back to a Skunk#1 daddy, to offer the chance for wider genetic diversity for those who love the Hawaiian. A little more chunky and Skunky than the Real McCoy, with a distinctive pineapple taste and smell. Very cerebral in effect. A great strain to cross with the Real McCoy and/or other extreme Sativa types.
11 seeds £29.00 $46.00 in stock.

strain: pineapples punch.
Developed: USA, Holland
Sativa / Indica: Mostly Sativa
Appearance: Sativa type with thick heavy buds
Smell / taste: Truly superior, sweet taste
High / strength: Tropical salad bar very strong
Yield per m2: High
Sowing time: May / June Outdoor harvest: End of October (Holland)
Flowering period: 9 - 10 weeks (12 hrs indoor)
A very special cross for the true connoisseur, a wonderfully sweet and spicy balanced physical/cerebral high. High yielding and easy to grow.
11 seeds £33.00 $50 out of stock.

strain: pot of gold.
Developed: Hawaii, USA, Holland,
F-1 hybrid Sativa / Indica: Primarily Indica
Appearance: Extremely resinous flowers and leaves
Smell / taste: Smells and tastes like sweet hashish
High / strength: Positive high, very strong
Yield per m2: Very high
Sowing time: May / June Outdoor harvest: October (Holland)
Flowering period: 8 - 10 weeks (12 hrs indoor)
A specially selected Real McCoy crossed back to a Skunk#1 daddy, to offer the chance for wider genetic diversity for those who love the Hawaiian. A little more chunky and Skunky than the Real McCoy, with a distinctive pineapple taste and smell. Very cerebral in effect. A great strain to cross with the Real McCoy and/or other extreme Sativa types.
11 seeds £35.00 $55.00 in stock.

strain: california sunset
Developed: USA / Holland,
F-1 hybrid Sativa / Indica: 60 % / 40 %
Appearance: Relaxing Sativa type
Smell / taste: Sweet and sour smell and taste
High / strength: An upper, very strong
Yield per m2: High
Sowing time: May / June Outdoor harvest: August / October (Holland)
Flowering period: 7 - 9 weeks (12 hrs indoor)
A fast maturing variety, suitable to grow in most temperate regions. Reminiscent of the good old days this cross is a real original. Large yields with a sweet citrus aroma and taste.
11 seeds £25.00 $39.00 in stock.

strain: royal orange.
Developed: California, Holland, F-1 hybrid Sativa / Indica: Mostly Indica
Appearance: Very resinous
Smell / taste: Candy store sweet
High / strength: Strong physical with a clear high
Yield per m2: High
Sowing time: May / June Outdoor harvest: End October (Holland)
Flowering period: 9 - 11 weeks (12 hrs indoor)
A real Royal treat.
This crossing was made with only quality in mind. The best selected from 10,000 happened to take a little longer to mature but worth the wait. This mostly Indica variety truly comes from royal stock. With a candy store smell and taste and a potent physical high. Perfect for lazy daze in the sun.
11 seeds £28.95 $45.00 in stock.

strain: mixed sativa diva,s
Developed: Varies, F-1 hybrids Sativa / Indica: Sativa Appearance: Mix
Smell / taste: Mix High / strength: Mix
Yield per m2: High
Sowing time: May / June Outdoor harvest: End October (Holland)
Flowering period: 9 - 12 weeks (12 hrs indoor)
Many different varieties of mothers, a good gene mix for selections.
A delicious selection from the Flying Dutchmen. All the quality you have come to expect from us but in a mixed bag. Selected from our top breeding line seeds, big juicy Sativa's. Different mothers bred with the same father. For those who love variety this is the spice.
12 seeds: Mixed Sativa Diva's (12 seeds consisting of 4 Thai Tanic, 4 Swazi Safari and 4 Fuma Con Dios) £22.00 $35.00 out of stock.

strain: Hayleys comet.
Developed: USA / Holland
Sativa / Indica: 60% / 40%
Appearance: Heavy buds, orange to gold at harvest
Smell / taste: Sweet citrus smell and taste
High / strength: Strong physical / cerebral
Yield per m2: High
Sowing time: May / June Outdoor harvest: End October (Holland)
Flowering period: 9 - 12 weeks (12 hrs indoor)
A perfect balance of sweet, spicy… it can't be described by words alone!
A delicious selection from the Flying Dutchmen. All the quality you have come to expect from us but in a mixed bag. Selected from our top breeding line seeds, big juicy Sativa's. Different mothers bred with the same father. For those who love variety this is the spice.
12 seeds: Mixed Sativa Diva's (12 seeds consisting of 4 Thai Tanic, 4 Swazi Safari and 4 Fuma Con Dios) £22.00 $35.00 out of stock.

strain: The Real McCoy.
Developed: Hawaii, USA, Holland,
F-1 hybrid Sativa / Indica: 65 % / 40 %
Appearance: Looks like Sativa
Smell / taste: Fruity, spicy
High / strength: Strong, cerebral
Yield per m2: Good
Sowing time: May / June Outdoor harvest: November (Holland)
Flowering period: 10 - 12 weeks (12 hrs indoor)
A perfect balance of sweet, spicy… it can't be described by words alone!
A very special cross for the true connoisseur, a wonderfully sweet and spicy bouquet and taste that can only be described as smoking a tropical salad bar. Tingly on the tongue, soft on the throat and high in the brain, The Real McCoy reaches the parts other weed can not reach. Grown properly yields can exceed 300 grammes per square metre.
11 seeds £33.00 $50 out of stock.

strain: Swazi Safari.
Developed: S. Africa, USA, Holland,
F-1 hybrid Sativa / Indica: A very special cross, mostly sativa Appearance: Very resinous long buds
Smell / taste: Fairly sweet with a hashy bite
High / strength: Very clear up high, very strong
Yield per m2: Good
Sowing time: May / June Outdoor harvest: October / November (Holland)

Euro 14,00 (£ 8.99) in stock.

Swazi x Skunk
Origin: Swaziland and California
Type: F1 hybrid
Composition: 87.5% sativa, 12.5% indica
Flowering-Time: 9-12 weeks
Environment: Fit for inside, outside, and greenhouse cultivation
Appearance: A strong ‘hashy smelling plant with a lot of resin on the buds and leaves
Height: Medium Tall
Yield: 200-500 gr.
Harvest-Time: ± 10 October
Notes: Specialized in sativa strains, that means that we developed the knowledge after 20 years of experimenting, crossing and stabilizing of existing ones, exclusively sold by The Sativa Seedbank. The breeders gained a particular reputation for its very strong high. It gives a reasonable yield and has a surprisingly mild taste.
Flowering time: 7 – 8 weeks.
Height: 170 cm.
Yield: > 300 g.
Originates from: Holland
Euro 40,00 (£ 26,45) in stock.
Indigo is a strong plant but a slow starter. Be patient as the seeds take longer than normal to sprout. Don’t vegetate too long because this plant stretches during flowering.

The buds have a sweet smell and red brown hairs. The up funky high gives a very happy experience.

Flowering time: 63-70 days

Inside cultivation

Sativa/Indica

Yield: 450 grams per m2

Sea of green

10 seeds £18.00  $ 25  in stock

strain : white lady.

White lady is a compact plant with an abundance of crystals. Few leaves makes this plant easy to manicure. With a fresh taste and an extremely high level of thc this strain is popular among growers and blowers.

Flowering time: 55-60 days

Inside cultivation

Sativa

Yield: 500 gram per m2

10 seeds £24.00  $ 35  in stock.

strain : Haze

This plant originally came from California. It is a pure sativa plant that flowers long. The plant has thin gold bronze coloured buds. The yield is a bit low but the almost psycadelic high is very unique. A special treat for the connoisseur.

Flowering time: 70-85 days

Inside cultivation

Sativa

Yield: Appr. 400 grams per square meter

10 seeds £18.00  $ 25  in stock.

strain : full moon.

This plant can reach a height of 2 to 3 meters and has a strong stone. It has a strong taste and a sweet smell. The buds can become 50 to 80 centimeters long and are very sticky. Beautiful bushy buds with large dark green leaves.

Flowering time: 56-64 days

Outside cultivation

Sativa/Indica mix

Yield: 450 grams per m2

10 seeds £45.00  $ 65  in stock.

strain : Pakalolo.

This long, thin plant has a stong active high. A sweet and herbal taste makes this a refreshing smoke. The ancestors came from Maui (Hawaii) and were crossed in Holland with the skunk nr:1.

Flowering time: 56-64 days

Outside cultivation

Sativa Seed Bank

The Sativa Seedbank is a new seedbank founded in cooperation with Nirvana ©. The breeders from Nirvana © developed new strains next to the already existing ones, exclusively sold by The Sativa Seedbank. The breeders gained a knowledge after 20 years of experimenting, crossing and stabilizing of cannabis seeds .Thats why the quality of the seeds is very high. The Sativa Seedbank is specialized in sativa strains, that means that we developed the seeds that will give a plant with the true sativa high.

strain: Indigo

Indigo is a strong plant but a slow starter. Be patient as the seeds take longer than normal to sprout. Don’t vegetate too long because this plant stretches during flowering. The buds have a sweet smell and red brown hairs. The up funky high gives a very happy experience.

Flowering time: 63-70 days

Inside cultivation

Sativa/Indica

Yield: 450 grams per m2

Sea of green

10 seeds £18.00  $ 25  in stock
